1st Quarter.

[No. 169.]

QUARTERLY RETURN
OF THE
MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT
REGISTRARS' DISTRICTS, AND REGISTRARS' DISTRICTS
IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's
District; Persons Vaccinated, &c., &c., &c.*

DUBLIN: PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEX. THOM & CO. (LIMITED).

And to be purchased, either directly or through any Bookseller, from
E. PONSONBY, 116, GRAFTON-STREET, DUBLIN; or
WYMAN AND SONS, LTD., FETTER LANE E.C.; or
OLIVER AND BOYD, EDINBURGH.

Price One Shilling.

Marriages:—OCT., NOV., DEC., 1905. **Births & Deaths:**—JAN, FEB, MAR., 1906.

During the quarter ended 31st March last, there were registered in the 827 Registrars' Districts in Ireland 26,369 births—a number equal to an annual birth-rate of 24·0 in every 1,000 of the estimated population*—and 20,685 deaths, representing an annual rate of 18·8 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,444 persons emigrated.

In England last quarter, the birth-rate represented was 27·5 in every 1,000 of the estimated population, and the death-rate 16·3 per 1,000.

The birth-rate in Ireland for the quarter is 0·3 over the average rate for the corresponding quarter of the ten years 1896–1905, and 0·5 above the rate for the first quarter of 1905. The deaths are 1,206 under those registered in the corresponding quarter of 1905; the death rate is 1·2 below the rate for that quarter, and 2·6 below the average for the first quarter of the ten years 1896–1905.

Compared with those for the corresponding quarter of 1905, the returns of pauperism, furnished by the Local Government Board, show an increase of 1,217 in the average number of Workhouse inmates on

* See page 84

Saturdays during the quarter, and a decrease of 704* in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years 1896-1905, the number of Workhouse inmates shows an increase of 1,807, and the number of persons on out-door relief a decrease of 457, the total under both heads being 1.3 per cent. above the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1.6 per cent.

The annual marriage-rate (4.8 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1905 is 0.2 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 31st December, 1905, and by the Births and Deaths registered in the Quarter ended 31st March, 1906.

† The rates for the total of Ireland and for the County Boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*) page 23.

MARRIAGES.

The marriages (5,305) registered in Ireland during the fourth quarter of 1905 are equivalent to an annual rate of 4·8 per 1,000 of the estimated population, being 0·1 above the rate for the corresponding quarter of 1904, and 0·2 above the average rate for the fourth quarter of the ten years 1895–1904. Of the total number of marriages 3,512 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,793 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·3 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·5 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·4 above the average rate for the corresponding quarter of the previous ten years, that under the latter shows a decrease of 0·3. Of the 22,818 marriages registered last year, 7,437 were registered in the first quarter, 4,957 in the second, 5,119 in the third, and 5,305, in the fourth.

BIRTHS.

The number of births registered during the quarter ended 31st March, last was 26,369—13,530 boys and 12,839 girls—being equal to an annual ratio of 1 in every 41·6, or 24·0 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1896–1905 was 26,477, equivalent to an annual rate of 23·7 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23·9 per 1,000 of the population according to the Census of 1901; Munster, 23·1; Ulster, 24·6; and Connaught, 21·9.

The highest county or co. borough birth-rate* is 32·3 for Belfast Co. Borough, and the lowest 18·2 for Cavan Co. Of the intermediate rates the highest five are—Dublin Co. Borough, 32·0; Kerry, 25·3; Kildare, 25·2; Donegal, 25·1; and Mayo, 24·9. The lowest five are—Westmeath, 18·8; King's, 19·2; Leitrim, 19·3; Queen's, 19·5; and Longford, 20·1.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 20,685—10,315 males and 10,370 females—affording an annual ratio of 1 in every 53·1, or 18·8 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1896–1905 was 21·4 per 1,000.

The death-rate in Leinster was 20·1 per 1,000 of the population according to the Census of 1901; in Munster, 16·9; in Ulster, 20·3; and in Connaught, 14·5.

The county or co. borough death-rates* range from 13·3 in each of Mayo and Clare, to 25·4 in Dublin County Borough. Between these rates the lowest five are—Cavan, 13·9; Leitrim, 14·4; Galway, 14·6; Kerry, 14·7; and Roscommon, 14·8; and the highest five are—Belfast Co. Borough, 23·5; Down, 21·5; Monaghan, 21·0; Tyrone, 21·0; and Tipperary, S.R., 20·0.

* See note (f) on page 2.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1896–1905, and the average number for that period ; also the number registered during the first quarter of the year 1906 :—

1906, . . .	24·0	—	—	—	—	18·8	—	—	—	—

Ages.—Of the 20,685 deaths registered last quarter, 2,482, or 12·0 per cent., were of children under 1 year old ; and 9,235, or 44·6 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 94·1 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 13·5 per cent. of the total deaths registered therein ; in Munster, 11·0 per cent. ; in Ulster, 12·3 per cent. ; and in Connaught, 8·9 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 41·5 per cent. ; in Munster, to 45·4 per cent. ; in Ulster, to 44·3 per cent. ; and in Connaught, to 52·2 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 782, or 108 less than the number registered in the corresponding quarter of 1905, and is equivalent to an annual rate of

* See note (†) on page 11.

0·7 per 1,000 living, being 0·1 under the rate for the first quarter of 1905, and 0·3 below the average rate for the first quarter of the ten years 1896–1905.

Small-pox.—There was no mortality from small-pox recorded in Ireland during the March quarter of 1906, nor was there any incidence of the disease reported by the Registrars in the notes appended to their quarterly returns. The deaths registered from small-pox in each of the quarterly periods of 1905, were one, 2, 0 and 2.

Measles.—Deaths from measles which in the June quarter of 1905, numbered 266, fell to 115 in the September quarter, and again declined to 69 in the December quarter of 1905, rose to 104 in the period under review, the average for the corresponding quarter of the 5 years 1901–5 being 180. Of the deaths (104), 22 were registered in the Registrar's District of Newtownards, 9 in Lurgan No. 1, and 5 in each of the Districts of Crossroads, Dunglow No. 1 and Scotstown.

Scarlet Fever.—The deaths from scarlet fever which were registered in the whole of Ireland were 50 in number; in the 3 preceding quarters, the deaths from this disease were 28, 31 and 52 respectively, and the average for the March quarter of the preceding 5 years was 58. In Belfast County Borough there were 10 deaths, and in Dublin County Borough there were 5 deaths. In the Registrar's District of Oughterard 4 deaths were registered, and in each of the Registrar's Districts of Kilrea and Boyle No. 1, 3 deaths were registered.

Typhus.—The deaths from typhus (28) which were registered exceed the number registered in the March quarter of any year since 1901 (when 33 deaths from this disease were recorded), the average number of deaths for the 5 years 1901–5, being 19. Of the deaths, 4 occurred in Leinster, namely—one in Dublin County Borough, one in Kells Registrar's District, one in Mountmellick, and one in Athlone No. 1; 8 deaths occurred in Munster, namely—3 in Bantry, one in Cork Urban No. 2, one in Unionhall (Skibbereen Union), one in Dingle, one in Tralee No. 1, and one in Nenagh; one death occurred in Ulster—in Belfast; and 15 deaths from typhus occurred in the Province of Connaught, namely—one in Galway No. 2 District, 2 in Turloughmore, 2 in Lettermore, one in Ballina, 3 in Bangor (Belmullet Union), one in Knocknaloher, one in Foxford, 3 in Westport, and one in Sligo No. 1 Registrar's District.

Whooping-cough.—Although the deaths from whooping-cough (195) show an increase as compared with the numbers recorded in the 3 preceding quarters, viz., 141, 95 and 79, respectively, they are considerably below the average (295) for the March quarter of the 5 years 1901–5, and only one above the number registered in the March quarter of 1905. The 195 deaths represent an annual rate of 0·18 per 1,000 of the population of Ireland estimated to the middle of the year 1906. A reference to the Abstracts in this report shows that 19 deaths from whooping-cough were registered in the County Borough of Dublin, 71 in the County Borough of Belfast, 17 in the Urban District of Londonderry, 15 in the Registrar's District of Dundalk, and 9 in the Registrar's District of Newtownards.

Diphtheria.—It appears from Abstract I, page 22, that 94 persons are returned as having died from diphtheria; in each of the preceding 3 quarterly periods, such deaths, were 67, 49 and 74, and the average for the March quarter of the 5 years 1901–5 is 91. The highest number of deaths from diphtheria in the corresponding period of the 5 preceding years was in 1903, when 115 deaths were recorded. The incidence of deaths from diphtheria is shown in the Abstracts; it may be seen that, there were 13 deaths in the County Borough of Dublin, also 13 deaths in the County Borough of Belfast, from this disease; in each of the Registrar's Districts of Laghy in the Union of Donegal, and of Castleconor in the Union of Dromore West, 3 deaths were registered.

Enteric Fever.—The deaths from enteric fever (114) do not exhibit much fluctuation when compared with those registered in the 3 preceding quarters, namely, 121, 114, and 128; and with the average number of deaths (120) for the March quarter of the 5 years 1901–1905. Of the total (114), there were 7 registered in Dublin County Borough, and 36 in the County Borough of Belfast; 12 deaths in Omagh No. 1 Registrar's District, 5 deaths in Gortin, and in each of the following Registrar's Districts 3 deaths from enteric fever were registered, namely—Tullamore, Listowel and Donegal.

The deaths of 13 persons were classified as pyrexia (origin uncertain) formerly described as simple, continued or ill-defined fever.

Diarrhoeal Diseases.—The deaths which are returned as epidemic diarrhoea (infective enteritis), diarrhoea, English cholera, dysentery are grouped under the heading "Diarrhoeal Diseases"; these deaths numbered 184 in the period under review, and exceed the average by

45; in each of the 3 preceding quarterly periods such deaths were 156, 730, and 244. The deaths (184) represent an annual rate of 0·17 per 1,000 of the population of Ireland estimated to the middle of 1906.

Tuberculous Disease.—The Quarterly Returns (unrevised numbers) of the Registrars, when summarised, give a total of 2,977 deaths from all forms of tuberculous disease for the whole of Ireland; in each of the 3 preceding quarters the corresponding figures were 2,984, 2,348 and 2,292. The 2,977 deaths equal an annual rate of 2·71 per 1,000 for all forms of tuberculous disease for the March quarter of 1906. Several of the Registrars supplemented their numerical returns with special references to the prevalence of tuberculous disease and made observations; amongst these the remarks of the Registrars of Ballynacarrigy, Waterford No. 1 District, and Ardahan are of special interest, and will be found printed at the end of this report.

Malignant Diseases.—The deaths returned under this heading included the deaths registered during the quarter, as from the varieties of carcinoma, sarcoma, cancer (not defined), and malignant disease not otherwise described; these deaths in the aggregate numbered 788, which figure represented an annual rate of 0·72 per 1,000. The rates for such deaths being 0·60, 0·65, and 0·71, respectively, in each of the 3 preceding quarterly periods. The number of deaths in this group of diseases varies from 85 in Dublin County Borough, 80 in the County and County Borough of Cork, 72 in Belfast County Borough, 54 in County Down, 45 in County Antrim, and 38 in each of the Counties of Donegal, and Londonderry (including the County Borough), to 3 in Kerry, 5 in Westmeath, 6 in each of Carlow and Kildare, 7 in each of Longford and Leitrim, and 8 in each of Kilkenny, Fermanagh and Sligo Counties.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases:—Chickenpox in two districts, measles in 43, scarlet fever in 22, whooping-cough in 22, diphtheria in 27, fever in 23—typhus 7, and enteric 16—influenza in 44, and mumps in 8 districts.

Inquests.—There were 482 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 43 of the total deaths registered.

In Leinster there was 1 inquest to every 39 deaths registered, in Munster 1 to 57, in Ulster 1 to 37, and in Connaught 1 to 65.

Deaths in Public Institutions.—Of the 20,685 deaths registered, 4,249, or 20·5 per cent., occurred in public institutions. In Leinster the percentage was 28·3, in Munster 24·6, in Ulster 14·4, and in Connaught 14·7.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1906, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia* (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.

* Formerly described as "Simple Continued Fever"

[TABLE V.

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 22·4, and the birth-rate 29·3 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 16·9 and the birth-rate 21·2 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·2 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1906, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES,† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 31st March, 1906.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1906, there were 16,513 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st March last, was 4,444 (2,791 males and 1,653 females), being 1,863 less than in the corresponding quarter of the year 1905, and 73 under the average number for the first quarter of the ten years 1896–1905.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March in 1905 and 1906:—

MONTHS	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1905.	1906.	In-crease.	De-crease.	1905.	1906.	In-crease.	De-crease.	1905.	1906.	In-crease.	De-crease.
January, .	421	493	77	—	251	340	89	—	672	833	166	—

Total, .	3,506	2,791	—	715	2,801	1,653	—	1,148	6,307	*4,444	—	1,863

* Including 2,588 emigrants to the United States of America, viz.:—343 in the month of January, 449 in February, and 1,796 in March. Of 2,352 steerage passengers, 563 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1905 the average price was $6d.$, and in the corresponding quarter of 1896 it was $5d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $14s. 6d.$ per cwt., being the same as the average for the corresponding quarter of the year 1905. In the first quarter of 1896 the average price was $13s.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $2s. 3d.$ to $2s. 9d.$ In the first quarter of 1905 the average prices were $2s. 9d.$ to $3s. 4d.$, and the prices for the corresponding quarter of 1896 were $1s. 5d.$ to $2s. 4d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $47s. 6d.$ to $53s.$ per cwt. In the corresponding quarter of 1905 the average prices were from $45s.$ to $55s.$, and in the first quarter of 1896 they were from $44s.$ to $55s.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was $19s.$ per ton nett.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $£90\frac{11}{16}$, and the lowest $£89\frac{1}{16}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, remained at $4\frac{1}{2}$ per cent., to which it had been raised from 4 per cent on the 28th September, 1905.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average weekly number of persons receiving out-door relief during the quarter was 58,850*, being 704 under the average for the first quarter of 1905.

Of the persons receiving in-door relief during the first quarter of 1906, an average number of 1,501 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1905 the average weekly number was 1,451.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1906, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phoenix Park, Dublin, during the first quarter of the years 1901–1906, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 18).

* See note (*) on page 1.

† Latitude 53° 21' 48" 25 north; longitude 6° 20' 59" 15 west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

The mean height of the barometer during the first quarter of 1906 was 29·887 inches, being 0·001 over the average for the corresponding quarter of the five years 1901-1905; the highest reading (30·642 inches) was on the 22nd January, at 9 P.M., air calm; and the lowest (28·638 inches) on the 10th February, at 9 P.M., wind W.

The mean temperature of the air during the quarter was 42·9° or 1·7° above the average for the first quarter of the five years, 1901-1905.

The maximum temperature of the air during the quarter was 57·7° and the minimum 23·1°. The maximum heat in sun was 103·7°, and the minimum on the grass 17·0°.

Rain or snow fell on 59 days during the quarter. The rain-fall measured 7·133 inches, being 0·464 inch above the average for the first quarter of the five years 1901-1905. The greatest monthly rain-fall was in January, when 3·565 inches were registered.

The wind blew on 24 days from S.W., on 24 days from W., on 12 days from N., on 7 days from S., on 5 days from N.E., on 4 days from N.W., on 3 days from E., and on one day from S.E., and the air was calm on 10 days at 9 A.M.

January.—The mean height of the barometer during this month was 29·861 inches; the highest reading (30·642 inches) was on the 22nd at 9 P.M., air calm; and the lowest (29·149 inches) on the 9th, at 9 A.M., wind S. The mean temperature of the air was 42·3°, the maximum registered was 54·6°, and the minimum 25·1°. The 2nd was the warmest day, and the 23rd the coldest night. The mean of the dry bulb was 41·2°, and of the wet bulb 39·6°. The maximum heat in sun was 92·2°, and the minimum on the grass 19·6°. The minimum on the grass was below 32° on 14 nights. The total amount of sunshine recorded was 59·0 hours, the greatest daily amount being 6·8 hours on the 19th. The maximum ozone was 0·9, the minimum 0·1, and the mean 0·5. Rain or snow fell on 22 days. The rain-fall measured 3·565 inches; the greatest amount in 24 hours was ·520 inch on the 17th.

February.—The mean height of the barometer during this month was 29·775 inches; the highest reading (30·432 inches) was on the 7th at 9 A.M., wind W., and the lowest (28·638 inches) on the 10th, at 9 P.M., wind W. The mean temperature of the air was 37·7°, the maximum registered was 48·7°, and the minimum 23·1°. The 26th was the warmest day, and the 21st the coldest night. The mean of the dry bulb was 37·1°, and of the wet bulb 35·4°. The maximum heat in sun was 99·9°, and the minimum on the grass 17·0°. The minimum on the grass was below 32° on 24 nights. The total amount of sunshine recorded was 101·0 hours, the greatest daily amount being 9·0 hours on the 20th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·4. Rain or snow fell on 20 days. The rain-fall measured 1·945 inches; the greatest amount in 24 hours was ·320 inch on the 9th.

March.—The mean height of the barometer during this month was 30·025 inches; the highest reading (30·495 inches) was on the 19th, at 9 P.M., wind N.; and the lowest (29·078 inches) on the 11th, at 9 A.M., wind S.W. The mean temperature of the air was 48·6°; the maximum registered was 57·7°, and the minimum 26·5°. The 6th and 16th were the warmest days, and the 30th was the coldest night. The mean of the dry bulb was 42·6°, and of the wet bulb 40·4°. The maximum heat in sun was 103·7°, and the minimum on the grass 19·4°. The minimum on the grass was below 32° on 18 nights. The total amount of sunshine recorded was 116·5 hours, the greatest daily amount being 10·3 hours on the 28th. The maximum ozone was 0·9, the minimum 0·1, and the mean 0·5. Rain or snow fell on 17 days. The rain-fall measured 1·623 inches; the greatest amount in 24 hours was ·515 inch on the 10th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Sc.D., F.R.S.*

In compiling the following Table (pp. 20, 21), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, sub-urban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind observations at Valencia are based on the records of a standard Robinson anemometer (factor 2.2). Velocities between 13 and 38 miles in the hour have been entered in the Tables as strong winds, velocities of 39 miles in the hour, or above, as gales. At the remaining stations the wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Donaghadee,	Do.
Belfast, Queen's College,	John Wylie, B.A.
Armagh, The Observatory,	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	Meteorological Office.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	J. H. Skerritt, for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Waterford,	J. N. White, Esq.

NOTE.—This table has been constructed for the years 1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1906—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Vaccination less than usual, probably due to severe weather. District healthy.

CARLOW; *Bagenalstown*.—District healthy.

CARLOW; *Borris*.—Sanitary state of the district excellent.

CARLOW; *Clonegall*.—Vaccinations were all deferred during the quarter.

CARLOW; *Fennagh and Myshall*.—Three cases of scarlet fever occurred in my district during the quarter.

CARLOW; *Leighlinbridge*.—District healthy. Vaccination postponed in a good many cases, owing to the children being unfit.

NEW ROSS; *St. Mullins*.—Sanitary state of district excellent.

Dublin County.

BALROTHERY; *Balbriggan*.—District healthy.

DUBLIN SOUTH; *Clondulkin*.—Vaccination postponed in a number of cases owing to colds, &c.

DUBLIN SOUTH; *Crumlin*.—The sanitary condition of the locality is satisfactory, there being no epidemic and very little illness of any kind.

RATHDOWN; *Dundrum and Glencullen No. 1*.—There has been an epidemic of whooping-cough during the quarter. All the cases were mild. During the quarter the result of the Local Government Board inquiry into drainage of district has been made public. The Local Government Board has ordered the Sanitary Authority to provide a proper "main drain" within two years.

Kildare County.

ATHY; *Castledermot*.—Whooping-cough was prevalent during the quarter, which put back the vaccination.

BALTINGLASS; *Baltinglass, No. 2*.—Death of one woman aged 100 years registered during the quarter. Practically all vaccinations postponed to spring and summer months in consequence of severe weather and catarrhal ailments amongst young children.

CELBRIDGE; *Celbridge, W.*—District healthy.

CELBRIDGE; *Kilcock*.—A great number of cases of measles occurred in this district during the quarter just ending. The disease is of an average severe type, but there were no deaths caused by it.

CELBRIDGE; *Maynooth*.—District healthy.

EDENDERRY; *Carbury*.—There were three cases of scarlatina in one house. I could not trace the source of infection but thought it probable it was conveyed from the other side of the county.

EDENDERRY; *Rathangan, No. 1*.—Deaths registered, men aged 90, 83, 79, and 77 (two) years respectively. One death registered from croup, a boy 15 months old; no other case in district.

NAAS; *Ballymore Eustace*.—The district is healthy.

NAAS; *Kildare*.—Of the two females whose deaths were registered during the quarter, one was aged 100 years.

NAAS; *Naas and Carragh, W.*—Vaccination backward owing to the severity of the season. The deaths of two old persons, one 92 years and the other 95 years old were registered during the past quarter.

Kilkenny County.

CALLAN; *Callan, W.*—Whooping-cough has been prevalent and caused one death; two deaths have been registered from malignant disease and six from tuberculous disease.

CASTLECOMER; *Ballyragget.*—Sanitary arrangements very fair. Influenza with pneumonia and pleuro-pneumonia prevalent in electoral division of Ballyragget. Measles prevalent in the electoral division of Attanagh (Firoda).

CASTLECOMER; *Castlecomer, W.*—Notwithstanding that there has been an epidemic of measles in the district during the quarter, up to the present there has not been a fatal case.

KILKENNY; *Gowran.*—Sanitation good.

KILKENNY; *Tullaroan.*—Health of the district very good.

NEW ROSS; *Dysartmoon.*—District healthy.

URLINGFORD; *Urlingford, W.*—Health of the district good and free from epidemics.

WATERFORD; *Kilmakedge.*—One death from cancer of face of seven years. The deaths over 65 were:—males, 67, 75, 75, and 78 years, and females, 68, 70, 73, 74, 75 and 78 years.

WATERFORD; *Ullid.*—Vaccinations postponed during severe weather.

King's County.

BIRR; *Birr, W.*—One death from typhoid fever.

BIRR; *Ferbane.*—Sanitary condition of district fair. The age of one man whose death was registered was given as 105 years. No vaccinations during quarter.

BIRR; *Kinnitty.*—There has been and is still a mild epidemic of measles all over the district; no deaths. Sanitary condition of district fairly good. Some vaccinations had to be postponed owing to epidemic of measles.

EDENDERRY; *Rathangan, No. 2.*—The death of a man aged 62 years, registered from fracture of skull. He was a farm labourer, injury accidental, death supervening fourteen days after. The death of a spinster, aged 41 years, registered from tuberculosis of lungs, duration two years. She had been living as a housekeeper in Co. Carlow until a short time before her death.

MOUNTMELICK; *Clonygowan, No. 2.*—District healthy. Some influenza.

ROSCREA; *Roscrea, No. 2.*—During the latter portion of the quarter there has been a severe outbreak of measles, with bad chest complications. Two deaths registered from this disease. Vaccinations postponed owing to measles.

ROSCREA; *Shinrone.*—District fairly healthy. An outbreak of measles towards end of quarter.

TULLAMORE; *Killoughy.*—Measles prevalent in district during the quarter ended 31st March, 1906. Adults were attacked severely by the disease, but no deaths occurred from it. A death occurred from scirrhus of breast. Two deaths were registered aged over 70 and under 80, three over 80 and under 90, three over 90, and one of 98 years, during quarter. One death from pulmonary tuberculosis was registered.

TULLAMORE; *Philipstown.*—District fairly healthy; no disease. Sanitary arrangements fairly good.

Longford County.

BALLYMAHON; *Abbeyskrule.*—The sanitary arrangements in the district are satisfactory. Mumps and influenza were prevalent during the quarter. Two deaths from phthisis pulmonalis, and one from cancer were registered during the quarter. One death from puerperal fever occurred.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinallee.*—The district is in good sanitary condition and free from any contagious disease.

GRANARD; *Granard, W.*—The district is in good sanitary condition.

GRANARD; *Scrabby, No. 2.*—The district continues in a satisfactory condition. No epidemic

Louth County.

ARDEE; *Castlebellingham.*—District very healthy. Sanitary condition fair.

ARDEE; *Collon, No. 1.*—District healthy.

ARDEE; *Dunleer.*—District healthy.

DROGHEDA; *Termonfeckin.*—Influenza with diseases of the chest and respiratory organs has been rather prevalent during the quarter. Owing to the inclemency of the season and the prevalence of chest affections in young children vaccinations have been postponed until the onset of milder and more propitious weather. Parents are usually reluctant to expose infants in arms to the severe climatic conditions usually prevalent at this time of year by taking them to the vaccination stations.

DUNDALK; *Barronstown.*—Whooping-cough prevalent throughout quarter. District now pretty healthy and free from zymotic disease.

DUNDALK; *Dromiskin.*—One case of diphtheria removed to hospital, otherwise health and sanitation of district good.

DUNDALK; Dundalk, W.—Whooping-cough, the first case of which was noticed on 6th November, was very prevalent during the first two months of quarter, but nearly all traces of the epidemic have now disappeared. No other infectious disease except the one fatal case of diphtheria. District in general very healthy. The water supply to part of the town is somewhat deficient at times and a Local Government Board inquiry was held here on the 2nd inst. with a view to having an extra main pipe laid on to the town from the reservoir.

DUNDALK; Ravensdale.—The district is in an excellent condition as to health save for a few cases of pertussis of a mild type.

Meath County.

ARDEE; Collon, No. 2.—District free from zymotic disease.

ARDEE; Drumcondra.—There was one death registered during the quarter at 104 years.

DROGHEDA; St. Mary's.—The sanitary condition of the district is good. Whooping-cough and measles are very prevalent.

DROGHEDA; Stamullen.—District in a healthy state.

ENDERRERY; Ballyboggan.—There was an epidemic of measles of a mild type; no fatal cases.

KELLS; Kilskeer.—Sanitary condition of district good.

KELLS; Moynalty.—Vaccinations below the average owing to an epidemic of measles in the beginning of the quarter.

KELLS; Nobber.—The district is in its wonted state of healthfulness.

NAVAN; Castletown.—The district for past quarter remarkably healthy; the sanitary arrangements satisfactory. Vaccination in proportion to the population.

OLDCASTLE; Oldcastle, W.—District continues in a satisfactory condition.

TRIM; Athboy.—Sanitary condition of district satisfactory.

TRIM; Innfield.—One death registered of a man aged 96 years. The case of malignant disease registered was also certified as suffering from pulmonary phthisis.

TRIM; Summerhill.—Sanitary condition of district fairly good. Measles prevalent in Rathmolyon division of district, and schools closed. No death has occurred from that cause.

Queen's County.

ABBEYLEIX; Abbeyleix, W.—Sanitary arrangements satisfactory.

ABBEYLEIX; Ballinakill.—Health of district good during the past quarter.

MOUNTMELLOCK; Clonygowan, No. 1. District healthy. Some influenza and bronchial affections.

MOUNTMELLOCK; Mountrath.—One death registered as 100 years of age, believed to be more. I knew him for 40 years and he was always an old man.

ROSCREA; Borris-in-Ossory.—The health of this district has been fair during the past quarter. There was one death from diphtheria, but the disease has disappeared.

Westmeath County.

ATHLONE; Glassan.—Deaths of old people 97, 94, 84, 80 (two), 78, 77, 75, 73, 66, and 65 years respectively.

BALLYMAHON; Ballymore.—Owing to the coldness of weather there were no vaccinations.

MULLINGAR; Ballymacarrigy.—Cold weather and epidemic of measles account for diminution of vaccinations. Total number of deaths 15, of these nine were over 60 years, and of the other six, three are claimed for pulmonary tuberculosis, making thus 50 per cent. of recorded deaths in adolescents.

MULLINGAR; Castletown Geoghegan.—Owing to an epidemic of measles, vaccinations were practically postponed during quarter.

MULLINGAR; Killucan.—Measles during the past four months prevalent; vaccinations postponed in consequence. The health of the district poor, but the sanitary state good.

MULLINGAR; Milltown.—There was one case of diphtheria reported during last quarter, and one case of erysipelas with fatal result. There is a remarkable falling-off in the births, and an increase of the deaths registered last quarter compared with the corresponding quarter of 1905, and the Medical Officer reports the contemplated emigration to America of several—about 30—young people of both sexes next month. Vaccinations nil, owing to the severity of the weather for the past five or six weeks. There were two deaths from cancer and one from tuberculosis.

MULLINGAR; Mullingar, W.—A number of children and others suffered from diphtheria; there were also cases of measles and mumps.

MULLINGAR; Multyarnham.—The reason so many deaths were uncertified is owing to three of them being due to accident and the coroner did not think it necessary to hold an inquest.

Wexford County.

ENNISCORTHY; Newtownbarry.—During the winter and early spring no children were presented for vaccination, the weather being too cold.

GOREY; *Camolin*.—The sanitary arrangements of this district are in a satisfactory condition.

GOREY; *Gorey, W.*—The district has been exceptionally free from diseases during the quarter.

NEW ROSS; *Fethard No. 2.*—There were twelve cases of a mild form of scarlatina during quarter.

NEW ROSS; *New Ross, W.*—A few cases of scarlatina occurred, otherwise the district was in a healthy state, except for the large percentage of deaths from tuberculous disease.

WEXFORD; *Bannow*.—Of the deaths registered of persons "aged 60 years and upwards" five were over 80, and two over 70 and under 80. Whooping-cough was prevalent during the quarter—generally complicated with bronchitis. Owing to the prevalence of whooping-cough and the severity of the weather, vaccination was postponed. It was also considered advisable to temporarily close two schools.

WEXFORD; *Broadway*.—Acute pneumonia prevalent.

WEXFORD; *Crossabeg*.—Influenza of a mild type prevalent in district during quarter.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W.*—Practically all vaccinations postponed to spring and summer months in consequence of severe weather and catarrhal affections amongst infants and young children.

BALTINGLASS; *Kiltegan*.—The health of the district during quarter was normal. The weather was unsuitable for vaccination.

NAAS; *Blessington*.—The district is healthy, and the sanitary arrangements are improved. One death was registered at the age of 90 years, an old lady of the farming class.

RATHDOWN; *Bray, No. 1.*—Births and deaths about the average.

RATHDOWN; *Delgany*.—The 9 deaths registered in the quarter over 60 years of age were of persons aged 96, 88, 82, 78, 75, 74, 73, 70, and 61 years respectively. The health of the district is good.

RATHDRUM; *Annamoe*.—District healthy during the quarter.

RATHDRUM; *Arklow*.—Deaths were registered during the quarter at 75, 77, 78, 80, 84, 87, and 91 years respectively.

RATHDRUM; *Newcastle*.—The three deaths from cancer could not be traced to heredity; but, in each case, there was the history of accident. Sanitary condition of district not what it should be.

SHILLELAGH; *Tinahely*.—Health of district excellent.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—District maintains its very healthy character. Sanitary state good.

CORROFIN; *Corrofin, W.*—District during quarter very healthy, notwithstanding the unfavourable weather. Influenza of a mild type prevalent during March.

ENNIS; *Crusheen*.—One case of laryngeal diphtheria occurred in February. The child was 3½ years of age. I did not use serum, as death took place in a few hours after my first visit. Death not yet registered.

ENNIS; *Newmarket*.—The district has been in a fairly healthy condition. Mild cases of influenza prevailed and a few cases of diphtheria.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory. Vaccination not attended to.

ENNISTIMON; *Roadford*.—District healthy. Sanitary arrangements satisfactory.

KILLADYSERT; *Labasheeda*.—District healthy.

KILRUSH; *Carrigaholt*.—The health of district continues very good. A few cases of influenza occurred.

KILRUSH; *Craggacknock*.—The case of enteric fever occurred last quarter, but was not registered until this quarter.

KILRUSH; *Kilkee*.—The sanitary state of district fairly good.

KILRUSH; *Kilmihil*.—This district continues in its usual healthy condition.

KILRUSH; *Kilrush, W.*—The district has been healthy.

LIMERICK; *Bridgetown*.—District in a very healthy condition.

LIMERICK; *Coolacasey*.—The sanitary condition of the district is satisfactory.

SCARRIFF; *Anacarriga*.—District healthy.

SCARRIFF; *Mountshannon, W.*—District very healthy.

TULLA; *Quin*.—The sanitary arrangements in the district are very fair. None of the principal epidemic diseases are prevalent.

Cork County and County Borough.

BANDON ; Bandon, W.—A number of vaccinations postponed this quarter owing to a great many children having bronchitis. Four out of the six uncertified deaths were sudden.

BANDON ; Inishannon.—The sanitary condition of district fairly good. Influenza with lung complications has been very prevalent during quarter, especially in March.

BANTRY ; Bantry, W.—Health of district very good. Some cases of typhus occurred in January and February, from which there were three deaths. Two in hospital, and one in patient's house, whose friends would not allow to be removed to hospital. There are now no cases of infectious disease in the district.

BANTRY ; Durrus and Kiltrohane.—Pneumonia very prevalent—all amongst males. Had to postpone vaccination owing to severity of the weather. Registered one death from phthisis (pulmonalis), not hereditary, neglected cold.

BANTRY ; Glengarriff.—District in a fairly sanitary condition. Influenza rather prevalent during the quarter.

BANTRY ; Kealkill.—Sanitary condition of district is fairly good. No infectious disease during quarter.

CASTLETOWN ; Castletown, W.—Vaccination rather neglected during the quarter. District fairly healthy.

CASTLETOWN ; Kilcatherine.—District healthy, but catarrh and inclement weather have retarded vaccination.

CLONAKILTY ; Rosscarbery.—District perfectly healthy.

CORK ; Ballincollig.—District healthy.

CORK ; Carrigaline, No. 1.—District very healthy.

DUNMANWAY ; Ballineen.—I did not vaccinate during the past six months, but will have all children, three months and over, vaccinated at the end of the coming quarter.

DUNMANWAY ; Dunmanway, W.—District healthy. No epidemic prevalent.

FERMOY ; Fermoy, W.—I beg to call attention to eight vaccination defaulters.

FERMOY ; Rathcormack.—There was one case of scarlatina during the quarter ended 31st March. District otherwise healthy since last report.

KANTURK ; Kanturk, W.—Whooping-cough prevalent in the Banteer portion of district. Otherwise district healthy.

KILMALLOCK ; Charleville.—The district is healthy. We have no epidemic of any kind.

KINSALE ; Ballyfeard.—Health of district good. One death occurred at 75, three at 80, one at 86, and one at 98 years of age.

MACROOM ; Slieveveagh.—There have been very few vaccinations during the quarter. No reason can be assigned.

MALLOW ; Ballyclogh.—District healthy.

MALLOW ; Raham.—District free from any infectious disease, except one case of puerperal fever.

MIDDLETON ; Aghada.—One case of tetanus registered.

MIDDLETON ; Middleton, No. 2.—District healthy.

MITCHELSTOWN ; Mitchelstown, No. 1. W.—No vaccinations owing to epidemic of varicella.

SKIBBEREEN ; Skibbereen, W.—District free from diseases of an infectious character.

SKIBBEREEN ; Unionhall.—The district is free from infectious disease.

SKULL ; Goleen.—The district is in a good sanitary condition, but there is practically no water supply for one village.

SKULL ; Skull, W.—Of the 17 deaths 60 years and upwards registered during the quarter, 5 were aged 60 and under 70, 4 were 70 and under 80, 5 were 80 and under 90, and 3 were over 90 years. Four deaths were registered from pulmonary tuberculosis. Very few vaccinations owing to the cold and wet prevailing. With the exception of a few cases of influenza there was no epidemic during the past quarter.

Kerry County.

CAHERSIVEEN ; Caher, W.—The district is in good sanitary condition.

CAHERSIVEEN ; Darrynane.—The district is in a healthy state and free at present from any infectious disease; the sanitary condition is fairly satisfactory.

CAHERSIVEEN ; Glanbehy.—The sanitary state of the district is good.

CAHERSIVEEN ; Valencia.—District healthy.

DINGLE ; Anascaul.—Owing to the severity of the weather during the past quarter it was impossible to comply with the vaccination laws.

DINGLE ; Castlegregory.—The district is in a healthy condition at present.

DINGLE ; Dingle, W.—Several cases of typhus have appeared in the district. From one village nine cases were sent to the Fever Hospital. A number of people are suffering from bronchial affections caused by the severe east winds.

DINGLE ; Ventry.—A few cases of typhus in the district.

KENMARE; *Kenmare, W.*—Three cases of diphtheria during quarter.

KENMARE; *Kilgarvan*—Vaccination had to be abandoned during this quarter owing to inclement weather.

KILLARNEY; *Coom*.—Pneumonia and influenza prevalent during the quarter. One fatal case of puerperal septicæmia, the result of premature birth. Sanitary state of district fairly good. Mumps also prevalent.

KILLARNEY; *Killarney, No. 1, W.*—No infectious disease in district during quarter. No vaccination owing to cold, wet weather.

KILLARNEY; *Killarney, No. 2.*—During the quarter there was a slight epidemic of whooping-cough. Latterly mumps was very prevalent. Otherwise the district was very healthy. Vaccination was backward owing to the severity of the weather, but now that that obstacle is removed defaulters are coming in.

KILLARNEY; *Milltown*.—District healthy. Sanitary condition good. Only one case of typhoid fever which did not spread.

KILLARNEY; *Molahiffe*.—District healthy. Vaccination backward owing to the inclemency of the weather.

LISTOWEL; *Ballyhorgan*.—Sanitary state of district good.

LISTOWEL; *Ballylongford*.—District free from contagious disease. Sanitary condition requires improvement. Postponed vaccinations for quarter. Registered the death of one old woman aged 100 years.

TRALEE; *Brosna, No. 1.*—District healthy.

TRALEE; *Castlemaine*.—An outbreak of typhoid fever in the district for the past two months; 4 patients removed to hospital. One death from typhoid fever not registered. No fresh cases.

TRALEE; *Kilgobban*.—Severe weather during the past quarter prevented vaccination.

Limerick County and County Borough.

CROOM; *Castletown*.—There were three cases of enteric fever in this district during last quarter. They each arose from local causes, and were unconnected with each other, occurring many miles apart.

KILMALLOCK; *Bruree*.—There were several cases of influenza, with pulmonary complications in many instances (pneumonia and broncho-pneumonia) with marked depression. The five deaths registered of tuberculous disease, were all pulmonary. Registered one death of a female 95 years.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilmallock, W.*—Epidemic bronchitis of a mild type prevalent during quarter.

LIMERICK; *Annacotty*.—Sanitary arrangements fair. District healthy.

LIMERICK; *Limerick, No. 3.*—Tuberculous disease caused fifteen deaths, including tuberculous meningitis, two; cancer, one; sarcoma, one; croup, one; diphtheria, one; senile decay, three; broncho-pneumonia, three; bronchitis, fourteen; goitre, one; gangrene, one, and convulsions, nine. Otherwise health of district good. Sanitary arrangements fairly satisfactory.

LISTOWEL; *Glin*.—I very much regret having to report a serious outbreak of typhoid fever in my district during the quarter just ended. There were thirty six cases in all of the disease. Save and except four cases all were removed to the Listowel Fever Hospital. Up to the time of writing this return there were only two deaths, and these occurred in the hospital. I am happy to be in a position to state that the disease is beginning to disappear as there were no fresh cases for a week. I was obliged to postpone the vaccination of children in consequence of the presence of the epidemic.

MITCHELSTOWN; *Galbally*.—District exceptionally healthy. Vaccination postponed partly owing to inclemency of weather and partly owing to the prevalence of a form of bronchial catarrh amongst children.

MITCHELSTOWN; *Mitchelstown, No. 2.*—No vaccination owing to variella in the district.

NEWCASTLE; *Ardagh*.—The sanitary state of district pretty fair. No epidemic. Some cases of influenza.

NEWCASTLE; *Newcastle, W.*—District healthy.

RATHKEALE; *Askeaton*.—During the past quarter this district was free from all contagious diseases.

RATHKEALE; *Pallaskenry*.—Sanitary arrangements in the district are fairly good.

RATHKEALE; *Rathkeale, No. 1, W.*—The district was particularly free from disease for the quarter in spite of the very inclement weather. Of the eight deaths in the Dispensary district proper, that is, outside the Union Hospital, one died of puerperal sepsis, aged 34, and one of pulmonary tuberculosis, aged 32. Three deaths of infants prematurely born under two days, and three of persons aged 84, 74, and 70 respectively, of senile decay were registered. The only other case of epidemic disease was one of scarlatina, now well.

RATHKEALE; Rathkeale, No. 2.—My district was free from all contagious diseases during the quarter with the exception of scarlatina in one family (five) which were removed to hospital.

TIPPERARY; Grean.—Five cases of enteric fever and two cases of diphtheria occurred during the quarter.

Tipperary County, North Riding.

BORRISOKANE; Cloughjordan.—One case of diphtheria. Owing to severity of weather and measles prevailing in this district the attendance for vaccination has been very small.

BORRISOKANE; Terryglass.—Measles and influenza prevalent in the district.

NENAGH; Nenagh, W.—District generally healthy.

NENAGH; Newport.—District healthy.

NENAGH; Portroe.—District healthy.

THURLES; Moynes.—District healthy. No disease.

Tipperary County, South Riding.

CALLAN; Ballingarry.—The health of the district was good.

CALLAN; Mullinahone.—Sanitary condition of district fairly good. No form of any of the contagious diseases occurred during quarter.

CASHEL; Kilpatrick.—District free from epidemic disease except one case of diphtheria which terminated fatally.

CLOGHEEN; Caher.—The district is in a very healthy state.

CLOGHEEN; Clogheen, W.—During the quarter there occurred four cases of enteric fever in the town of Clogheen. Probable causes were insanitary surroundings and drinking impure water. All cases were removed to hospital. There has been no recent case. Sanitation and water supply have been attended to in the meantime.

CLONMEL; Kilsheelan, No. 1.—Influenza of a mild type prevailed. Two deaths are attributable to this cause. One death occurred in the case of an infant from diarrhoea brought on by improper feeding.

TIPPERARY; Bansha.—District healthy.

TIPPERARY; Cappagh.—The district is healthy.

TIPPERARY; Tipperary, W.—The district has been in a very healthy condition during quarter.

URLINGFORD; Kilcooly.—The district has been healthy during past quarter. Sanitary arrangements good.

Waterford County and County Borough.

CLONMEL; Kilsheelan, No. 2.—Influenza of a mild type prevailed during the quarter.

DUNGARVAN; Dungarvan, W.—District healthy during past quarter. I registered the death of a man aged 113 years, who died in the Union Hospital, and whom persons now far advanced in years remember as an old man when they were boys.

DUNGARVAN; Seskinan.—One case of typhus in quarter.

DUNGARVAN; Whitechurch.—Pneumonia very prevalent during the quarter.

KILMATHOMAS; Bunmahon.—The sanitary arrangements are fairly good. Influenza was prevalent during the quarter, complicated with pulmonary trouble.

LISMORE; Tallow.—District healthy. Sanitary condition good.

WATERFORD; Waterford Urban, No. 1, W.—The sanitary arrangements in parts of the district are bad, many houses being supplied with ill-constructed and ill-kept privies. There are some unhealthy tenement houses—overcrowded and filthy. The district is free from infectious disease except tuberculosis, which is very prevalent and widely diffused. This is evidenced by the fact that 33 out of 118 deaths are certified as due to tuberculosis.

WATERFORD; Woodstown.—The health of the district is good, and the district is in good sanitary order.

YOUGHAL; Ardmore.—A few cases of scarlatina but no death.

YOUGHAL; Clashmore.—Vaccination postponed owing to inclemency of weather.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Doagh.—There were many cases of whooping-cough and influenza.

ANTRIM; Randalstown.—Of the 28 deaths registered during the quarter, malignant disease was the registered cause of 7.

ANTRIM; Templepatrick.—The sanitary arrangements of the district (with few exceptions) are good.

BALLYMENA; Ahoghill.—District healthy. One case of typhoid fever of a sporadic nature. Two deaths of persons over 90 years.

BALLYMENA; Ballymena, W.—Town and district healthy.

BALLYMENA; Broughshane.—The health of district very good during the quarter. No zymotic disease.

BALLYMENA; Clogh.—District fairly healthy. Sanitary arrangements good.

BALLYMENA; Galgorm.—District free from zymotic disease. Death rate low for the season of the year.

BALLYMENA; Portlengone.—Health of the district is good.

BALLYMENA; Toome.—Health of the district satisfactory.

BALLYMONEY; Bushmills.—One death well authenticated at 107½ years. She was born on Pike Saturday, 1798, in Craigh-boney.

LISBURN; Dunmurry.—The sanitary condition of this district is very good. No epidemic of any kind.

LISBURN; Glenavy.—Deaths this quarter about the average. No epidemic during the past three months. Present severe weather is telling on aged and infirm.

LISBURN; Knocknadona.—The sanitary condition of this district is good.

Armagh County.

ARMAGH; Armagh, W.—Three of the deaths of children under one year of age were registered as premature.

ARMAGH; Loughgall.—During the quarter there were a few isolated cases of diphtheria and scarlatina of a mild form.

ARMAGH; Markethill.—Two cases of diphtheria were reported in the district. They were treated by serum at home, and the other children injected, and it did not spread to any other members of the family or in the district.

ARMAGH; Rich Hill.—There were three cases of puerperal fever in the district this quarter, resulting in two deaths.

CASTLEBLAYNEY; Crossmaglen No. 1.—Measles, whooping-cough, and scarlet fever have been prevalent during the past three months. It was almost impossible for young children to be brought a distance for vaccination on account of the severe weather.

LURGAN; Lurgan, No. 1, W.—Vaccination was practically suspended during February and March in consequence of an outbreak of measles, resulting in 9 deaths. The epidemic is now over.

LURGAN; Lurgan, No. 2.—This district is in a good sanitary condition, and free from any infectious disease.

NEWRY; Mullaghglass.—Had three cases of diphtheria; all removed to hospital and recovered. District otherwise healthy.

Belfast County Borough.

BELFAST; Belfast Urban, No. 11.—The health of the district during the quarter has been very satisfactory.

Cavan County.

BALLIEBOROUGH; Bailieborough, W.—District very healthy.

BALLIEBOROUGH; Termon.—The sanitary condition of the district is good.

CAVAN; Ballyhaise.—One case of scarlatina and one of diphtheria during quarter. There was no spread of the diseases.

CAVAN; Bellanagh.—Sanitary condition of district fair. A mild form of scarlet fever prevailed during early part of the quarter.

CAVAN; Killashandra.—No epidemic during the quarter. District healthy.

COOTEHILL; Cootehill, W.—There was an epidemic of measles during the quarter.

COOTEHILL; Tullyvin.—District healthy. Of those whose deaths were registered during the quarter, 71 per cent. had reached the age of 60 years or over, 35 per cent. being 80 years or over—one death being registered at 95 years. Of the births registered 68 per cent. were males.

ENNISKILLEN; Holywell, No. 2.—Owing to the severity of the weather, primary vaccination is backward this quarter. Phthisis is on the increase. Three deaths were registered from that disease during the quarter.

GRANARD; Scrabby, No. 1.—Sanitary state of district satisfactory.

OLDCASTLE; Ballyjamesduff.—District healthy.

OLDCASTLE; Virginia.—District healthy and free from zymotic disease.

Donegal County.

BALLYSHANNON; Ballintra.—Sanitary condition of district fairly good.

BALLYSHANNON; Ballyshannon, W.—There are many vaccination defaulters in the district.

DONEGAL; Donegal, W.—District healthy.

DONEGAL; Dunkineely.—District healthy, and in fair sanitary condition.

DONEGAL; Mountcharles.—District healthy except for an epidemic of whooping-cough.

DONEGAL; Pettigoe.—Diseases of respiratory organs prevalent.

DUNFANAGHY; Crossroads.—Measles of a severe type was prevalent during the quarter. Five deaths from the disease were registered. Vaccinations were postponed during the quarter on account of the measles.

GLENTIES; Ardara.—There have been five cases of membranous croup in the district during the quarter. The sanitary arrangements are undergoing some improvement.

GLENTIES; Carrick.—There is a good deal of scabies among the children of the district, which has prevented vaccination to a certain extent. There has also been an epidemic of mumps. The district is in a fairly good sanitary state.

GLENTIES; Doochary.—District healthy.

GLENTIES; Dunglow, No. 1.—There was an epidemic of measles during the quarter in the district. This was generally of a mild type; the five cases registered as dying of measles were uncertified. All vaccinations were postponed owing to the epidemic.

GLENTIES; Glenties, W.—The sanitary condition of this district is satisfactory.

GLENTIES; Killybegs.—On the whole, sanitary condition is satisfactory. There was an outbreak of parotitis in one part of district. This was of a mild character.

INISHOWEN; Carndonagh, W.—The district has been fairly healthy during the quarter. There were two cases of enteric fever imported into the district during the quarter.

INISHOWEN; Clonmany.—Pneumonia prevalent during quarter. Sanitary state of district fairly good.

INISHOWEN; Malin.—District healthy.

INISHOWEN; Moville.—District healthy at present.

LETTERKENNY; Church Hill.—District healthy; no epidemic.

MILLFORD; Fanad.—An outbreak of diphtheria occurred in portion of the district during past quarter. There were three deaths from same, which have not as yet been registered.

MILLFORD; Rathmullan.—There was one case of diphtheria during the quarter, which did well after serum treatment. District has been very healthy.

STRABANE; Raphoe.—Sanitary arrangements satisfactory. Influenza prevalent; many cases of acute pneumonia.

STRANORLAR; Cloghan.—Sanitary arrangements satisfactory.

STRANORLAR; Stranorlar, W.—Two towns in my district are badly in need of a water supply. I am not without hopes but that the matter will yet be taken up in a practical way.

Down County.

BANBRIDGE; Ballyward.—District in fair sanitary state. A good many cases of pneumonia and bronchitis owing to the very cold weather.

BANBRIDGE; Banbridge, W.—One death registered at the age of 104 years. The district is fairly healthy. Only 8 cases of infectious disease notified this quarter as compared with 15 for the corresponding quarter of last year.

BANBRIDGE; Loughbrickland.—Sanitary arrangements in the district are good.

DOWNPATRICK; Ballynahinch.—Influenza has been very prevalent in the district during the quarter. There were also a few cases of diphtheria.

DOWNPATRICK; Downpatrick, W.—Seven deaths attributed to influenza. The case (death) of whooping-cough was imported in a moribund condition from Belfast, and died three days after coming to district. The case (death) of diphtheria came to workhouse from Portaferry district in a moribund condition.

DOWNPATRICK; Killyleagh.—The health of the district is excellent. The death rate has been low for the season. I have registered 21 deaths aged 60 years and upwards; of these 3 were between 60 years and 70 years, 8 between 70 and 80, 8 between 80 and 90, and 2 aged 90 years and upwards. There is no epidemic in any part of the district. The cases of influenza that I have seen have been milder in type than in former years. The water supply of one village is in an unsatisfactory state.

DOWNPATRICK; Portaferry.—Two cases of diphtheria occurred during the quarter, one of which died in district hospital. Influenza in a mild form was prevalent.

KILKEEL; Kilkeel, No. 2, W.—One case registered of the death of a man aged 108 years. He left this country at 10 years of age, and returned when 18. He lived 80 years in house he died in. Health of district good.

LISBURN; Annahilt.—Health of district good.

LISBURN; Drumbeg.—Births about the average. Deaths much above the average. Influenza prevalent during March.

LISBURN; Saintfield.—The health of the district for the past quarter has been fairly good. Some influenza of a mild sort.

LURGAN; Moira.—The death rate is extraordinarily high, being more than twice the usual number. Yet there is nothing to account for this, neither epidemic nor severe weather.

LURGAN; Waringstown.—Measles prevalent in the district at the present time. Otherwise the district is healthy.

NEWRY; Donaghmore.—Never knew of so little sickness. Sanitary arrangements good.

NEWRY; Rathfriland.—Scarlatina has abated.

NEWTOWNARDS; Bangor.—Sanitary arrangements very good. General health good. Vaccination well carried out.

NEWTOWNARDS; Comber.—Scarlatina, although slight, is very prevalent in the district, and I believe is spread through cases not being reported which spread the infection all round.

NEWTOWNARDS; Greyabbey.—Births and deaths about average. Several (6) deaths due to influenza. No epidemic now in the district.

NEWTOWNARDS; Kilnood.—Influenza very prevalent. Of the 19 deaths registered 8 were over 80 years of age.

NEWTOWNARDS; Newtownards, W.—There has been an epidemic of measles in the district, and a vast number of children have suffered from the disease. Whooping-cough has also been very prevalent. It is exceedingly difficult to prevent the spread of these diseases among the working classes. The people seem to have no desire to take the most ordinary precautions. They seem to have an idea that every child must take these diseases, and that there is no good in trying to prevent them. Twenty-two deaths from measles and 9 from whooping-cough were registered during the quarter. The chief sanitary defect here is the want of pure water and sewers. We hope soon to have both.

CLONES; Rosslea.—Number of vaccinations small, probably owing to severity of weather during quarter.

ENNISKILLEN; Enniskillen, W.—Sanitation of district fairly good.

ENNISKILLEN; Florencecourt.—Measles was prevalent in the beginning of quarter, but no deaths occurred from the disease. Sanitary condition of district fairly satisfactory.

ENNISKILLEN; Holywell, No. 1.—The sanitary condition of the district is fairly good. No epidemic disease.

IRVINESTOWN; Ederney.—Two cases of suicide during quarter. One from rat poison, the other by cutting the femoral artery with a razor.

LISNASKEA; Derrylin.—Whooping-cough and influenza were present in the district during the quarter. Tuberculous diseases are never absent.

LISNASKEA; Lisnaskea, W.—Sanitary state of district fair. No epidemic disease prevalent during quarter.

Londonderry County and County Borough.

COLERAINE; Aghadowey.—District healthy.

COLERAINE; Garvaghy.—Whooping-cough has been prevalent, but type mild and few complications.

COLERAINE; Kilrea.—District healthy. Three deaths occurred from scarlatina in the first month of the quarter, but as strict precautionary measures were taken, there was no further spread of the disease.

COLERAINE; Portstewart.—There have been no epidemic diseases in this district (not even influenza) during the past quarter. There have been more than three times as many births as deaths.

LIMAVADY; Bellarena.—Whooping-cough has been prevalent in the district throughout the quarter.

LIMAVADY; Dungiven.—Sanitary arrangements satisfactory. Vaccination about average. Mortality under the average, majority being due to senility. One death from cancer of neck. No heredity can be ascertained.

LIMAVADY; Limavady, W.—There has been an epidemic of whooping-cough during the quarter, but no deaths registered from that disease. Chest and rheumatic affections very frequent.

LONDONDERRY; Waterside Urban, W.—On the whole a healthy quarter. Whooping-cough very prevalent. Other zymotic diseases very rare. One death recorded at 102 years, age verified.

MAGHERAFELT; Magherafelt, W.—Influenza has been very prevalent in this district. One death was registered in this quarter of a person whose age was 101 years. The daughter states that her brother, who is the eldest, is over 70 years of age. The daughter who registered the death says she had her living with her for 7 years, and she always stated she was over 100 years of age. The district is in a good sanitary condition.

MAGHERAFELT; Moneymore.—There is a high death-rate. A severe form of influenza prevalent during March. One death took place from scarlatina. Rest of family removed to hospital, where one died. No further spread of disease. One case of diphtheria occurred which was isolated, and there was no other person affected. District in a fairly healthy state.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W.—Weather very cold. Vaccination postponed in consequence. One death attributed to measles, the source of which cannot be traced.

CARRICKMACROSS; Donaghmoyne.—Whooping-cough in one end of district during quarter and accounts for two uncertified deaths. No cases came under my notice as Medical Officer. Mortality higher this quarter than many previously

CASTLEBLAYNEY; Ballybay.—There has been an epidemic of measles, also scarlatina. Vaccination badly attended to.

CASTLEBLAYNEY; Castleblayney, W.—The number of children presented for vaccination during the quarter is small owing to the fact that scarlatina, measles, whooping-cough, and influenza prevailed to such an extent as to deter parents from bringing their children to be vaccinated. As these diseases are subsiding, I shall endeavour to have all that are in a fit state vaccinated early in the ensuing quarter.

CASTLEBLAYNEY; Crossmaglen, No 2.—The severe weather prevented the parents of children from having the children vaccinated.

COOTEHILL; Dawsongrove.—The sanitary condition of the district is fairly good. Measles has been prevalent during the quarter.

COOTEHILL; Drum, No. 1.—The district is fairly healthy. There were some cases of broncho-pneumonia during the last month, three of which, occurring in people advanced in years, proved fatal.

MONAGHAN; Castleshane.—There has been an epidemic of measles. District in good sanitary condition.

MONAGHAN; Emysale.—Sanitary state of district very good. Measles with complications very prevalent. One case of diphtheria—removed to hospital and recovered.

MONAGHAN; Kilmore.—Vaccination largely postponed, owing to weather and an epidemic of measles.

MONAGHAN; Monaghan, W.—The sanitary condition of this district remains satisfactory. There has been a slight epidemic of influenza for the past month but without fatal results.

MONAGHAN; Scotstown.—There has been an outbreak of measles in the district during the quarter, with five deaths. Otherwise its sanitary condition is satisfactory.

Tyrone County.

CASTLEDERG; Castlederg, W.—Sanitary state of district satisfactory. Measles very prevalent past quarter; only one death.

CASTLEDERG; Drumquin.—The sanitary condition of the district is satisfactory. No infectious disease of any sort during the quarter.

CASTLEDERG; Killeter.—State of district healthy. One death from cancer registered during quarter.

CLOGHER; Aghnacloy.—District free from infectious disease, except a few cases of measles.

CLOGHER; Ballygawley.—Epidemics of measles and mumps prevailed during the quarter, in consequence of which vaccination was postponed in many cases. One death registered at 100 years.

CLOGHER; Fivemiletown.—Having regard to the time of year, the health of the district was pretty good during the quarter. There were a few mild cases of measles and also some cases of influenza.

COOKSTOWN; Pomeroy.—District is sanitary and healthy with the exception of a slight epidemic of influenza.

COOKSTOWN; Stewartstown.—There have been about 1,000 cases of influenza during quarter.

DUNGANNON; Caledon and Ballymagran.—Public health of this district good. Sanitary arrangements fairly satisfactory.

DUNGANNON; Clonavaddy.—Sanitary arrangements good.

DUNGANNON; Coal Island.—Three cases of diphtheria in February in one Parish; two cases isolated; the third removed to hospital; all recovered. A child from an infected house was attending school, which school the above-mentioned children also attended. The school was closed for a time, and disinfected. Influenza and mumps have been prevalent over almost all the district during the quarter. No deaths from cancer.

IRVINESTOWN; Trillick.—There is no place in the union to send those suffering from phthisis. There were three deaths from this disease during the past quarter. The other deaths were from cancer and old age. The want of pure water is again apparent.

OMAGH; Drumquin.—The sanitary arrangements in the district are satisfactory. None of the principal epidemic or other diseases are, at present, prevalent.

OMAGH; Fintona.—The health of the district has been good during the past quarter. The majority of the deaths registered were of old persons from 70 to 96 years of age. The sanitary arrangements are satisfactory.

OMAGH; Gortin.—In my return there are five deaths from enteric fever registered. There may be one more to be

registered still. The epidemic reported has now ceased. Influenza is prevalent at present, pneumonia and pleurisy complicating in many cases. The water supply of one village is in the same wretched condition as previously reported.

OMAGH; *Omagh No. 1, W.*—Sanitary condition of rural district fair. Sanitary condition of urban district much improved. New water scheme for urban district completed. Measles has been very prevalent; no fatal cases recorded. The increase of typhoid fever in this district is only apparent. It is due to the epidemic in another District, whence the patients were removed to Workhouse hospital. One case of scarlatina ended fatally in the District Asylum.

OMAGH; *Omagh, No. 2.*—The district is in good sanitary order. No epidemic of any kind.

OMAGH; *Sixmilecross.*—The sanitary arrangements in both villages and surrounding country are very satisfactory with the exception of a sewer in one town, which I have reported on twice.

STRABANE; *Newtownstewart.*—Of the six uncertified deaths two were of those in a position to pay for medical attendance; of the other four one was sudden, the doctor arriving after death, and three of children respectively five minutes, two days, and three days old, either prematurely born or so weak from birth that no hope was entertained of their survival.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Kiltormer.*—A few cases of measles in one corner of the district of a mild type.

BALLINASLOE; *Laurencetown.*—Two deaths were registered of persons aged 98 and 92 years respectively.

CLIFDEN; *Roundstone, No. 1.*—A few cases of mild measles appeared during the early part of the quarter, and several cases of influenza during the two latter months.

GALWAY; *Galway, No. 3 (Arran).*—District very healthy for the time of year.

GALWAY; *Spiddle.*—Health of district good.

GALWAY; *Turloughmore.*—A large number of cases of eczema.

GLENNAMADDY; *Dunmore.*—Vaccination postponed generally.

GLENNAMADDY; *Glennamaddy, W.*—A severe attack of measles, necessitating the closing of three schools in the district has occurred during the quarter. The sanitary condition of the district is fairly good, but the old habit of keeping manure heaps too close to the dwellings still prevails.

GORT, *Ardrahan.*—Of four deaths from tubercle—two were of a mother and daughter from a house that in three previous years also gave two victims to this scourge: of remaining two, one was sequent to pleurisy with effusion. The fourth was in a youth who four years back I treated for pneumonia, in a house where one sister died of tuberculous meningitis, and was followed by a second dying of tuberculous disease of lungs. This quarter I have had eight cases under treatment for tuberculous disease of lungs, the sputum of all showing the characteristic tubercle bacilli. In one the disease is chronic with periods of latency. The remaining seven have originated within six months. In two the primary lesion was pleurisy with effusion. These have improved under treatment so that disease seems quiescent. Of remaining five, one was a contact case from "a consumptive" sleeping in same room, and not counted in above eight. One was sequel to a last years pneumonia, one to long continued dyspepsia and loss of nutrition. One in a youth giving a previous history of mental disease, and one in which I have not found the leading up cause. The patients come from the comfortable farming class. Box feather beds, small rooms, damp floors, poky-hole windows on one side of the room, condition ill-ventilated sleeping places—a cause common to all. The very poor seem to be free from the disease.

GORT; *Gort, W.*—The district has been free from dangerously infectious disease during quarter.

GORT; *Kinvarra.*—The health of the district is generally good; pneumonia, however, occurred almost in epidemic form, particularly in one village.

LOUGHREA; *Athenry.*—The sanitary condition of the district appears to be good. Parents have an objection to bring their children for vaccination at this period of the year, and consequently the number vaccinated is not up to the average.

LOUGHREA; *Bullaun.*—Six out of the nine deaths registered were of persons aged over 60 years, one being registered at 87 years.

MOUNT BELLEW; *Mount Bellew, W.*—No vaccinations during quarter.

OUGHTERARD; *Cloonbur, No. 2.*—Health of district good.

OUGHTERARD; *Oughterard, W.*—No deaths from cancer registered during the quarter.

PORTUMNA; *Portumna No. 1, W.*—The number of deaths excluding those due to old age is exceedingly small.

PORTUMNA; *Portumna No. 2.*—No vaccinations (winter months).

TUAM; *Abbey.*—The district is clean and in a very healthy condition.

Leitrim County.

CARRICK-ON-SHANNON; Drumshanbo.—The district is in a very fair sanitary condition. Eight cases of enteric fever occurred during the quarter.

MANORHAMILTON; Drumahaire.—The sewerage of one village is still very bad.

MANORHAMILTON; Drumkeeran.—District healthy. No epidemic except some cases of influenza. Sanitation of district fairly good.

MOHILL; Carrigallen.—The health of the district has been good during the quarter. The sanitary condition is fairly good. Of the deaths registered nine were of persons over 60 years, viz.—three of 70, and one each of 75, 80, 81, 95, 96 and 98 years respectively.

MOHILL; Mohill, W.—The district is fairly healthy.

MOHILL; Rinn.—The district is in a healthy condition, free from all contagious disease.

MOHILL; Rowan.—There have been a few cases of typhoid fever, not due to any defective sanitation in the house where it occurred, but carried in from outside; there were no deaths, and I now consider the disease wiped out.

Mayo County.

BALLINA; Ballina, W.—There was an outbreak of typhus in the town, about 25 cases in all, but I think it is now stamped out.

BALLINA; Crossmolina.—District in fairly good sanitary condition, and quite free from infectious disease. Parents are averse to bringing their children to dispensary for vaccination during winter and early spring months, and the vaccination laws need enforcing.

BALLINROBE; Cappaghduff.—Sanitary arrangements good. No infectious diseases.

BALLINROBE; Cong.—Health of district exceptionally good.

BALLINROBE; Hollymount.—Births under, and deaths about the average. Owing to bad weather and catarrhal affections in children there were few vaccinations. There were many cases of influenza and chest affections, otherwise the general health of the people was good.

BELMULLET; Bangor.—During quarter just ended there has been an epidemic of measles in this district, which has now subsided. Parents too frequently look upon measles here as a quite harmless disease, and in this way complications do occur. They seem to consider that a case of measles is best treated by some domestic

nostrum, and that medicine is of little avail. Few vaccinations performed owing to measles and severity of weather. There have been three deaths in one family from typhus fever. The house has been disinfected, and the disease apparently stamped out. There has also been one case of typhoid fever of a mild, abortive, or benign form, the symptoms of which disappeared towards end of second week. As regards the sanitary state of district, I am sorry to say that it is not satisfactory.

BELMULLET; Binghamstown, W.—District in a healthy state. Of the deaths registered one was 92, one 90, two 83, one 82, one 80, one 77, and one 76 years.

CASTLEBAR; Castlebar, No. 1, W.—The district is free from all contagious and infectious diseases. Sanitary conditions continue to improve. The Vaccination Act was not complied with because the usual individual postcard reminders were not sent out, and parents have an objection to vaccination this quarter of year on account of skin diseases being prevalent.

CLAREMORRIS; Ballindine.—District healthy; free from zymotic disease.

CLAREMORRIS; Ballyhaunis.—Health of district during the quarter has been satisfactory. Sanitation obviously progressive. One of the deaths was from carcinoma of breast. Of the deaths registered three had attained the respective ages of 80, 82, and 90 years.

KILLALA; Killala, W.—The district was free from infectious disease during the quarter. Vaccination was postponed owing to the severity of the weather.

SWINEFORD; Foxford.—Defective water supply. Measles prevalent but no deaths from it.

SWINEFORD; Kiltamagh.—Although there are but few deaths registered during the quarter I notice that phthisis and almost all other forms of tuberculous disease are exceedingly rife in the district.

WESTPORT; Achill.—General health of district good and no epidemic present. Sanitary state of district fair but will improve as they get out manure. No children presented for vaccination.

WESTPORT; Ballycroy.—Influenza of a very severe type prevalent during quarter among children. A large number of pneumonia cases

WESTPORT; Bundorragha.—Health of district good.

WESTPORT; Louisburgh.—General health of district good; children should be vaccinated at their own homes when it is so desired by parents or persons in charge,

WESTPORT; Newport.—There are many houses in one town without a yard, and therefore no place to deposit their night soil and other refuse. As a consequence there are two or three spots (plague spots I might call them) which are a public nuisance in the centre of town.

WESTPORT; Westport, W.—One case of cancer (of the hand) occurred in a "cancer family." For a brother of the deceased died last year also suffering from cancer of the hand. A niece of the deceased had a cancerous breast removed, and a first cousin died a short time ago of cancer of the eyelid extending over upper part of jaw. All four passed their lives in localities far apart.

Roscommon County.

ATHLONE; Athlone No. 2.—During the quarter there were eight deaths, and of these three were aged over 70, three over 80, and one over 90 years respectively.

ATHLONE; Brideswell.—Influenza and pneumonia very prevalent during quarter.

BOYLE; Ballyfarnan No. 1.—District healthy; no death registered during quarter.

BOYLE; Boyle No. 1, W.—There have been enteric fever and scarlatina in portions of the district, both of a mild type.

BOYLE; Keadew.—Public health very fair. One case of typhoid fever; two cases of scarlet fever during quarter. Vaccination delayed owing to inclement weather.

CARRICK-ON-SHANNON; Aughrim.—Of the 22 deaths registered during the quarter, 13 were of persons aged upwards of 60 years. One death at 101 years was registered. There can be no doubt that the age stated is practically correct. Some cases of diphtheria occurred during the quarter, but the disease is now fortunately stamped out. Three deaths occurred from it, and are as yet unregistered. The sanitary condition of the district generally is not bad.

CASTLEREAGH; Ballaghaderreen.—Sanitary state of the district good; and there has not been any epidemic during the quarter.

CASTLEREAGH; Castlereagh, W.—No vaccinations performed for the quarter.

ROSCOMMON; Athleague.—The severity of past month prevented the performance of the usual number of primary vaccinations.

ROSCOMMON; Roscommon, W.—Influenza was prevalent in district during quarter.

STROKESTOWN; Roosky.—There were two cases of diphtheria. Of the deaths registered sixteen were of persons aged 60 years and upwards, one of whom was aged 92 years, three 87 years each, one 83 years, one 80 years, two 78 years, one 76 years, one 75 years, two 74 years each and one 72 years. Sanitary condition of the district fairly good.

Sligo County.

BOYLE; Ballyfarnan, No. 2.—State of the district generally healthy.

BOYLE; Gurteen.—Some cases of measles, pneumonia, and tonsillitis. Vaccination backward.

DROMORE WEST; Castleconor.—No vaccinations owing to some cases of diphtheria.

DROMORE WEST; Easky, W.—Health of district good; no case of infectious disease during quarter.

SLIGO; Ballymote.—District in a healthy condition and free from infectious and contagious diseases. Vaccinations slow on account of the inclement weather.

SLIGO; Carney, No. 1.—The sanitary condition of the district continues to improve though there is still room for a vast improvement. The general appearance of a good many of the houses is changed for the better.

SLIGO; Carney, No. 2.—District healthy.

SLIGO; Collooney.—District healthy.

SLIGO; Riverstown.—Eleven cases of diphtheria, two cases of typhus, and one mild case of scarlatina; no deaths.

SLIGO; Sligo, No. 1, W.—One death registered during quarter at 115 years of age.

TOBERCURREY; Adare.—The health of the district continues good.

TOBERCURREY; Coolaney.—Sanitary arrangements fairly good.

1906.]
2nd Quarter.

[No. 170.]

QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT
REGISTRARS' DISTRICTS, AND REGISTRARS' DISTRICTS
IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's
District; Persons Vaccinated, &c., &c., &c.*

Marriages:—JAN., FEB., MAR., 1906. **Births & Deaths:**—APR., MAY., JUNE, 1906.

During the quarter ended 30th June last, there were registered in the 827 Registrars' Districts in Ireland 27,067 births—a number equal to an annual birth-rate of 24·7 in every 1,000 of the estimated population*—and 19,732 deaths, representing an annual rate of 18·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 17,168 persons emigrated.

In England last quarter, the birth-rate represented was 27·5 in every 1,000 of the estimated population, and the death-rate 14·5 per 1,000.

The birth-rate in Ireland for the quarter is 0·4 over the average rate for the corresponding quarter of the ten years 1896–1905, and 0·2 above the rate for the second quarter of 1905. The deaths are 126 over those registered in the corresponding quarter of 1905; the death rate is 0·1 above the rate for that quarter, but 0·7 below the average for the second quarter of the ten years 1896–1905.

Compared with those for the corresponding quarter of 1905, the returns of pauperism, furnished by the Local Government Board, show an increase of 543 in the average number of Workhouse inmates on

* See page 182.

Saturdays during the quarter, but a decrease of 1,085* in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years 1896-1905, the number of Workhouse inmates shows an increase of 1,500, and the number of persons on out-door relief a decrease of 2,557, the total under both heads being 1·0 per cent. below the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·7 per cent.

The annual marriage-rate (6·4 per 1,000 of the population) represented by the marriages registered during the first quarter of 1906 is 0·1 above the average rate for the corresponding quarter of the preceding ten years.

TABLE L.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 31st March, 1906, and by the Births and Deaths registered in the Quarter ended 30th June, 1906.

† The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 121.

MARRIAGES.

The marriages (6,981) registered in Ireland during the first quarter of 1906 are equivalent to an annual rate of 6·4 per 1,000 of the estimated population, being 0·5 below the rate for the corresponding quarter of 1905, but 0·1 above the average rate for the first quarter of the ten years 1896–1905. Of the total number of marriages 5,632 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,349 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 6·9 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·8 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·1 above the average rate for the corresponding quarter of the previous ten years, that under the latter shows a decrease of 0·1. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages were celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the ten years 1896–1905, and the average number for that period; also the number registered during the first quarter of 1906.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 27,067—14,062 boys and 13,005 girls—being equal to an annual ratio of 1 in every 40·5, or 24·7 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1896–1905 was 27,120, equivalent to an annual rate of 24·3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24·3 per 1,000 of the population according to the Census of 1901; Munster, 23·1; Ulster, 26·0; and Connaught, 22·1.

The highest county or co. borough birth-rate* is 33·4 for Belfast co. borough, and the lowest 18·9 for Queen's county. Of the intermediate rates the highest five are—Dublin county borough, 32·8; Kildare, 27·1; Down, 25·7; Kerry, 25·6; and Antrim, 25·3. The lowest five are—Roscommon, 19·0; Meath, 19·1; Tipperary, N.R., 19·6; Dublin county, 19·8; and Sligo, 19·9.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 19,732—9,790 males and 9,942 females—affording an annual ratio of 1 in every 55·6, or 18·0 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1896–1905 was 18·7 per 1,000.

The death-rate in Leinster was 18·4 per 1,000 of the population according to the Census of 1901; in Munster, 16·3; in Ulster, 19·7; and in Connaught, 13·8.

The county or co. borough death-rates* range from 12·5 in Mayo to 23·7 in Dublin county borough. Between these rates the lowest five are—King's county, 12·6; Galway, 13·6; Tipperary, N.R., 13·6; Kerry, 13·9; and Meath, 14·1; and the highest five are—Monaghan, 22·9; Armagh, 21·9; Belfast county borough, 21·6; Down, 20·5; and Londonderry county and county borough, 19·5.

* See note (†) on page 100.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1896–1905, and the average number for that period ; also the number registered during the first and second quarters of the year 1906 :—

1906, . . .	24·0	24·7	—	—	—	18·9	18·0	—	—	—

Ages.—Of the 19,732 deaths registered last quarter, 2,185, or 11·1 per cent., were of children under 1 year old ; and 8,585, or 43·5 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 80·7 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 11·5 per cent. of the total deaths registered therein ; in Munster, 10·3 per cent. ; in Ulster, 12·0 per cent. ; and in Connaught, 8·4 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 40·9 per cent. ; in Munster, to 44·6 per cent. ; in Ulster, to 41·7 per cent. ; and in Connaught, to 53·7 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 801, or 18 less than the number registered in the corresponding quarter of 1905, and is equivalent to an annual rate of

* See note (†) on page 109.

0·7 per 1,000 living, being equal to the rate for the second quarter of 1905, and 0·2 below the average rate for the second quarter of the ten years 1896-1905.

Small-pox.—There was no death from small-pox registered during the quarter, nor was the incidence of the disease mentioned by any of the Registrars in the notes appended to their quarterly returns. In each of the three preceding quarters, deaths from small-pox, were 0, 2, and 0.

Measles.—The deaths from measles numbered 121 ; such deaths in the 3 preceding quarters were 115, 69, and 104 respectively. The average mortality from measles for the June quarter of the 5 years preceding was 172. There were 28 deaths from measles registered in the union of Londonderry, and 11 in each of the unions of Dunfanaghy and Mullingar.

Scarlet Fever.—The deaths from scarlet fever declined from 50 registered in the March quarter of the year to 23 in the period under notice ; in each of the September and December quarters of 1905, such deaths were 31 and 52. The average mortality from this disease for the corresponding quarterly period of the 5 years (1901-05) was 40.

Typhus.—The mortality from typhus declined from 28 in the preceding quarter to 24 deaths registered during the period under notice ; these deaths are, however, over the average (19) for the corresponding quarter of the 5 years preceding. In the year 1905, deaths from typhus were registered as follows:—In March quarter 12 deaths, in June quarter 18 deaths, in September quarter 20 deaths, and in December quarter 22 deaths. The deaths in the period under notice occurred as follows—in Carlow union one death ; in Middleton union one death ; in Skibbereen union one death ; in Dingle union 9 deaths ; in Kenmare union one death ; in Tralee union one death ; in Tipperary union one death ; in Glenties union 2 deaths : in Carrickmacross union 2 deaths ; in Omagh union one death ; in Galway union 2 deaths ; in Ballina union one death ; and in Tobereury union one death.

Whooping-cough.—It may be seen in Abstract I. that 286 deaths from whooping-cough were registered for the whole of Ireland in the period under notice ; this figure represents an annual death-rate of 0·3 per 1,000 of the estimated population of the country, and is above the average (262) for the corresponding quarter of the preceding five years. In each of the three preceding quarters such deaths numbered 95, 79, and 195. The mortality from whooping-cough was high in Belfast

county borough, no less than 179 deaths having been registered in that city during the quarter. Of the total deaths from whooping-cough 232 appertained to the province of Ulster, 35 to Leinster, 11 to Munster, and 8 to Connaught. Of the deaths in Ulster 179 occurred in Belfast county borough (as before mentioned), 10 were registered in the union of Limavady, 9 in the union of Coleraine, 8 in the union of Kilkeel, and 6 in the union of Newry.

Diphtheria.—Although the mortality (65 deaths) from diphtheria is slightly in excess of the average (62), it is considerably below that of the March quarter, namely—94 deaths. In the September quarter of 1905, deaths from diphtheria numbered 49, and in the December quarter of that year such deaths were 74 in number. Particulars as to the Registrars' Districts, in which the deaths from diphtheria occurred are given in Abstract III. commencing on page 132.

Enteric Féver.—Regarding the mortality from enteric fever, the deaths registered (88) during the quarter, are well below the average (124), for the June quarter of the 5 years, 1901–5, and below the number (114) registered in the March quarter of the present year. During the year 1905, deaths from enteric fever were registered as follows:—In March quarter 105 deaths; in June quarter 121 deaths; in September quarter 114 deaths; and in December quarter 128 deaths. Of the deaths registered in the period under notice, 10 occurred in Dublin county borough, 15 in Belfast county borough, 10 were in the county of Kerry; of the latter figure 5 occurred in the Union of Tralee, and 4 in the portion of Listowel union situated in the county of Kerry. Of 5 deaths in the county of Cork all were in the union of Cork, containing the county borough of Cork. Of 9 deaths in Tipperary, S.R., 4 deaths were in the union of Clogheen; and of 7 deaths from enteric fever in the county of Tyrone, there were 4 registered in the union of Omagh.

The deaths of 14 persons were classed under the heading pyrexia (origin uncertain) formerly described as simple, continued or ill-defined fever.

Diarrhoeal Diseases.—The deaths recorded as being caused by epidemic diarrhoea, infective enteritis, zymotic enteritis, *diarrhoea*, and dysentery, numbered 180; in the previous quarter such deaths were 184, and the average for the corresponding quarter of the preceding 5 years was 146. In 1905, deaths under the heading diarrhoeal diseases were 130 in the first quarter of the year; 156 in the second quarter; 730 in the third quarter; and 244 in the last quarter of that year. Of

the deaths, 18 were registered in Dublin county borough, 30 in Belfast county borough, 23 in Cork county and county borough, and 12 in the county of Limerick, which contains the county borough of Limerick.

Tuberculous Disease.—The total deaths from all forms of tuberculous disease, as returned by the Registrars was 3,119, representing an annual death rate of 2·84 per 1,000 of the estimated population of Ireland. In each of the 3 preceding quarters the deaths thus returned were 2,348, 2,292 and 2,977. It would appear that nearly 16 per cent. of the deaths registered during the June quarter of 1906 were due to tuberculosis. Several of the Registrars have supplied notes, relating to tuberculous disease. These are printed at the end of this report, and are worthy of careful perusal and thoughtful consideration. Amongst the notes, those of the Registrars of Tullagh, in the union of Skibbereen; of Killarney, No. 2, in the union of Killarney; of Waterford Urban No. 1, in the union of Waterford; and of Kiltamagh district in the union of Swineford, may be read with the view of gaining valuable information concerning the existence of the disease. The Registrar of Kiltamagh district, Swineford union, writes:—"All forms of tuberculous disease are distressingly common; this I believe is due to the fatal habits of the people, having their beds completely excluded from sunlight, with walls and curtains."

Malignant Diseases.—The deaths in the aggregate (as returned by the Registrars), as from sarcoma, carcinoma, cancer (undefined), and malignant disease, amounted to 777, and are equal to an annual death rate of 0·71 per 1,000 of the population of Ireland estimated to the middle of 1906; the rates in the 3 preceding quarterly periods were 0·65, 0·71, and 0·72, respectively. In the Abstracts, the deaths under this heading are given for the whole of Ireland, for the provinces, for the counties, for the unions, and for the registrars' districts. It appears that of the total deaths from malignant diseases, 251 were registered in the province of Leinster, 149 in Munster, 311 in Ulster, and 66 in Connaught.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases:—Chickenpox in 2 districts, measles in 30, scarlet fever in 22, whooping-cough in 34, diphtheria in 14, fever in 24--typhus in 5, enteric in 17, and *pyrexia* (origin uncertain) in 2--influenza in 18, and mumps in one district.

Inquests.—There were 431 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 46 of the total deaths registered.

In Leinster there was 1 inquest to every 40 deaths registered, in Munster 1 to 54, in Ulster 1 to 39, and in Connaught 1 to 131.

Deaths in Public Institutions.—Of the 19,732 deaths registered, 3,958, or 20·1 per cent., occurred in public institutions. In Leinster the percentage was 28·0, in Munster 23·7, in Ulster 14·7, and in Connaught 12·9.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1906, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pyrexia* (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.

[TABLE ✓.]

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 20·4, and the birth-rate 30·1 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 16·6 and the birth-rate 21·8 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·3 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1906, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES;‡ from all forms of TUBERCULOUS DISEASE, and from CANCER, MALIGNANT DISEASE, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 30th June, 1906.

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1906, there were 29,083 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th June last, was 17,168 (9,679 males and 7,489 females), being 4,525 more than in the corresponding quarter of the year 1905, but 53 under the average number for the second quarter of the ten years 1896–1905.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1905 and 1906:—

MONTHS	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1905.	1906.	Increase.	Decrease.	1905.	1906.	Increase.	Decrease.	1905.	1906.	Increase.	Decrease.

Total,	6,907	9,679	2,772	—	5,736	7,489	1,753	—	12,643	17,168*	4,525	—

* Including 14,234 emigrants to the United States of America, viz.:—7,429 in the month of April, 5,027 in May, and 1,778 in June. Of 13,568 steerage passengers, 5,483 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1905 the average price was $6d.$, and in the corresponding quarter of 1896 it was $5d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $14s. 6d.$ per cwt., being the same as the average for the corresponding quarter of the year 1905. In the second quarter of 1896 the average price was $12s. 6d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $3s.$ to $3s. 6d.$ In the second quarter of 1905 the average prices were $2s. 3d.$ to $3s. 2d.$, and the prices for the corresponding quarter of 1896 were $1s. 8d.$ to $2s. 5d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $52s. 6d.$ to $56s. 6d.$ per cwt. In the corresponding quarter of 1905 the average prices were from $52s.$ to $55s. 6d.$, and in the second quarter of 1896 they were from $43s.$ to $55s.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from $18s.$ to $19s.$ per ton nett.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $\pounds 90\frac{15}{16}$, and the lowest $\pounds 87\frac{1}{16}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been $4\frac{1}{2}$ per cent. since the 28th September, 1905, was reduced to 4 per cent. on the 5th April, 1906, again became $4\frac{1}{2}$ per cent. on the 3rd May, but it was reduced to 4 per cent. on the 21st June, at which rate it remained till the end of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1906 was 44,074, or 543 over the average for the corresponding period in 1905.

The average weekly number of persons receiving out-door relief during the quarter was 57,497*, being 1,085 under the average for the second quarter of 1905.

Of the persons receiving in-door relief during the second quarter of 1906, an average number of 1,513 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1905 the average weekly number was 1,475.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1906, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was 3d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phoenix Park, Dublin, during the second quarter of the years 1901–1906, respectively,

* See note (*) on page 100.

† Latitude 53° 21' 48" 25" north; longitude 6° 20' 59" 15" west. Height above the sea 155·3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 116).

The mean height of the barometer during the second quarter of 1906 was 30·026 inches, being ·069 above the average for the corresponding quarter of the five years 1901–1905; the highest reading (30·711 inches) was on the 8th April, at 9 P.M., air calm; and the lowest (29·149 inches) on the 29th April, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 49·6° or 0·4° below the average for the second quarter of the five years, 1901–1905.

The maximum temperature of the air during the quarter was 75·3° and the minimum 25·9°. The maximum heat in sun was 129·7°, and the minimum on the grass 17·9°.

Rain or snow fell on 54 days during the quarter. The rain-fall measured 5·660 inches, being 0·581 inch above the average for the second quarter of the five years 1901–1905. The greatest monthly rain-fall was in May, when 2·545 inches were registered.

The wind blew on 23 days from W., on 14 days from S.W., on 11 days from N., on 7 days each from N.E. and E., on 6 days from N.W., on 5 days each from S.E. and S., and the air was calm on 13 days at 9 A.M.

April.—The mean height of the barometer during this month was 30·110 inches; the highest reading (30·711 inches) was on the 8th at 9 P.M., air calm; and the lowest (29·149 inches) on the 29th, at 9 A.M., wind S.W. The mean temperature of the air was 43·1°, the maximum registered was 63·6°, and the minimum 25·9°. The 12th was the warmest day, and the 19th the coldest night. The mean of the dry bulb was 43·7°, and of the wet bulb 41·2°. The maximum heat in sun was 115·0°, and the minimum on the grass 17·9°. The minimum on the grass was below 32° on 23 nights. The total amount of sunshine recorded was 203·1 hours, the greatest daily amount being 12·7 hours on the 14th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·5. Rain or snow fell on 18 days. The rain-fall measured 1·570 inches; the greatest amount in 24 hours was 0·375 inch on the 24th.

May.—The mean height of the barometer during this month was 29·822 inches; the highest reading (30·144 inches) was on the 13th at 9 P.M., wind S.E., and the lowest (29·428 inches) on the 2nd, at 9 A.M., wind S.E. The mean temperature of the air was 49·2°, the maximum registered was 66·8°, and the minimum 30·4°. The 28th was the warmest day, and the 10th the coldest night. The mean of the dry bulb was 50·8°, and of the wet bulb 48·0°. The maximum heat in sun was 128·5°, and the minimum on the grass 22·2°. The minimum on the grass was below 32° on 12 nights. The total amount of sunshine recorded was 138·1 hours, the greatest daily amount being 13·2 hours on the 7th. The maximum ozone was 0·8, the minimum 0·1, and the mean 0·5. Rain fell on 22 days. The rain-fall measured 2·545 inches; the greatest amount in 24 hours was 0·620 inch on the 19th.

June.—The mean height of the barometer during this month was 30·145 inches; the highest reading (30·393 inches) was on the 4th, at 9 A.M., wind N.N.E.; and the lowest (29·452 inches) on the 1st, at 9 A.M., wind W. The mean temperature of the air was 56·5°; the maximum registered was 75·3°, and the minimum 37·3°. The 24th was the warmest day, and the 30th the coldest night. The mean of the dry bulb was 56·5°, and of the wet bulb 53·7°. The maximum heat in sun was 129·7°, and the minimum on the grass 29·2°. The minimum on the grass was below 32° on 2 nights. The total amount of sunshine recorded was 203·7 hours, the greatest daily amount being 13·7 hours on the 12th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain fell on 14 days. The rain-fall measured 1·545 inches; the greatest amount in 24 hours was 0·300 inch on the 21st.

TABLE VIII.—METEOROLOGICAL OBSERVATIONS taken at the Ordnance Survey Office,* Phoenix Park, Dublin.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Sc.D., F.R.S.*

In compiling the following Table (pp. 118, 119), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind observations at Valencia are based on the records of a standard Robinson anemometer (factor 2.2). Velocities between 13 and 38 miles in the hour have been entered in the Tables as strong winds, velocities of 39 miles in the hour, or above, as gales. At the remaining stations the wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Donaghadee,	Do.
Belfast, Queen's College, . . .	John Wylie, B.A.
Armagh, The Observatory, . . .	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	Meteorological Office.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	J. H. Skerrett, for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Waterford,	J. N. White, Esq.

(a) See note (*), page 121.

* The Registrars' Districts (827 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District. † The details concerning Births and Deaths in the above table for Districts marked thus (+) on pages 133 and 134 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 1st April, 1906, to 30th June, 1906. With the exception of 94 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area," from which he deceased were admitted. ‡ Exclusive of one death in the Rathdown Union Workhouse of a person admitted from Kingstown, to which Urban District it has been assigned. § Formerly described as "Simple Continued Fever."

NOTE.—This table has been constructed for the years 1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1906—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

CARLOW; *Bagenalstown*.—There have been a good many cases of scarlatina during the past three months, but no deaths from the disease.

CARLOW; *Borris*.—District exceptionally healthy.

CARLOW; *Clonegall*.—Birth-rate is very high, death-rate very low during quarter.

NEW ROSS; *St. Mullins*.—District exceptionally healthy.

Dublin County.

BALROTHERY; *Kilsallaghan*.—No infectious diseases during quarter.

BALROTHERY; *Lusk*.—One case of diphtheria occurred during the quarter, and two of scarlatina; all sent to hospital, and there was no further spread of the diseases.

DUBLIN NORTH; *Clontarf and Howth*, No. 2.—There have been several cases of whooping-cough.

DUBLIN SOUTH; *Crumlin*.—The district is in a healthy condition.

DUBLIN SOUTH; *Tallaght*.—Very few births for quarter.

Dublin County Borough.

DUBLIN NORTH; *North City No. 1 West*.—District very free from epidemic disease.

Kildare County.

CELBRIDGE; *Celbridge, W.*—One case of scarlatina from Straffan, removed to hospital, recovered. No other case reported in district.

CELBRIDGE; *Kilcock*.—Measles and whooping cough were prevalent during the early part of the quarter just ended, but there were no deaths resulting from either disease.

CELBRIDGE; *Maynooth*.—District very healthy.

EDENDERRY; *Carbury*.—One case of scarlatina, removed to hospital.

EDENDERRY; *Rathangan*, No. 1.—No case of tuberculosis or cancer.

NAAS; *Kildare*.—Scarlatina very prevalent during quarter, only one death, not yet registered.

NAAS; *Naas and Carragh, W.*—One case of enteric fever in the urban district, and one case of enteric in the rural district (contracted abroad).

Kilkenny County.

CALLAN; *Callan, W.*—The death from diphtheria occurred in the workhouse hospital of a patient from another district. Three deaths are registered as caused by tuberculous disease.

CARRICK-ON-SUIR; *Pilltown*.—Whooping-cough, influenza, and pneumonia were prevalent during the quarter. District in a healthy condition.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very fair. District free from illness.

CASTLECOMER; *Castlecomer, W.*—Bronchitis was very prevalent during the last quarter, a good many cases proved fatal owing to the severity of the weather.

KILKENNY; *Freshford*.—The water supply very defective.

KILKENNY; Tullaroan.—One case of cancer of breast, deceased had been working as dairymaid for upwards of thirty years, and had been ailing one year and a half. No trace of disease in the family.

NEW ROSS; Dysartmoon.—District healthy.

THOMASTOWN; Inistioge.—Twenty cases of whooping-cough, but no deaths. Three cases in adults aged, respectively, 28, 34, 40. All the other cases in children under 6 years.

THOMASTOWN; Knocktopher.—The district has been free from infectious diseases during the quarter, with the exception of about 12 cases of influenza.

URLINGFORD; Urlingford, W.—Health of the district good. No epidemics with the exception of a few isolated cases of measles.

King's County.

BIRR; Banagher.—The district very healthy.

BIRR; Ferbane.—Sanitary state of district fair. An epidemic of catarrhal jaundice amongst children during quarter.

EDENDERRY; Rathangan, No. 2.—No birth registered in the district. Only two deaths registered—men aged 70 and 72 years, respectively.

MOUNTMELLICK; Clonygowan, No. 2.—District healthy. One death registered at remarkable age of 112 years which I believe to be correct.

ROSCREA; Roscrea, No. 2.—The epidemic of measles which existed towards the end of last quarter and early part of this one is now ended.

ROSCREA; Shinrone.—Sanitary condition of district good. Measles was prevalent during quarter; one death.

TULLAMORE; Clara.—Had one case of diphtheria during quarter. District at present free from infectious disease.

TULLAMORE; Killoughy.—Sanitary arrangements fairly good. There was no outbreak of any of the epidemic diseases. District healthy.

TULLAMORE; Philipstown.—District free from any disease. Sanitary arrangements fairly good.

Longford County.

BALLYMAHON; Abbeyshrule.—District healthy. One death registered during the quarter from phthisis pulmonalis, and one from cancer of the stomach. District free from infectious disease.

BALLYMAHON; Ballymahon, W.—The sanitary arrangements in the district are satisfactory.

GRANARD; Ballinalee.—The district is in good sanitary condition and free from any contagious disease.

GRANARD; Granard, W.—The district is in good sanitary condition. Vaccination rigorously enforced.

GRANARD; Scrabby, No. 2.—The sanitary condition of this district continues in a satisfactory condition, no epidemics having appeared for some years.

Louth County.

ARDEE; Castlebellingham.—District very healthy.

ARDEE; Collon, No. 1.—District healthy.

ARDEE; Dunleer.—District healthy.

DROGHEDA; Termonfeckin.—Measles and whooping-cough have been prevalent towards the close of the quarter. District otherwise healthy.

DUNDALK; Barronstown.—The district has been in a very healthy state. The houses are much better kept than heretofore, and are in most cases well ventilated and sanitary generally.

DUNDALK; Carlingford.—A water supply is required for the village of Carlingford. There is no way of flushing sewers.

DUNDALK; Dromiskin.—District in a healthy state.

DUNDALK; Dundalk, W.—There was no death from cancer. Tuberculous disease appears to be on the increase. The two deaths registered from whooping-cough occurred in the last month of the previous quarter, and the diphtheria case was an isolated one. Excepting a mild outbreak of influenza, there was no epidemic of any kind; and the quarter, generally speaking, may be described as healthy. Water supply and drainage are being improved, but there is no regular inspection of slaughtered animals or meat put out for sale.

DUNDALK; Ravensdale.—Health and sanitary condition of the district very good.

Meath County.

ARDEE; Collon, No. 2.—District free from epidemic disease.

ARDEE; Drumcondra.—District in healthy state.

DROGHEDA; St. Mary's.—The sanitary state of the district is good.

DROGHEDA; Stamullen.—District in a healthy state during quarter.

DUNSHAUGHLIN; Killeen.—Of two deaths the doctor who attended one is dead, but I obtained a coroner's certificate. In the other case the doctor who attended cannot be traced as it is some time since the patient was attended.

DUNSHAUGHLIN; Ratoath, W.—Pulmonary tuberculosis is prevalent in the district.

EDENDERRY; Ballyhogan.—Of the 4 deaths, one was a child 6 weeks, and the others persons aged 80, 76, and 70 years. Health of district remarkably good.

KELLS; Kilskeer.—Sanitary condition of district good.

KELLS; Moynalty.—Births and deaths below the average. Of the four deaths, two were from pulmonary tuberculosis.

KELLS; Nobber.—Health of district excellent.

OLDCASTLE; Oldcastle, W.—A proper water supply is very much needed in the town of Oldcastle. Otherwise the district continues in a satisfactory condition.

TRIM; Athboy.—Sanitary arrangements are satisfactory.

TRIM; Summerhill.—District has been healthy; sanitary condition improved and fairly good.

Queen's County.

ABBEYLEIX; Ballinakill.—Health of district good.

MOUNTMELICK; Clonaslee.—Measles was very prevalent in Clonaslee dispensary district during the quarter: one death occurred, a child of nine years old.

MOUNTMELICK; Clonygowan, No. 1.—District healthy.

MOUNTMELICK; Mountrath.—District healthy.

ROSCREA; Borris-in-Ossory.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; Athlone, No. 1, W.—Health and sanitary condition of the district particularly good.

ATHLONE; Glassan.—Deaths occurred of old people aged 89, 82, 80, and 74 years, respectively.

BALLYMAHON; Ballymore.—Sanitary condition of the district good. The water supply in some localities not sufficient.

MULLINGAR; Ballynacarrigy.—An epidemic of measles has prevailed during the quarter; otherwise the health of this district is good. There were five deaths

recorded (of persons under sixty years), two of which were due to pulmonary tuberculosis, that is 40 per cent. of the total deaths in adolescents—an abnormally high percentage and an increasing one.

MULLINGAR; Castletown Geoghegan.—The sanitary condition of the district good.

MULLINGAR; Killycan.—The district is very healthy at present. Sanitary state good.

MULLINGAR; Milltown.—The sanitary arrangements in the district are in general satisfactory. A severe outbreak of measles characterised the first two months of past quarter, but fortunately there was but one death. Cancer of the lower lip (epithelioma) accounted for another death in a man aged 60 years, whilst chronic bronchitis caused the deaths of three whose ages were 61, 73, and 80 years, respectively. Compared with 1905 June quarter, the births registered last quarter are under one-half, and the deaths are nearly similar.

MULLINGAR; Mullingar, W.—Health of district fairly good.

Wexford County.

ENNISCORTHY; Newtownbarry.—Over 71 per cent. of the deaths were of persons either above 60, or under one year.

GOREY; Gorey, W.—This district is in a particularly healthy condition at present.

NEW ROSS; New Ross, W.—The district has been very healthy during the past quarter. There has been no epidemic during that time, however the number of deaths from tuberculous disease is, as usual, rather large.

WEXFORD; Bannow.—Of the deaths registered, one was 94 years of age, two over 80 years, and four over 70 years.

WEXFORD; Crossabeg.—District healthy. Of the seven deaths over sixty years registered during quarter, two of them assumed the ripe old age of 92 and 96 respectively.

Wicklow County.

BALTINGLASS; Baltinglass, No. 1, W.—Death of one woman aged 97 years registered during the quarter.

BALTINGLASS; Kiltegan.—The health of the district continues to be satisfactory. Most of deaths were from diseases incidental to old age; only two children, weakly from birth, died during quarter. Cases of child insurance not in vogue here.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; *Delgany*.—Health of the district is good.

RATHDRUM; *Annamoe*. — District healthy during quarter.

RATHDRUM; *Dunganstown*.—The accidental death was that of a child who had been scalded on face and neck. Certified, shock and collapse, two days ill, no inquest held.

II. PROVINCE OF MUNSTER

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—District maintains its very healthy character.

CORROFIN; *Corrofin, W.* — Health of district good. Internal cancer in the aged is, in my opinion, becoming more frequent, and the increase cannot be attributed, except in a small way, to imperfect diagnosis in the past.

ENNIS; *Crusheen*.—Several mild cases of measles occurred during the month of June.

ENNIS; *Newmark t.*—The district continues in a very healthy state.

ENNISTIMON; *Ennistimon, W.*—Vaccination not attended to. The sanitary arrangements are satisfactory.

KILLADYSERT; *Labasheeda*. — A mild type of measles in district; no death from same, otherwise district healthy. Sanitation good.

KILRUSH; *Carrigaholt*.—The health of district continues very good.

KILRUSH; *Craggaknock*.—The district has been very healthy during quarter; no epidemic of any kind prevalent.

KILRUSH; *Kilkee*.—Sanitary state of district fairly good. A large number vaccinated this quarter, far larger than usual. Thirteen of the deaths registered during the quarter are of old people between the ages of 60 and 93 years.

KILRUSH; *Kilmihil*.—This district continues in a very healthy condition.

KILRUSH; *Kilrush, W.* — A severe epidemic of measles prevailed. It was in a majority of cases accompanied by pneumonia in various forms.

LIMERICK; *Coolacasey*.—The sanitary condition of the district is satisfactory. There was one death from cancer of the hand registered during the quarter.

SCARRIFF; *Annacarriga*. — The district is healthy.

SCARRIFF; *Feakle*. — Health of district good; no contagious or infectious disease therein.

SCARRIFF; *Mountshannon, W.*—District very healthy generally.

TULLA; *Quin*.—The sanitary arrangements in the district are fairly good.

Cork County.

BANDON; *Inishannon*. — There has been no epidemic of infectious disease during the quarter.

BANTRY; *Durrus and Kilcrohane*.—District fairly healthy; sanitary arrangements good. No cases of tubercular disease registered.

BANTRY; *Glengarriff*.—District in a fairly sanitary condition at present. No infectious disease during the quarter.

BANTRY; *Kealkill*.—Sanitary condition of district fairly good. No infectious disease during quarter.

CASTLETOWN; *Castletown, W.* —A large number of children are unvaccinated.

CASTLETOWN; *Kilcatherine*.—District healthy.

CLONAKILTY; *Rosscarbery*. — District perfectly healthy.

CORK; *Blarney*. — The death from cancer occurred at St. Anne's Hydropathic establishment to which place the deceased came a short time before her death. On that account I am unable to send you any particulars concerning her history.

CORK; *Carrigaline, No. 1.*—District exceedingly healthy during quarter.

CORK; *Queenstown, No. 2.*—The sanitary arrangements of the district are good.

DUNMANWAY; *Dunmanway, W.*—District healthy. Four deaths from tuberculous disease; two from cancer.

KANTURK; *Kanturk, W.*—Whooping-cough was prevalent during the quarter otherwise district healthy.

KILMALLOCK; *Charleville*.—The district is very healthy; there has been no epidemic of any kind during past quarter. There was one case of typhoid during the quarter.

KINSALE; *Ballyfeard*.—Health of district good. Deaths occurred at the ages of 69, 78, 82, and 85 years.

MALLOW; *Ballyclogh*. — District healthy.

MALLOW; *Butterant*.—The sanitary state of the district is satisfactory.

MALLOW; *Kilshannig*.—There was an epidemic of whooping-cough in district during quarter.

MALLOW; *Rahan*.—No infectious disease past quarter. Several cases of bronchitis and pneumonia.

MIDDLETON; *Aghada*.—Three deaths were caused by phthisis. One death was due to cancer of esophagus.

MIDDLETON; *Cloyne*.—The district is exceptionally free from disease at present.

MIDDLETON; *Middleton, No. 2.* — District healthy.

MIDDLETON; *Walstownmore East*.—District very healthy at the present time.

SKIBBEREEN; *Skibbereen, W.*—District free from diseases of an infectious character.

SKIBBEREEN; *Tullagh*.—Three cases of tubercular disease were registered from one house during the quarter—one of tubercular meningitis and two of pulmonary tuberculosis. These cases were caused by infection from a girl who returned from America to the house last April, and died a few weeks later of pulmonary tubercle; so that four deaths from tubercular disease have occurred in this house in twelve months.

SKULL; *Goleen*.—Health of district very good. No water supply for village, or, at least, any there is, is liable to pollution.

SKULL; *Skull, W.*—District healthy; no epidemic or case of any infectious disease, except four cases of tuberculosis.

Kerry County.

CAHERSIVEEN; *Caher, W.*—The district is in good sanitary condition. Vaccination was slow during the quarter, but there seems to be an improvement during the last few weeks.

CAHERSIVEEN; *Darrynane*.—The district is free from epidemic diseases, and the sanitary condition is in a fairly satisfactory state.

CAHERSIVEEN; *Glanbehy*.—No cases of cancer to my knowledge in the district. Sanitary state of district good.

CAHERSIVEEN; *Valencia*.—Of the deaths registered during the quarter four were aged 67, 76, 83, and 87 years, respectively.

DINGLE; *Castlegregory*.—There was an outbreak of typhus fever in eastern portion of my district during June. It is now almost quelled. No death from cancer.

DINGLE; *Dingle, W.*—There was a threatened epidemic of typhus fever in the district in the first four weeks of the quarter. The patients were all removed to the hospital, and the district is free from all sickness at present and very healthy, with the exception of the Fever hospital, in which there are fourteen patients from other districts.

DINGLE; *Ventry*.—Several cases of fever in the district during the past quarter, all of which were removed to hospital; disinfection of dwellings, &c., carried out under supervision of sanitary sub-officer. District now in a healthy condition.

KENMARE; *Kilgarvan*.—Vaccination postponed owing to inclement weather.

KILLARNEY; *Coom*.—With the exception of some cases of influenza, the district was otherwise healthy. Sanitary state of district fairly good.

KILLARNEY; *Killarney, No. 1; W.*—Pneumonia very prevalent all over district during the quarter.

KILLARNEY; *Killarney, No. 2*.—There is a great deal of tuberculosis, in its various forms, in the district, due to overcrowding, want of ventilation, damp, and privation. Overcrowding is a terrible evil both in town and country portions of district, and must be remedied unless we want the race to be wiped out.

KILLARNEY; *Milltown*.—District healthy; no contagious or infectious disease. Sanitary condition good.

KILLARNEY; *Molahiffe*.—District healthy.

LISTOWEL; *Ballyhorgan*.—Of the 15 persons whose deaths were recorded, 5 were aged 60 years and upwards, and 5 were infants under one year of age. Sanitary state of district good.

LISTOWEL; *Ballylongford*.—District healthy for quarter. One death from typhoid—prevented from spreading by due precautions. Good number of vaccinations. Sanitary condition of Ballylongford requires improvement.

TRALEE; *Ardfert*.—A very bad epidemic of influenza, accompanied by pneumonia, all through the district in April and May, but clearing away now.

TRALEE; *Brosna, No. 1*.—Several cases of enteric fever occurred during the quarter.

TRALEE; *Castlemaine*.—Owing to an outbreak of typhoid fever in the district, vaccination backward in consequence of the presence of the epidemic.

Limerick County.

CROOM; *Castletown*.—District healthy.

KILMALLOCK; *Bruree*.—Had about half a dozen cases of chicken-pox; otherwise district healthy.

KILMALLOCK; *Hospital*.—District healthy, but there was one case of diphtheria, which was sent to hospital and died.

KILMALLOCK; *Kilfinnane*.—One case of rheumatism; no recent medical attendant; deceased aged 70 years.

KILMALLOCK; *Kilmallock, W.*—Sanitary arrangements good; district healthy.

LIMERICK; *Annacotty*.—Sanitary arrangements very fair; district healthy.

LIMERICK; *Limerick, No. 3*.—The health of the district has been good during the quarter. There has been no epidemic disease prevalent.

LIMERICK; *Moroe*.—District healthy. No death from, nor has there been any prevalence of, any disease notified in this

country as contagious or infectious. But there were five cases of pulmonary phthisis out of a total of 23 deaths registered. There were nine deaths of persons of advanced age, ranging from 70 to 96 years.

LISTOWEL ; Glin. — Enteric fever has nearly disappeared from the district.

MITCHELSTOWN ; Galbally. — Owing to some cases which appeared like scarlatina, I had to postpone vaccination ; otherwise the district is exceptionally healthy.

NEWCASTLE ; Abbeyfeale. — No case of cancer.

NEWCASTLE ; Ardagh. — The sanitary state of the district is pretty fair ; no disease prevalent in district.

NEWCASTLE ; Feenagh. — The health of the district is very good.

NEWCASTLE ; Newcastle W. — District healthy.

RATHKEALE ; Askeaton. — During the last quarter there was registered the death of one man aged 95 years, another 82 years, and another 80 years. A death was registered caused by cancer (epithelioma of tongue). The district was entirely free from contagious disease.

RATHKEALE ; Pallaskerry. — The sanitary arrangements in the district are fairly good.

RATHKEALE ; Rathkeale, No. 1, W. — There has been no case of epidemic disease in the district for past quarter. Of the twenty-nine deaths, sixteen died in the workhouse and thirteen in the dispensary district ; fifteen deaths were of persons over 60 years of age, and twelve were due to affections of the lungs.

RATHKEALE ; Rathkeale, No. 2. — My district was free from all contagious diseases during the quarter.

TIPPERARY ; Grean. — District healthy.

Tipperary County, North Riding.

BORRISOKANE ; CloghJordan. — District healthy, being particularly free from any epidemic.

BORRISOKANE ; Terryglass. — Influenza prevalent during the last quarter.

NENAGH ; Nenagh, W. — District healthy.

NENAGH ; Newport. — No case of infectious disease.

NENAGH ; Portroe. — District very healthy.

THURLES ; Moyne. — The sanitary arrangements in district fairly good ; no disease prevalent. One death registered caused by tubercular meningitis.

Tipperary County, South Riding.

CALLAN ; Ballingarry. — The health of the district is very good.

CALLAN ; Mullinahone. — Sanitary condition of district fairly good. No form of disease prevalent. There were some more vaccinations performed recently, but not seen on eighth day as yet.

CARRICK-ON-SUIR ; Garrangibbon. — Three cases of typhoid occurred during the quarter ; one recovered, one died of hæmorrhage, and the third case came under my notice on the 29th June, and was sent to hospital immediately. The former cases were also treated in the hospital.

CASHEL ; Killenault. — The health of the district is good and it is free from contagious diseases of all kinds.

CASHEL ; Kilpatrick. — District free from epidemic disease.

CLOGHEEN ; Caher. — The sanitary state of the district is very good.

CLOGHEEN ; Clogheen, W. — Four cases of diphtheria occurred in one village. Origin of disease uncertain ; no recent case.

CLONMEL ; Clonmel, W. — There has been an endemic of typhoid fever, also some cases of scarlatina and diphtheria, but mortality was very small. At present there is a good "bill of health."

TIPPERARY ; Bansha. — District healthy.

TIPPERARY ; Cappagh. — The district is healthy.

TIPPERARY ; Emly. — The district has been in a very healthy condition during the quarter.

URLINGFORD ; Kilcooly. — The district has been healthy during quarter, with the exception of one case of typhoid.

Waterford County.

CARRICK-ON-SUIR ; Rathgormuck. — The district is quite free from any infectious disease.

DUNGARVAN ; Dungarvan, W. — District healthy during past quarter. Vaccination well attended to.

KILMATHOMAS ; Bunmahon. — The district is healthy and free from epidemic diseases.

LISMORE ; Ballyduff. — General health of district satisfactory.

LISMORE ; Tallow. — Health of the district and sanitary condition continue satisfactory.

WATERFORD ; Waterford Urban, No. 1, W. — The sanitary arrangements in parts of the district are bad, there being still many unsanitary privies, the number however being gradually reduced. There are some unhealthy tenement houses dirty and overcrowded. Some mild cases of scarlatina appeared during the quarter. One death, however, was returned from scarlatina

maligna. One mild case of typhus fever appeared. Tuberculosis is prevalent as evidenced by the fact that it enters into the cause of death in twenty-four deaths out of ninety-eight registered. Vaccination well carried out.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district are fairly good. No epidemic disease at present.

BALLYMENA; *Ahoghill*.—Health of district good; free from any form of epidemic disease.

BALLYMENA; *Ballymena, W.*—Town and district healthy.

BALLYMENA; *Broughshane*.—No epidemic disease. Health of district very good.

BALLYMENA; *Clogh*.—Only eight deaths for present quarter. This fact speaks well for the healthiness of the district.

BALLYMENA; *Galgorm*.—No epidemic disease during the quarter.

BALLYMENA; *Portglenone*.—District is healthy and free from epidemic diseases.

BALLYMENA; *Toome*.—Health of the district good. Sanitary condition satisfactory.

BALLYMONEY; *Ballymoney, W.*—The age of the person whose death was registered at No. 189 (103 years) is not far from correct. The master of the workhouse made special inquiry.

LARNE; *Ballycarry*.—Whooping-cough, influenza, and bronchial complaints prevalent. No death registered therefrom so far.

LARNE; *Waterfoot*.—The sanitary arrangements in the district are very good. There has not been a death in the district during the quarter.

LISBURN; *Dunmurry*.—The sanitary condition of this district is good. No epidemics of any kind.

LISBURN; *Glenavy*.—Death average this quarter is high; upwards of 36 per cent. is attributable to tubercular diseases.

LISBURN; *Knocknadona*.—The sanitary condition of this district is good. There was no death from cancer.

Armagh County.

ARMAGH; *Armagh, W.*—An epidemic of measles prevalent in district at present.

ARMAGH; *Blackwatertown*.—Measles has been epidemic over the greater part of this district. There is one death (uncertified) registered as due to it.

ARMAGH; *Keady*.—One death was registered at 101 years, and another at 100 years.

ARMAGH; *Markethill*.—The district has been very free from epidemic disease during the past quarter. I registered one death at 90, six over 80, and fourteen 70 years and over. Two of the four cancer deaths were epithelial and two from carcinoma. The female death rate is unusually low for the past quarter.

ARMAGH; *Rich Hill*.—There were two cases of scarlatina during the quarter, resulting in one death. District otherwise healthy.

LURGAN; *Lurgan, No. 1, W.*—Health of district very good. No epidemic disease prevalent.

LURGAN; *Lurgan, No. 2*.—The district is in a good sanitary condition, and free from infectious or other disease.

NEWRY; *Mullaghglass*.—The district is healthy, except for a mild epidemic of whooping-cough in one portion of the district for the past three weeks.

Belfast County Borough.

BELFAST; *Belfast Urban, No. 1*.—Whooping-cough has been very prevalent during the quarter, causing 20 out of 73 deaths.

BELFAST; *Belfast Urban, No. 11*.—The health of the district has been good. There has been a considerable number of cases of whooping-cough.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—A mild epidemic of measles and one or two cases of scarlatina were present in district during the past month. One death from scarlatina following child-birth occurred in the workhouse on 10th April, 1906.

BAILIEBOROUGH; *Termon*.—The sanitary condition of the district is fairly good.

BAWNBOY; *Swanlinbar*.—No epidemic disease prevalent.

CAVAN; *Ballyhaise*.—District in good sanitary condition.

CAVAN; *Bellananagh*.—Sanitary condition good. No case of infectious disease, except two cases of measles and one of scarlet fever.

CAVAN; *Killashandra*.—Two deaths from tuberculosis registered during the quarter. No deaths from cancer registered during the quarter. One death from whooping-cough registered during the quarter.

COOTEHILL; Tullyvin.—During first month of quarter many adults, as well as children, suffered from a severe attack of measles. No deaths, however, resulted from the epidemic, and the district is now free from contagious disease. Of the deaths during the quarter, 40·9 per cent. were registered at 70 years or over.

ENNISKILLEN; Holywell, No. 2.—The sanitary condition of the district, on the whole, is fairly good; some people are in the habit of keeping cattle in their dwelling-houses, particularly young calves, and fowl are kept in almost every farmer's house.

GRANARD; Scrabby, No. 1.—The sanitary condition of the district continues satisfactory. Lung affections more prevalent than usual owing to the severe weather.

OLDCASTLE; Ballyjamesduff.—District healthy.

OLDCASTLE; Virginia.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—Sanitary arrangements fairly good, but water supply is very bad.

BALLYSHANNON; Ballyshannon, W.—There are 372 vaccination defaulters in the district.

DONEGAL; Donegal, W.—District healthy.

DONEGAL; Dunkineely.—District healthy; no epidemic.

DONEGAL; Mounthcharles.—Whooping-cough very prevalent.

DUNFANAGHY; Crossroads.—District at present in a healthy condition.

DUNFANAGHY; Dunfanaghy, W.—There is an epidemic of measles in this district of a mild type—no fatal cases.

GLENTIES; Ardara.—There were several cases of pneumonia in April.

GLENTIES; Carrick.—The sanitary arrangements are fairly good. Pulmonary tuberculosis prevails to a great extent in the district.

GLENTIES; Doochary.—District healthy.

GLENTIES; Dunglow, No. 1.—The district is at present free from contagious disease. There were during the quarter six cases of typhus fever in the one family with one death (not yet registered) contracted through second-hand clothing. There was one case of enteric fever which seems endemic here for the last three years. Dunglow is badly in need of a water supply.

GLENTIES; Killybegs.—Sanitary condition on the whole satisfactory.

INISHOWEN; Buncrana.—District healthy.

INISHOWEN; Carndonagh, W.—District fairly healthy. Two cases of enteric fever during the quarter. As is usual during the summer months, the water supply of Carndonagh is simply filthy.

INISHOWEN; Clonmany.—During the quarter five cases of diphtheria and three of scarlet fever came under my notice. Two of the diphtheria cases had a fatal termination, but the deaths were not registered during the quarter.

INISHOWEN; Malin.—District healthy.

INISHOWEN; Moville.—District healthy.

LETTERKENNY; Church Hill.—There have been a few cases of measles of a mild type in the district. No deaths have taken place from this disease. District healthy.

LONDONDERRY; Burt.—Whooping-cough prevalent in the district at present. I have registered the deaths this quarter of a very aged couple, husband and wife, man 100, and woman 105 years. I believe the ages to be correct. They were always as long as they were able a hard-working couple, but during their latter years they were on out-door relief.

LONDONDERRY; Killea.—Measles and whooping cough very prevalent.

MILLFORD; Fanad.—Epidemic of diphtheria which occurred at end of last quarter has been stamped out. Four deaths from it which occurred at beginning of this quarter have not yet been registered. Health of the district is now good. No infectious diseases prevalent.

MILLFORD; Rathmullan.—District healthy during quarter.

STRABANE; Raphoe.—Pneumonia very prevalent during past quarter, also influenza. Sanitary arrangements satisfactory.

STRANORLAR; Cloghan.—Sanitary arrangements satisfactory.

STRANORLAR; Stranorlar, W.—During the quarter two deaths were registered at 90 years and over, two at 80 years and over, and two over 75 years.

Down County.

BANBRIDGE; Ballyward.—The sanitary state of the district is fairly good. Pneumonia and bronchitis were very prevalent owing to the very cold spring, and caused seven deaths.

BANBRIDGE; Banbridge, W.—A high birth and death rate this quarter. Over half the deaths occurred in persons over 60 years.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are good. Influenza was prevalent during the quarter. There were no deaths from it.

DOWNPATRICK; *Ballynahinch*.—There have been some cases of influenza and some cases of whooping cough in the district during the quarter. One death was registered at the age of 104 years.

DOWNPATRICK; *Downpatrick, W.*—Seven deaths attributed to influenza.

DOWNPATRICK; *Killylough*.—Whooping-cough was widely prevalent during the quarter.

DOWNPATRICK; *Killyleagh*.—There is an epidemic of whooping-cough in the village of Shrigley. The disease was imported by a child from Belfast. There have been no deaths from the disease up to the present. Out of the 38 deaths registered during the quarter, 22 were of persons aged 60 years and upwards; and of these one was 95 years, one 94, one 90, two between 80 and 90, 12 between 70 and 80, and 5 between 60 and 70.

DOWNPATRICK; *Portaferry*.—No vaccinations performed in consequence of an epidemic of whooping-cough, which is still very prevalent. Six deaths occurred from it, three of which were not registered during the quarter. Sanitary condition of district very good.

KILKEEL; *Kilkeel, No. 2, W.*—Sanitary arrangements very good. Drinking is far less than it used to be. Whooping-cough of a mild type is prevalent.

KILKEEL; *Rosstrevor*.—During the quarter whooping-cough was epidemic and caused six deaths, in three of which convulsions (eclampsia) was a secondary cause of death. In consequence of whooping-cough vaccinations had to be postponed in several cases.

LISBURN; *Drumbeg*.—Births about the average; deaths above the average. Sanitary condition of district fairly good. No epidemic disease.

LISBURN; *Saintfield*.—The health of the district has been extremely good.

LURGAN; *Moir*.—One case of cancer during the quarter. Death rate lower, but not yet down to the old level. Whooping-cough has invaded the district, and is pretty general.

LURGAN; *Waringstown*.—Whooping-cough is very prevalent in the district for the past two months, but no deaths have been caused by it. District otherwise healthy.

NEWRY; *Donaghmore*.—District very healthy. Sanitary matters good.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements of district very good. Whooping-cough very prevalent. Only one death from it in infancy.

NEWTOWNARDS; *Comber*.—Scarlatina has again broken out, but we are able to trace the source to Belfast. Otherwise the health of the district is good.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. Of the deaths, six were over 80 years, and one of them 99 years. Influenza has been and is still in sporadic form present in district. Five cases of scarlatina were removed to hospital, premises and clothing disinfected. Of the five cases removed to hospital three were from the vicinity of Kircubbin, but the disease has not appeared in epidemic form. Practically no epidemic in the district, the health of which is very good.

NEWTOWNARDS; *Kilmood*.—Influenza very prevalent in beginning of quarter. Health of district at present very good.

NEWTOWNARDS; *Newtownards, W.*—No particular disease has been prevalent during the past three months. The chief sanitary defect is the want of good sewers and pure water. I have great pleasure in saying that we have now, after long waiting and hoping, a clear prospect of getting both.

Fermanagh County.

CLONES; *Rosslea*.—Public health is in a satisfactory state at present.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Whooping-cough prevalent amongst children during the last two months of quarter. Sanitary condition of district fairly satisfactory.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of this district with few exceptions is good. One death was registered from diphtheria. Four other people in the neighbourhood caught the disease and were treated with serum immediately, and removed to hospital; their lives were saved and the disease stopped.

IRVINESTOWN; *Clonelly*.—One case of enteric fever during the quarter. District otherwise healthy.

IRVINESTOWN; *Ederney*.—District healthy. Deaths registered at 88, 86, 84, two at 80, and one at 78 years.

IRVINESTOWN; *Irvinestown, W.*—One case of enteric fever admitted to Fever Hospital from Clonelly Dispensary District.

LISNASKEA; *Derrylin*.—Sanitary arrangements of district primitive. Scarlatina has been in the district during the quarter. Phthisis is always in the district.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. No infectious disease prevalent during quarter.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*. — District healthy.

COLERAINE; *Garvagh*. — A severe epidemic of whooping-cough during the unusually cold weather in April and May caused eight deaths (from complications) in young children.

COLERAINE; *Kilrea*. — District healthy.

COLERAINE; *Portstewart*. — The health of the district has been very good, and free from epidemic diseases, with the exception of whooping-cough, which has been prevalent for the past month.

LIMAVADY; *Bellarena*. — Whooping-cough has been prevalent in the district for the past two months.

LIMAVADY; *Dungiven*. — Sanitary arrangements satisfactory. Birth statistics above the average. An exceptionally severe epidemic of whooping-cough prevailed in district during quarter, resulting in six deaths. These were complicated by pneumonia. Vaccination delayed in consequence of this malady. One case of phthisis, a girl aged 23, with no hereditary history. One case of puerperal fever, symptoms developed ten days after delivery, with severe pyrexia.

LIMAVADY; *Limavady, W.* — Whooping-cough has been very prevalent during the quarter, and two deaths have been registered from that disease. District healthy otherwise.

LONDONDERRY; *Claudy*. — There has been an epidemic of measles—mild type—with one death with broncho-pneumonia complications. One death from diphtheria, a sporadic case—disease did not spread.

LONDONDERRY; *Eglinton*. — No case of cancer.

LONDONDERRY; *Londonderry Urban, No. 2*. — Large falling off in number of vaccinations owing to the wide-spread epidemic of measles.

MAGHERAFELT; *Moneymore*. — There has been no outbreak of any infectious disease during the quarter. District is in a very healthy condition. Death-rate very low. No deaths of children under one year of age, nor any death from tuberculous or malignant disease.

Monaghan County.

CARRICKMACROSS; *Donaghmoyne*. — Measles reported present in one end of district during last weeks of quarter.

CASTLEBLAYNEY; *Ballybay*. — Measles, scarlatina, and chickenpox prevalent. Four deaths from measles were registered.

CASTLEBLAYNEY; *Castleblayney, W.* — Among the deaths registered during the quarter, three were attributed to measles,

one to scarlatina (from an adjoining district), four to tuberculous disease, and one to cancer. The ages stated in thirty-three cases varied from sixty to ninety-one years, fourteen died in public institutions, and fifteen were uncertified.

COOTEHILL; *Dawsonsgrove*. — The sanitary condition of the district is fairly good. Measles was prevalent during the quarter.

MONAGHAN; *Castleshane*. — The district is in a sanitary condition. There is an epidemic of measles, and an isolated case of scarlet fever.

MONAGHAN; *Emyvale*. — Sanitary condition of the district is satisfactory.

MONAGHAN; *Kilmore*. — There was a considerable outbreak of influenza during April.

MONAGHAN; *Monaghan, W.* — The sanitary arrangements in this district are on the whole satisfactory. There has been no epidemic during the quarter; nor has there been any special fatality of any kind affecting the public health or vaccination during the past three months requiring special notice.

MONAGHAN; *Scotstown*. — The sanitary condition of the district is satisfactory.

Tyrone County.

CASTLEBERG; *Castleberg, W.* — Sanitary state of district satisfactory. No epidemic.

CASTLEBERG; *Drumquin*. — The sanitary condition of the district is good, with no infectious diseases of any sort during the quarter.

CASTLEBERG; *Killeter*. — State of district healthy.

CLOGHER; *Aughnacloy*. — Health of district satisfactory, except as regards prevalence of tuberculous diseases.

CLOGHER; *Fivemiletown*. — The health of the district was pretty good during the quarter. There were several cases of measles of a mild type, but no deaths were registered from this cause.

COOKSTOWN; *Cookstown, W.* — The district is very healthy.

COOKSTOWN; *Pomeroy*. — District sanitary and generally healthy. Five cases of enteric fever occurred. I registered the death of George Fletcher, 118 years. He was the King's oldest subject, and was presented with a gold snuff-box by his Majesty.

COOKSTOWN; *Stewartstown*. — There has been a number of cases of influenza, also a mild epidemic of mumps. One case of typhoid fever in one townland which is thickly inhabited (a tape factory being situated in it), and very badly supplied with pure drinking water.

DUNGANNON; *Benburb*.—Measles prevalent. Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Five cases of measles complicated with capillary bronchitis occurred during quarter—no deaths. Two cases of diphtheria in one family; the first being mistaken for mumps by parents and neglected, died ten minutes after I first saw it. Other case diagnosed promptly and removed to fever hospital.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good.

DUNGANNON; *Coal Island*.—Except for one mild case of enteric fever, the district was free from infectious disease during quarter. Two deaths from cancer; in neither case was there any family history.

IRVINESTOWN; *Trillick*.—There were three deaths from tuberculous phthisis registered during the quarter, and one death from this disease has not yet been registered. There is no place in the union to send those suffering from tuberculosis. There were two deaths from cancer. There were four sudden deaths. Two inquests were held.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are very satisfactory. None of the principal epidemic or other diseases are at present prevalent.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter. The death-rate was above the average but the majority were old persons. The district has been free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Gortin*.—The housing accommodation is bad generally. There is a general want of personal cleanliness. No infectious disease has been prevalent during quarter.

OMAGH; *Omagh, No. 1, W*.—The sanitary condition of the urban district continues to improve. In the rural district sanitation is in a state common to the country, viz.:—Want of sanitary conveniences, the "ancient" custom of placing the manure heap, with accompanying "cess-pool" at the door step, milk stored in sleeping and other apartments in dwelling-houses. Two cases of typhus in rural district due to overcrowding, &c.—one proved fatal (hospital). No other infectious disease notified. Of the deaths registered, one was 98 years, two 90, two 86 years, and one 84 years.

OMAGH; *Omagh, No. 2*.—District healthy. No epidemic of any kind.

OMAGH; *Sixmilecross*.—The district is in a very good sanitary condition at present, and free from any infectious disease. Two old men's deaths registered during the quarter, one 98 years, and another 95 years.

STRABANE; *Newtownstewart*.—In at least one of the four uncertified deaths the patient had been seen by a doctor, but at such a long interval before death that he did not feel justified in certifying; the cause was probably tuberculosis.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Clifden, W*.—The district is generally in a sanitary condition.

CLIFDEN; *Rinivyle*.—Facilities should be afforded for the removal of cattle, pigs, and poultry from the dwelling-houses by supplying the people with means to build outhouses as the people themselves are too poor to do so. Though lists of vaccination defaulters are sent to the Board of Guardians still no action is taken to compel them to comply with the law.

CLIFDEN; *Roundstone, No. 1*.—District healthy; no epidemic disease.

GALWAY; *Galway, No. 3 (Arran)*.—The district fairly healthy.

GALWAY; *Moycullen*.—Sanitary condition of district is very good.

GALWAY; *Turloughmore*.—A few cases of scarlatina in the district. Three died aged 96, 102, and 103. It is supposed that the latter, aged 103, was 106 years. He was strong and healthy and able to walk miles up to the last.

GLENNAMADDY; *Glennamaddy, W*.—The sanitary condition of the district during the quarter has been fairly satisfactory.

GORT; *Gort, W*.—The health of the district is good, with the exception of some cases of whooping-cough which is prevailing at present.

GORT; *Kinvarra*.—Of the fourteen deaths registered during the quarter eight were over 60 years of age and one under one year; of the remaining five, four were due to tubercular disease. One death from whooping-cough (a child aged 3 months) was registered. There are many cases of whooping-cough presently in the district. The health of the district with the above exceptions is good.

LOUGHREA; *Athenry*.—The sanitary condition of the district is good with the exception of some lanes in the town of Athenry, and these are now being attended to by the sanitary authority. The housing of the working classes and the poor in Athenry deserves attention, and I am glad to say that the local authorities are about to provide suitable dwellings for these classes.

LOUGHREA; *Bullawn*.—The death of a man aged 103 years was registered.

OUGHTERARD; *Cloonbur, No. 1.*—Health of district good; no epidemic disease present.

OUGHTERARD; *Cloonbur, No. 2.*—Sanitary arrangements are good.

TUAM; *Tuam, No. 1. W.*—Health of district during the quarter was on the whole good. There were a fair number of pneumonia cases during the month of June.

TUAM; *Tuam, No. 2.*—District free from epidemic disease.

Leitrim County.

BAWNBOY; *Ballinamore.*—District healthy, no epidemics.

CARRICK-ON-SHANNON; *Jamestown, W.*—District very healthy, and in good sanitary condition.

MANORHAMILTON; *Drumahaire.*—The sewerage of the village is bad, otherwise the district is in fair sanitary condition.

MOHILL; *Carrigallen.*—The health of the district has been good during the quarter. Whooping-cough was, and is, widely prevalent. There was one case of sporadic diphtheria.

MOHILL; *Mohill, W.*—I had one case of cancer; the informant knows nothing of the parties. I can give no account of it whether it is hereditary or not.

MOHILL; *Rinn.*—The district is very healthy and there were no contagious diseases during the quarter.

MOHILL; *Rowan.*—Sanitary arrangements fairly good.

Mayo County.

BALLINA; *Crossmolina.*—District is in a fairly good sanitary condition. Vaccination very backward.

BALLINROBE; *Cappaghduff.*—Sanitary arrangements fairly good; no infectious diseases in the district.

BALLINROBE; *Cong.*—Health of district very good.

BALLINROBE; *Hollymount.*—Births and deaths quite up to the average. Primary vaccinations over the average owing to defaulters coming in. Except for some cases of influenza and bronchial affections the general health of this district was good.

BELMULLET; *Bangor.*—Public health good during quarter, and nothing of special note to remark. Registration and vaccination satisfactory.

BELMULLET; *Binghamstown, W.*—Of the deaths registered 12 were over 60 years of age, viz.:—one 95, two 85, one 83, two 80, one 76, one 75, one 70, one 65, and two 62 years of age. Vaccination defaulters are now complying with the law. State of district healthy.

BELMULLET; *Knocknalower.*—District in healthy condition at present; no epidemics.

CASTLEBAR; *Balla.*—Vaccination has considerably improved during the quarter.

CASTLEBAR; *Castlebar, No. 1, W.*—Health of district particularly good. Vaccination defaulters are getting less numerous. A marked sanitary improvement continues to exist.

CLAREMORRIS; *Ballindine.*—District healthy.

CLAREMORRIS; *Ballyhaunis.*—Health of district uniformly good; no epidemics or cancer. Most of the deaths registered were attributable to senile pulmonic affections—7 of same having attained the age of 80 years and upwards, and 2, 90 years and upwards. Sanitation steadily progressive, with as regards cleanliness, a manifest improvement in the condition of the dwellings.

KILLALA; *Killala, W.*—The health of the district was very good during the quarter.

SWINEFORD; *Foxford.*—Defective water supply.

SWINEFORD; *Kiltamagh.*—All forms of tuberculous disease are distressingly common; this I believe is due to the fatal habits of the people having their beds excluded from sunlight with walls and curtains. They cannot be taught to tear aside the curtains, although I have lectured them over and over again. The habit originated, I believe, when the houses were built on a small scale and persons of both sexes inhabited the same rooms.

SWINEFORD; *Swineford, W.*—The Board of Guardians prosecuted vaccination defaulters; hence an increase in the primary vaccinations.

WESTPORT; *Achill.*—General health and sanitary state good; no epidemic present. A good many children presented this quarter for vaccination.

WESTPORT; *Ballycroy.*—District at present healthy.

WESTPORT; *Bundorragha.*—Sanitary arrangements are fairly good in the district.

WESTPORT; *Louisburgh.*—Sanitary state of district during quarter very satisfactory.

WESTPORT; Newport.—A place to deposit accumulations of refuse and dung should be found near the town, and the inhabitants then compelled to clean out their yards and cess-pits once a week at least. There should also be some method of collecting refuse every morning from houses which have no back yards.

Roscommon County.

ATHLONE; Athlone No. 2.—Three of the seven deaths registered during the quarter were aged respectively 77, 79, and 87 years.

ATHLONE; Brideswell.—Measles prevalent during quarter.

BOYLE; Ballyfarnan No. 1.—State of the district generally healthy.

BOYLE; Boyle No. 1., W.—No death from cancer. The district was fairly healthy, but whooping-cough was prevalent. There were a few cases of scarlatina.

BOYLE; Keadew.—Sanitary conditions fair; one case of diphtheria; seven cases of scarlet fever.

CARRICK-ON-SHANNON; Aughrim.—The sanitary condition of the district is improving.

CASTLEREAGH; Ballaghaderreen.—The health of the district has been and is very good, but there is room for sanitary improvements yet.

CASTLEREAGH; Castlereagh, W.—Four deaths were from burns, accidentally received.

CASTLEREAGH; Frenchpark.—170 vaccination defaulters up to 31st March, 1906.

ROSCOMMON; Roscommon, W.—Influenza and pneumonia prevalent during quarter; one death from scarlet fever.

STROKESTOWN; Roosky.—Of the deaths registered eleven were of persons aged 60 years and upwards, one of whom was aged 91 years, one 84 years, two 81 years each, one 78 years, one 74 years, and one 72

years. Sanitary condition of the district pretty good. Vaccination was well attended to during the quarter, the Medical Officer having successfully performed the operation on 107 children.

Sligo County.

BOYLE; Ballyfarnan, No. 2.—State of the district generally healthy. Two deaths registered during the quarter at 101 years.

BOYLE; Gurteen.—Influenza was prevalent during the quarter; it was almost confined to children. District healthy now.

DROMORE WEST; Easky, W.—Health of district good. Three cases of fever occurred during quarter.

DROMORE WEST; Shreen.—The parents are very dilatory in complying with the vaccination laws. The sanitary condition is good and district healthy.

SLIGO; Ballymote.—One case of enteric fever occurred during the quarter, and was removed to the Sligo Fever Hospital. The district is otherwise healthy.

SLIGO; Carney, No. 1.—Sanitary condition of the district improving.

SLIGO; Collooney.—One fatal case of diphtheria, seen first time when dying (7th day).

SLIGO; Sligo, No. 1, W.—Of the seven uncertified deaths, five of them varied in age from 70 to 93, one had just left hospital, and another died rather suddenly.

SLIGO; Sligo No. 2.—One death of farmer's widow 101 years old.

TOBERCURREY; Aclare.—The district continues healthy.

TOBERCURREY; Coolaney.—Sanitary arrangements satisfactory.

TOBERCURREY; Tobercurrey W.—The district is free from contagious or infectious diseases, and its sanitary condition is good, with the exception of portion of the town.

1906.]
3rd Quarter.

Marriages:—APR., MAY., JUNE, 1906. **Births & Deaths:**—JULY, AUG., SEPT., 1906

During the quarter ended 30th September last, there were registered in the 827 Registrars' Districts in Ireland 25,494 births—a number equal to an annual birth-rate of 23·2 in every 1,000 of the estimated population*—and 15,826 deaths, representing an annual rate of 14·4 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 8,469 persons emigrated.

In England last quarter, the birth-rate represented was 27·2 in every 1,000 of the estimated population, and the death-rate 15·0 per 1,000.

The birth-rate in Ireland for the quarter is 0·2 over the average rate for the corresponding quarter of the ten years 1896–1905, but 0·4 below the rate for the third quarter of 1905. The deaths are 71 below those registered in the corresponding quarter of 1905; the death-rate is 0·1 below the rate for that quarter, and 0·4 below the average for the third quarter of the ten years 1896–1905.

Compared with those for the corresponding quarter of 1905, the returns of pauperism, furnished by the Local Government Board, show a decrease of 122 in the average number of Workhouse inmates on

* See page 282.

Saturdays during the quarter, and a decrease of 914* in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years 1896-1905, the number of Workhouse inmates shows an increase of 896, and the number of persons on out-door relief a decrease of 793, the total under both heads being 0·1 per cent. above the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·7 per cent.

The annual marriage-rate (4·7 per 1,000 of the population) represented by the marriages registered during the second quarter of 1906 is equal to the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,† represented by the number of Marriages registered during the Quarter ended 30th June, 1906, and by the Births and Deaths registered in the Quarter ended 30th September, 1906.

† The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 219.

MARRIAGES.

The marriages (5,140) registered in Ireland during the second quarter of 1906 are equivalent to an annual rate of 4·7 per 1,000 of the estimated population, being 0·2 above the rate for the corresponding quarter of 1905, but equal to the average rate for the second quarter of the ten years 1896–1905. Of the total number of marriages 3,365 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,775 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·1 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·3 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·1 below the average rate for the corresponding quarter of the previous ten years, but that under the latter shows an increase of 0·2. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages was celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the ten years 1896–1905, and the average number for that period; also the number registered during the first and second quarters of 1906.

BIRTHS.

The number of births registered during the quarter ended 30th September last was 25,494—13,147 boys and 12,347 girls—being equal to an annual ratio of 1 in every 43·0, or 23·2 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1896–1905 was 25,647, equivalent to an annual rate of 23·0 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23·8 per 1,000 of the population according to the Census of 1901; Munster, 22·0; Ulster, 24·0; and Connaught, 19·8.

The highest county or county borough birth-rate* is 34·1 for Dublin county borough, and the lowest 15·9 for Sligo county. Of the intermediate rates the highest five are—Belfast county borough, 31·1; Londonderry county and county borough, 24·2; Carlow, 24·2; Antrim, 24·2; and Kildare, 23·7. The lowest five are—Cavan, 16·2; Leitrim, 16·8; Roscommon, 16·9; Longford, 17·6; and Queen's, 17·8.¹

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 15,826—7,993 males and 7,833 females—affording an annual ratio of 1 in every 69·3, or 14·4 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1896–1905 was 14·8 per 1,000.

The death-rate in Leinster was 16·1 per 1,000 of the population according to the Census of 1901; in Munster, 12·9; in Ulster, 15·2; and in Connaught, 10·5.

The county or county borough death-rates* range from 8·4 in Leitrim to 24·1 in Dublin county borough. Between these rates the lowest five are—Mayo, 10·0; Roscommon, 10·4; Clare, 10·7; Longford, 11·1; and Kerry, 11·1; and the highest five are—Belfast county borough, 18·8; Armagh, 16·4; Down, 15·1; Wexford, 15·0; and Dublin county, 14·6.

* See note (†) on page 198.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1896–1905, and the average number for that period ; also the number registered during the first, second, and third quarters of the year 1906 :—

1906, . . .	24·0	24·7	23·2	—	—	18·9	18·0	14·4	—	—

Ages.—Of the 15,826 deaths registered last quarter, 2,430, or 15·4 per cent., were of children under 1 year old ; and 6,175, or 39·0 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 95·3 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 18·5 per cent. of the total deaths registered therein ; in Munster, 14·4 per cent. ; in Ulster, 15·2 per cent. ; and in Connaught, 9·3 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 35·3 per cent. ; in Munster, to 39·9 per cent. ; in Ulster, to 37·8 per cent. ; and in Connaught, to 51·4 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 1,322, or 148 more than the number registered in the corresponding quarter of 1905, and is equivalent to an annual rate of 1·2 per 1,000 living, being 0·1 above the rate for the third quarter of 1905, but 0·1 below the average rate for the third quarter of the ten years 1896–1905.

Small-pox.—It appears from Abstract I., page 218, that there was not one death from small-pox registered during the quarter ; deaths from small-pox in each of the three quarters preceding were 2, 0, and 0.

There was no allusion to the occurrence of small-pox, contained in any of the quarterly returns made by the Registrars.

* See note (†) on page 207.

Measles.—Deaths from measles, which numbered 69, 104, and 121 in each of the 3 preceding quarters, declined to 72 in the period under review. The average number of deaths in the corresponding period of the 5 years 1901–1905 was 127. The deaths in the unions of North and South Dublin combined were 9 in number; the same number was registered in the union of Belfast. Twenty-three deaths were registered in the union of Londonderry; of this number 10 deaths occurred in the district of Londonderry No. 2 Urban, 5 in the district of Waterside Urban, 3 in each of the districts of Londonderry Urban No. 1 and the Upper Liberties, and 2 in the district of Kilrea.

Scarlet Fever.—There were 27 deaths from scarlet fever registered for the whole of Ireland during the quarter, as follows:—17 in the province of Ulster, 8 in Leinster, 2 in Munster; but not one death from scarlet fever was registered in the province of Connaught. Of the deaths in Ulster, 8 were registered in the county of Down, namely—four registered in the registrar's district of Rathfryland, two in the registrar's district of Newtownards, and one death in each of the districts of Ballyward and Loughbrickland. Deaths from scarlet fever registered for the whole of Ireland in each of the three preceding quarterly periods were 52, 50, and 23.

Typhus.—Although the deaths from typhus (22) show a decline of 2 from the number (24) registered in the June quarter of the year, they are above the average for the corresponding quarter of the five years 1901–1905 by 2 deaths. In the December quarter of 1905 there were 22 deaths from typhus registered in the whole of Ireland; and in the March quarter of the year 1906 such deaths numbered 28. The deaths in the September quarter, 1906, were registered as follows:—in Clogher union 3 deaths; in each of Cork, Dublin North, Tralee, and Tullamore unions 2 deaths, and one death in each of the following unions—Carrick-on-Suir, Claremorris, Clogheen, Glenties, Kilmallock, Macroom, Magherafelt, Millford, Nenagh, Sligo, and Westport.

Whooping-cough.—The deaths from whooping-cough registered during the quarter under review numbered 208, or 78 less than the number registered in the preceding quarter of the year. The 208 deaths are equal to an annual death-rate of 0.19 per 1,000 of the estimated population of Ireland, and exceed the average number of deaths from whooping-cough in the corresponding September quarter of the years 1901–1905 by 20 deaths. In each of the three preceding quarters, deaths from whooping-cough were 79, 195, and 286. Of the total deaths for last quarter, 28 were registered in the county borough of Dublin, and 58 in the county borough of Belfast.

Diphtheria.—As in the preceding quarter, the deaths which were registered from diphtheria in the whole of Ireland numbered 65; in

the March quarter of the present year 94 such deaths were registered, and in the December quarter of 1905 the number registered was 74. The average number of deaths from diphtheria registered in the corresponding September quarter of the five years, 1901-1905, was 60. Deaths from diphtheria for the several unions in Ireland occurred as follows :—One death in each of Abbeyleix, Athlone, Callan, Cootehill, Enniscorthy, Irvinestown, Kanturk, Killala, Kilmallock, Limavady, Lisburn, Listowel, Manorhamilton, Mullingar, Rathdrum, Rathkeale, Tipperary, and Tuam; two deaths in each of Downpatrick, North Dublin, Kilkenny, Larne, Longford, Lurgan, and Macroom; three deaths in each of Ballymena, Cork, South Dublin, Inishowen, Limerick, and Millford; four deaths in each of Londonderry and Newry; and seven deaths in the union of Belfast.

Enteric Fever.—The deaths from enteric fever for the whole of Ireland, which had been 88 in the June quarter of the present year declined to 82 in the period under notice; in the September quarter of 1905, deaths from enteric fever numbered 114, and the average for the corresponding quarter of the five years 1901-1905 is 150. Of the 82 deaths that were registered there were 11 in Dublin county borough and 23 in the county borough of Belfast.

There were 11 deaths returned as from pyrexia (origin uncertain), this condition being formerly described as simple, continued, or ill-defined fever.

Diarrhoeal Diseases.—In the aggregate the deaths in the whole of Ireland from diseases classified under this heading amounted to 835, representing an annual death-rate of 0·76 per 1,000 of the estimated population of the country. The September quarter is always marked by a high mortality from diarrhoeal diseases. The deaths registered during the period under notice exceed those of the third quarter of 1905 by 105, and those of the third quarter of 1904 by 228. It is of interest to note in this connection the meteorological conditions obtaining during the September quarters of the years 1904, 1905, and 1906, as shown by the following statement :—

Statement showing for Ireland (see Table IX. Quarterly Returns), the mean temperature, the mean earth temperature at 4 feet, the number of hours of bright sunshine observed, and the rainfall during the September quarter of 1906, as compared with the September quarter of 1904 and 1905 :—

	September Quarter of Year.	No. of Deaths registered.	Mean Tempera- ture.	Mean Earth Tempera- ture at 4 feet.	Bright Sunshine, No. of hours observed.	Rainfall in inches.
Ireland, {	1904	607	57·3°	56·8°	459·3	11·71
	1905	730	57·3°	57·3°	391·7	9·39
	1906	835	58·4°	57·4°	482·9	7·25

Of the deaths (835) from diarrhoeal diseases, no less than 241 appertained to the county borough of Dublin, and 249 to the county borough of Belfast, the former number representing an annual death-rate of 3·29 per 1,000 of the estimated population of Dublin county borough, and the latter representing an annual death-rate of 2·72 per 1,000 of the estimated population of Belfast county borough.

Tuberculous Disease.—From Abstract I., page 218, it appears that in the aggregate the deaths of 2,508 persons are reported by the Registrars to have been due to tuberculous disease in Ireland during the September quarter of 1906. The total (2,508) represents an annual death rate of 2·29 per 1,000 of the estimated population of Ireland. In the previous three quarterly periods the deaths thus returned numbered 2,292, 2,977, and 3,119, respectively. It appears that nearly 16 per cent. of the deaths registered during the September quarter of the year were due to tuberculous disease. The abstracts on pages 218 and following give the geographical distribution of the deaths from tuberculous disease by provinces, counties, superintendent registrars' districts, and registrars' districts. In the following counties the largest number of deaths occurred:—Dublin, 109; Dublin county borough, 334; Cork county and Cork county borough, 242; Belfast county borough, 340; and county Down, 140, representing annual rates, respectively, of 2·77, 4·55, 2·39, 3·71, and 2·72 per 1,000 of the population. The Registrars of the following districts have supplied notes relating to the existence, causation, or prevention of tuberculous diseases:—Rathangan No. 1, Killeen, Ballynacarrigy, Milltown, Ennis No. 1, Aghada, Darrynane, Goleen, Glenavy, Pettigoe, Derrylin, Kiltimagh, and Carney No. 1. These notes are published in an appendix to this Report, commencing on page 281.

Malignant Diseases.—From the returns of the Registrars it appears that 772 deaths were registered from malignant diseases (including carcinoma, sarcoma, cancer, and malignant disease—undefined). The total represents an annual death rate of 0·70 per 1,000 of the estimated population of Ireland; in each of the three quarterly periods the rates for these diseases were respectively 0·71, 0·72, and 0·71 per 1,000 of the estimated population. From Abstract I. it appears that of the total deaths 254 were registered in Leinster, 135 were registered in Munster, 328 were registered in Ulster, and 55 were registered in Connaught. These figures represent the following annual death rate for malignant diseases for the provinces of Ireland—Leinster, 0·88 per 1,000 of the population according to the Census of 1901; Munster, 0·50 per 1,000; Ulster, 0·83 per 1,000; and Connaught, 0·34 per 1,000.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases :—Chickenpox in 1 district, measles in 16, scarlet fever in 20, whooping-cough in 35, diphtheria in 17, fever in 27—typhus in 5, enteric in 21, and *pyrexia* (origin uncertain) in 1—diarrhoea in 8*, influenza in 3, mumps in 2, and German measles in 1 district.

Inquests.—There were 444 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 36 of the total deaths registered.

In Leinster there was 1 inquest to every 33 deaths registered, in Munster 1 to 38, in Ulster 1 to 33, and in Connaught 1 to 59.

Deaths in Public Institutions.—Of the 15,826 deaths registered, 3,253, or 20·6 per cent., occurred in public institutions. In Leinster the percentage was 26·6, in Munster 25·5, in Ulster 14·7, and in Connaught 14·7.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1906, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 18·3, and the birth-rate 29·7 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 12·4 and the birth-rate 19·9 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 2·7 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1906, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES;† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—"The Dublin Registration Area" consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 29th September, 1906.

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1906, there were 23,487 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th September last, was 8,469 (4,124 males and 4,345 females), being 1,204 more than in the corresponding quarter of the year 1905, but 1,682 under the average number for the third quarter of the ten years 1896–1905.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1905 and 1906 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1905.	1906.	In-crease.	De-crease.	1905.	1906.	In-crease.	De-crease.	1905.	1906.	In-crease.	De-crease.

Total, .	3,469	4,124	655	—	3,796	4,345	549	—	7,265	8,469*	1,204	—

* Including 6,549 emigrants to the United States of America, viz. :—1,154 in the month of July 1,912 in August, and 3,483 in September. Of 6,143 steerage passengers, 2,385 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1905 the average price was $6d.$, and in the corresponding quarter of 1896 it was $5d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $14s. 6d.$ per cwt., being the same as the average for the corresponding quarter of the year 1905. In the third quarter of 1896 the average price was $12s.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $3s.$ to $3s. 6d.$ In the third quarter of 1905 the average prices were $3s. 3d.$ to $3s. 8d.$, and the prices for the corresponding quarter of 1896 were $2s. 4d.$ to $3s. 9d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $52s. 6d.$ to $56s. 0d.$ per cwt. In the corresponding quarter of 1905 the average prices were from $50s. 6d.$ to $55s.$, and in the third quarter of 1896 they were from $44s.$ to $54s.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was $18s.$ per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was $£88\frac{3}{8}$, and the lowest $£86\frac{1}{8}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been 4 per cent. from the 21st June, was raised on the 13th September to $4\frac{1}{2}$ per cent., at which rate it remained till the end of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1906 was 41,801, or 122 under the average for the corresponding period in 1905.

The average weekly number of persons receiving out-door relief during the quarter was 55,808, being 914* under the average for the third quarter of 1905.

Of the persons receiving in-door relief during the third quarter of 1906, an average number of 1,492 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1905 the average weekly number was 1,456.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1906, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.

(a) MESSRS. Bolands, Limited.

(b) MESSRS. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phoenix Park, Dublin, during the third quarter of the years 1901–1906, respectively,

* See note (*) on page 198.

† Latitude 53° 21' 48" 25" north; longitude 6° 20' 59" 15" west. Height above the sea 155 3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 214).

The mean height of the barometer during the third quarter of 1906 was 30·038 inches, being ·084 above the average for the corresponding quarter of the five years 1901–1905; the highest reading (30·590 inches) was on the 27th September, at 9 A.M., air calm; and the lowest (29·428 inches) on the 13th August, at 9 P.M., air calm.

The mean temperature of the air during the quarter was 57·8° or 1·3° above the average for the third quarter of the five years, 1901–1905.

The maximum temperature of the air during the quarter was 84·8° and the minimum 31·7°. The maximum heat in sun was 136·9°, and the minimum on the grass 27·0°.

Rain fell on 36 days during the quarter. The rain-fall measured 3·847 inches, being 4·423 inches below the average for the third quarter of the five years 1901–1905. The greatest monthly rain-fall was in August, when 1·882 inches were registered.

The wind blew on 32 days from S.W., on 18 days from W., on 8 days from N.W., on 5 days from S.E., on 3 days each from N., E., and S., and on 2 days from N.E., and the air was calm on 18 days at 9 A.M.

July.—The mean height of the barometer during this month was 30·002 inches; the highest reading (30·343 inches) was on the 9th at 9 A.M., wind W.S.W.; and the lowest (29·634 inches) on the 18th, at 9 P.M., wind W.S.W. The mean temperature of the air was 58·3°, the maximum registered was 75·8°, and the minimum 40·1°. The 5th was the warmest day and also the coldest night. The mean of the dry bulb was 58·1°, and of the wet bulb 55·7°. The maximum heat in sun was 134·3°, and the minimum on the grass 34·6°. The total amount of sunshine recorded was 184·7 hours, the greatest daily amount being 14·7 hours on the 4th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain fell on 13 days. The rain-fall measured 1·230 inches; the greatest amount in 24 hours was 0·305 inch on the 1st.

August.—The mean height of the barometer during this month was 29·916 inches; the highest reading (30·328 inches) was on the 28th at 9 A.M., air calm, and the lowest (29·428 inches) on the 13th, at 9 P.M., air calm. The mean temperature of the air was 61·2°, the maximum registered was 84·8°, and the minimum 39·4°. The 21st was the warmest day, and the 30th the coldest night. The mean of the dry bulb was 59·9°, and of the wet bulb 57·0°. The maximum heat in sun was 132·8°, and the minimum on the grass 34·0°. The total amount of sunshine recorded was 182·4 hours, the greatest daily amount being 13·1 hours on the 30th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain fell on 16 days. The rain-fall measured 1·882 inches; the greatest amount in 24 hours was 0·415 inch on the 24th.

September.—The mean height of the barometer during this month was 30·196 inches; the highest reading (30·590 inches) was on the 27th, at 9 A.M., air calm; and the lowest (29·488 inches) on the 14th, at 9 P.M., wind S.W. The mean temperature of the air was 53·9°; the maximum registered was 81·6°, and the minimum 31·7°. The 8th was the warmest day, and the 28th the coldest night. The mean of the dry bulb was 54·5°, and of the wet bulb 52·1°. The maximum heat in sun was 136·9°, and the minimum on the grass 27·0°. The minimum on the grass was below 32° on 10 nights. The total amount of sunshine recorded was 172·7 hours, the greatest daily amount being 12·7 hours on the 1st. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain fell on 7 days. The rain-fall measured 0·735 inch; the greatest amount in 24 hours was 0·190 inch on the 11th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of**W. N. Shaw, Sc.D., F.R.S.*

In compiling the following Table (pp. 216, 217), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind observations at Valencia are based on the records of a standard Robinson anemometer (factor 2.2). Velocities between 13 and 38 miles in the hour have been entered in the Tables as strong winds, velocities of 39 miles in the hour, or above, as gales. At the remaining stations the wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Donaghadee,	Do.
Belfast, Queen's College,	John Wylie, B.A.
Armagh, The Observatory,	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	Meteorological Office.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	J. H. Skeritt, for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Waterford,	J. N. White, Esq.

* The Hours of Observation are 9 a.m. and 9 p.m., local time, at all the Stations except Malin Head, Donaghadee. Cloud amount is observed at 10 a.m. and 10 p.m., and the Rainfall at 10 a.m.; and where also Greenwich time at Roche's Point, are based on the morning observations only. They are printed in different type to distinguish them.

† The Averages are based on observations as follows:—Rainfall 35 years, 1871-1905; Temperature 35 years, 1871-1905; Humidity 35 years, 1871-1905; Wind 35 years, 1871-1905; Direction of Wind 35 years, 1871-1905; Force of Moderate and Strong wind (force 4-7), the number of observations of Calm, and the number of days of Gale.

† The Sunshine Values for Dublin are obtained at the Mountjoy Observatory in the Phoenix Park, and the

Cloud.	Rain and other forms of Precipitation.				Weather, Number of days of								Wind Force (0-12).	Wind Direction. No. of Observations at 9 a.m. and 9 p.m.*

[illegible]

(a) See note (*), page 219.

The Registrars' Districts (827 in number) are sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same Unions formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District. The details concerning Births and Deaths in the above table for Districts marked thus (+) on pages 231 and 232 are extracted from the Weekly Returns made by the Registrars and relate to the 13 weeks extending from 1st July, 1906, to 29th September, 1906. With the exception of 78 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions, these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted. Exclusive of eight deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned. Formerly described as "Simple Continued Fever."

NOTE.—This table has been constructed for the years 1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1906—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

CARLOW ; *Bagenalstown*. — Three deaths registered at 80 years of age and upwards. District at present in a healthy condition.

CARLOW ; *Borris*. — District exceptionally healthy during the quarter.

CARLOW ; *Clonegall*. — Death-rate abnormally low during quarter.

CARLOW ; *Leighlinbridge*. — District healthy.

NEW ROSS ; *St. Mullins*. — District exceptionally healthy.

Dublin County.

DUBLIN SOUTH ; *Clondalkin*. — No cancer.

DUBLIN SOUTH ; *Crumlin*. — The district has been healthy for the last quarter.

RATHDOWN ; *Dundrum and Glencullen, No. 1*. — Ten cases of scarlatina in district.

Kildare County.

ATHY ; *Castledermot*. — Four cases of scarlatina during quarter. District otherwise healthy.

CELBRIDGE ; *Celbridge, W*. — One case of scarlatina reported; patient removed to hospital and recovered. House, clothing, &c. disinfected. No other case in district. District healthy.

CELBRIDGE ; *Kilcock*. — This district is at present exceptionally healthy. A large number of labourers' cottages are being built, and, when completed, they will be a great boon to the locality.

CELBRIDGE ; *Maynooth*. — District very healthy. No infectious disease.

EDENDERRY ; *Carbury*. — District very healthy. The death from whooping-cough is not certified. I have not heard of any other cases, except one in the same house.

EDENDERRY ; *Rathangan, No. 1*. — The death of a girl, aged 16 years, was registered during quarter from chronic phthisis. Her mother, about fourteen years ago, also died from phthisis. Three uncles also died from phthisis just as they had reached their majority. Her aunt died from phthisis, also the aunt's husband, both aged about 33 years. This girl's mother underwent the Dr. Koch serum cure, about a year before her death; she was very nearly dying under the operation. They are the most respectable and independent people in the locality; their dwelling-houses are very large and commodious, no overcrowding or contagion, purely hereditary.

NAAS ; *Kildare*. — Sanitary condition good.

NAAS ; *Naas and Carragh, W*. — A few cases of diarrhoea took place in this district, but none were severe.

Kilkenny County.

CALLAN ; *Callan, W*. — One case of cancer. One death was registered of a man aged 106 years. District very healthy.

CALLAN ; *Kilmaganny*. — District healthy.

CASTLECOMER ; *Ballyragget*. — Sanitary arrangements very fair. All the diseases named in the abstracts absent.

CASTLECOMER ; *Castlecomer, W*. — The district is at present free from any epidemic.

KILKENNY ; *Tullaroan*. — One sewer in the village requires immediate attention. Otherwise the district is healthy.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—Vaccination very well attended, both at Thomastown and here. The lymph very satisfactory, supplied from L. G. B. Department.

THOMASTOWN; *Knocktopher*.—The district has been free from zymotic diseases during the quarter.

URLINGFORD; *Balleen*.—Sanitary state of district fairly satisfactory.

URLINGFORD; *Urlingford, W.*—Health of the district good. No epidemics.

WATERFORD; *Kilmakevoge*.—No death from cancer. District very healthy. In the registration of deaths there were two men, aged 76 and 71 years, and two aged 73 and 75 years.

WATERFORD; *Ullid*.—Vaccination suspended owing to an epidemic of whooping-cough. Diseases due to intestinal disorders have been unusually prevalent from the time that flies appeared in the houses.

King's County.

BIRR; *Banagher*.—District healthy.

BIRR; *Birr W.*—One case of scarlatina and one case of enteric fever occurred during the quarter. No deaths from zymotic disease were recorded, except one from whooping-cough.

BIRR; *Ferbane*.—District healthy.

BIRR; *Frankford*.—Deaths registered of individuals whose ages were respectively—82, 81, 78, 75 (2), 74 and 67 years.

BIRR; *Killyon*.—Of the three deaths recorded this quarter all were of a pulmonary nature, two of which were tubercular. Health of the district otherwise very good.

BIRR; *Kinnitty*.—In last month of quarter tonsillitis has been prevalent. The water supply in one townland is bad, the pump not giving water, and the well near the village open to pollution by animals and fowl.

EDENDERRY; *Rathangan, No. 2*.—No birth registered for last six months, and only one death registered during quarter.

MOUNTMELICK; *Clonygowan, No. 2*.—District during quarter has been very healthy.

ROSCREA; *Roscrea, No. 2*.—Vaccination postponed during the summer. The health of the district very good for the last quarter. No case of phthisis or any other form of tubercular disease treated by me in the district, and, as far as I am aware, no case exists.

ROSCREA; *Shinrone*.—Both birth and death rate for quarter much below average. Sanitary condition of district good.

TULLAMORE; *Killoughy*.—Two cases of scarlatina during the quarter. District fairly healthy.

TULLAMORE; *Philipstown*.—District fairly healthy.

Longford County.

BALLYMAHON; *Abbeyshrule*.—One case of typhus fever occurred in the district during the quarter. The patient was sent to the fever hospital, and made a good recovery. The disease did not spread. The district is fairly healthy.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee*.—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Granard, W.*—The district is in good sanitary condition and free from any infectious or contagious disease.

GRANARD; *Scrabby, No. 2*.—The sanitary condition of this district is good. There is registered the death of a woman at the age of 101 years. Nearly all the deaths registered during the quarter are from old age.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy. One death registered at 100 years of age.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Termonfeckin*.—A few cases of measles and whooping-cough occurred in one village, the epidemic not spreading to other divisions of the district. The district, excepting this localized epidemic, was healthy and free from infectious disease.

DUNDALK; *Barronstown*.—The district has been for past quarter in an exceptionally healthy state and free from zymotic disease. Of 12 deaths registered, 10 deaths occurred at the ages of 95, 90, 85, 80, 75 (two), 70, 69, and 2 at 61 years, respectively.

DUNDALK; *Dromiskin*.—District in healthy state.

Meath County.

ARDEE; Collon, No. 2.—District very healthy.

ARDEE; Drumcondra.—District healthy.

DROGHEDA; St. Mary's.—The sanitary state of the district is good.

DROGHEDA; Stamullen.—District in a healthy state during quarter.

DUNSHAUGHLIN; Killeen.—The health of the district is good, save for tuberculosis, which is prevalent.

DUNSHAUGHLIN; Ratoath, W.—The sanitary condition of the district is good.

KELLS; Kilskeer.—District healthy.

KELLS; Moynalty.—The district is very healthy at present.

KELLS; Nobber.—The health of the district is good. The five deaths noted as "60 years and upwards" average 68.4 years.

OLDCASTLE; Oldcastle, W.—This district continues in a very satisfactory condition.

TRIM; Athboy.—The sanitary condition of district is good.

TRIM; Summerhill.—District has been in a fairly favourable state as to public health, and no epidemic disease has prevailed. Sanitary condition also improved.

Queen's County.

ABBEYLEIX; Ballinakill.—Health of district very good.

MOUNTMELICK; Clonaslee.—Among the deaths registered during the quarter, two were attributed to tuberculous disease and one to cancer. Otherwise the health of the district is very good.

MOUNTMELICK; Clonygowan, No. 1.—District healthy.

MOUNTMELICK; Mountmellick W.—Pneumonia very prevalent.

MOUNTMELICK; Mountrath.—District healthy.

ROSCREA; Borris-in-Ossory.—The health of this district has been fair during the past quarter.

Westmeath County.

MULLINGAR; Ballynacarrigy.—The death rate from pulmonary tuberculosis amounts to about 40 per cent. of total, or, excluding two deaths in children, to 50 per cent., or 60 per cent. of the total number of certified deaths. Comment would indeed be superfluous.

MULLINGAR; Castletown Geoghegan.—The sanitary condition of district fairly good. No case of zymotic disease reported.

MULLINGAR; Milltown.—Throughout the district, in farmyards and localities where pigs are kept it was next to impossible to keep down the offensive odours for the past fortnight and during the last week of August. But fortunately the district is free from all epidemic and contagious diseases. Both births and deaths are numerically lower (especially the deaths) last quarter compared with the September quarter of last year. The death registered from phthisis was a returned American, a young woman, 31 years, and unmarried. There were no deaths from cancer registered.

MULLINGAR; Mullingar, W.—Health of district fairly good.

Wexford County.

ENNISCORTHY; Newtownbarry.—There were three cases of typhoid fever during the quarter. There have been only two other cases during the previous ten years.

GOREY; Camolin.—No infectious disease came under my notice during the quarter.

NEW ROSS; New Ross, W.—District in a healthy condition.

Wicklow County.

BALTINGLASS; Kiltegan.—The health of the district continues satisfactory. Of two cases under "cancer" heading one was certified as "cancer of uterus," the other "malignant disease (liver) with ascites." The only young person who died suffered from congenital malformation.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The health of the district has been good.

RATHDRUM; Annamoe.—District healthy during the quarter.

SHILLELAGH; Tinahely.—One of the deaths (a female) took place in January, 1898, but it was not registered until this quarter; leaving the actual number of deaths of district for the quarter, 9 males, 4 females, total 13.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; Ballyvaghan, W.—Mortality very low as usual. Only twelve deaths occurred, the average of whose ages is 72 years.

CORROFIN; Corrofin, W.—Health of district good. Some cases of very mild pertussis. Vaccination not what it should be

ENNIS; Crusheen.—Health of the district good.

ENNIS; Ennis, No. 1, W.—Tuberculosis is very prevalent.

ENNIS; Newmarket—The health of the district has been good during the quarter.

ENNISTIMON; Ennistimon, W.—The sanitary arrangements are satisfactory. Whooping-cough is prevalent in portions of the district.

ENNISTIMON; Roadford.—District very healthy. Sanitary arrangements very fair.

KILLADYSERT; Labasheeda.—District healthy.

KILRUSH; Carrigaholt.—The health of district continues very good.

KILRUSH; Kilkee.—Health of district good. No epidemic disease present. Sanitary condition of district fairly good.

KILRUSH; Kilmihil.—I am thankful to say that my district still continues in a very healthy condition, the number of deaths for the quarter being only seven, four of which were of persons over 60 years old.

KILRUSH; Kilrush, W.—There has been no disease of an exceptional nature during the quarter.

LIMERICK; Bridgetown.—District healthy.

LIMERICK; Coolacasey.—The sanitary condition of the district is satisfactory. One death from cancer and one from pulmonary tuberculosis registered.

SCARRIFF; Annacarriga.—Influenza prevalent.

SCARRIFF; Feakle.—District very healthy.

SCARRIFF; Mountshannon, W.—District in good sanitary condition generally.

TULLA; Quin.—Sanitary arrangements of district very fair. None of the diseases named in the abstracts prevalent, except that there is one case of enteric fever.

Cork County and County Borough.

BANDON; Inishannon.—The health of the district has been good with the exception of an outbreak of enteric fever in the Industrial School at Upton; the cause has been traced to the boys having drunk water out of a tank not fit or meant for drinking.

BANTRY; Bantry W.—Health of the district very good.

BANTRY; Durrus and Kilcrohane.—District very healthy. One case registered from phthisis pulmonalis (tubercular); could find no family history.

BANTRY; Glengarriff.—Sanitary condition of district is good. No infectious disease.

BANTRY; Kealkill.—Sanitary condition of district is fairly good. No infectious disease during quarter. No case of malignant disease.

CASTLETOWN; Castletown, W.—District very healthy.

CASTLETOWN; Kilcatherine.—District healthy.

CLONAKILTY; Clonakilty, W.—Some whooping-cough.

CORK; Dripsey.—The district is healthy and sanitation good—a good deal due to the dry weather.

DUNMANWAY; Dunmanway, W.—District healthy. No epidemic prevalent. Most of the deaths were due to old age.

FERMOY; Ballynoe.—There was very little illness in this district during the past quarter.

FERMOY; Kilworth.—Village of Kilworth requires draining.

KILMALLOCK; Charleville.—There have been seven cases of typhoid fever. The sanitary arrangements are fairly good.

KINSALE; Ballyfeard.—Health of district good.

KINSALE; Carrigaline.—Sanitary condition of district good.

MACROOM; Slieveveagh.—Condition of district healthy.

MALLOW; Ballyclogh.—District healthy.

MALLOW; Buttevant.—The sanitary state of district is satisfactory.

MALLOW; Doneraile.—District very healthy.

MALLOW; Kilshannig.—There was one death from cancer of stomach registered during the quarter. There was an epidemic of whooping-cough in the district during quarter.

MALLOW; Rahan.—Four cases of diphtheria have occurred in this district during the past quarter. No deaths from it.

MIDDLETON; Aghada.—Five deaths out of the 14 registered were due to phthisis. I am inclined to think that this disease is due more to the lowering of constitutional resistance by partaking of an inferior quality of food than to unsanitary surroundings.

MIDDLETON; Castlemartyr.—District very healthy. No deaths from tuberculous disease during quarter.

MIDDLETON; Walshtownmore East.—District healthy.

MILLSTREET; Cullen.—Three cases of pyrexia have been removed to fever hospital. Whooping-cough has been prevalent during the quarter.

MITCHELSTOWN; Mitchelstown, No. 1, W.—District free from any form of contagious disease except a few isolated cases of whooping-cough, in consequence of which vaccination is postponed, and not performed for some time past.

SKIBBEREEN; Tullagh.—Three cases of diphtheria and two cases of typhus fever.

SKULL; Goleen.—Diarrhoea was very prevalent during the early part of the quarter. This I attribute to the polluted state of village water, it being consumed in large quantities by the school children. The one death registered from tuberculosis was that of a girl recently returned from America, where she contracted the disease.

Kerry County.

CAHERSIVEEN; Caher, W.—The district is in fairly good sanitary condition.

CAHERSIVEEN; Darrynane.—The sanitary condition of district is fairly satisfactory, but owing to the numerous cases of phthisis cropping up in this district from time to time, the disease should be made notifiable and prompt measures taken to isolate the infected patients, and disinfect the premises when practicable.

CAHERSIVEEN; Glanbehy.—No cases of cancer in my district. Sanitary state of district good.

CAHERSIVEEN; Valencia.—District healthy. No epidemic.

DINGLE; Castlegregory.—There was no death from cancer.

DINGLE; Dingle, W.—The district has been very healthy for the last three months.

KILLARNEY; Killarney, No. 2.—Vaccination backward owing to warm weather, holidays, and infantile cholera. I had several cases of the latter in my district, and a number of deaths in children aged 6 months and under. This disease was in every case due to improper feeding. Of late years it is a well-known fact that mothers shirk the responsibility of motherhood. They give various reasons, but the real one is that suckling the child is too much trouble, and interferes with social functions (of course there are some mothers who cannot). Heretofore this happened in higher circles, but now it is quite common in the middle and poorer classes. In the first, skilled nursing and scientific feeding can be procured, but in the second, and especially in the third, these are very much neglected. How often one sees the unfortunate infant suckling out of a bottle having a tube a foot long!—a bottle and tube that it is impossible to clean. Mothers, again, have no idea of what the strength of the

"milk" should be. Very often an infant a month old gets "milk" strong enough for a babe of six months. Then, again, a child gets a bottle full of milk, takes its fill, and in a few hours' time gets the remainder; the mother not taking into account what changes may have taken place in the meantime. The feeding bottle was the cause of all the infantile diarrhoea in my district, and I think the sale of those bottles should be prohibited by the State.

KILLARNEY Milltown.—The health and sanitary condition of the district good. No contagious or infectious disease prevalent. Diarrhoea of a severe type has prevailed in a large portion of the district during the last ten days. One death, source cannot yet be traced.

LISTOWEL; Ballyhorgan.—District is in a sanitary state.

LISTOWEL; Ballylongford.—District fairly healthy for quarter. A few cases of enteric fever, caused by milk, ordered to hospital. Vaccinations postponed. Sanitary condition of Ballylongford requires improvement.

LISTOWEL; Listowel, W.—Sanitary state of district satisfactory.

TRALEE; Ardfer.—District very healthy; sanitary arrangements very good.

TRALEE; Castlemaine.—Owing to typhoid fever in the district, parents were slow in bringing in their children for vaccination.

TRALEE, Kilgobban.—Children are not brought for vaccination regularly. There is no trained midwife, and females are attended during labour by unskilled persons.

TRALEE; Tralee, No. 1, W.—The district at present is healthy, and no zymotic diseases are present. The houses, yards, and manure heaps are being put in a good sanitary condition, particularly when notified by the sanitary authority.

Limerick County and County Borough.

CROOM; Castletown.—A very healthy quarter. No case of infectious disease.

KILMALLOCK; Bruree.—Had two cases of typhoid fever and two of scarlatina during the quarter. The number of deaths registered is unusually small, namely, three,

KILMALLOCK; Hospital.—District healthy.

KILMALLOCK; Kilfinnane.—District healthy.

LIMERICK; Annacotty.—Sanitary arrangements very fair; district very healthy.

LIMERICK; Limerick, No. 3.—There were a few cases of enteric fever in the district during the quarter. Otherwise the health of the district has been good.

LIMERICK; Moroe.—Unusually small number of deaths registered. Also unusually small number of vaccinations. This was due to the fact that there was an outbreak of diphtheria, and it was not considered desirable to encourage children being brought out. Diphtheria not allowed to spread beyond one house.

LISTOWEL; Glin.—During the quarter just ended two cases of enteric fever occurred, which were removed at once to the Listowel fever hospital. One of the foregoing cases occurred in the Glin district school, and the other occurred in the western part of the Glin dispensary district. Both are now quite convalescent.

MITCHELSTOWN; Galbally.—District exceptionally healthy.

MITCHELSTOWN; Mitchelstown, No. 2.—There is no form of contagious disease prevalent in district. A few cases of whooping-cough. Vaccination is postponed.

NEWCASTLE; Abbeyfeale.—No case of cancer.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair.

NEWCASTLE; Feenagh.—The health of the district is good.

NEWCASTLE; Newcastle, W.—Many children for last fortnight suffering from diarrhoea and some from bronchitis. Otherwise district healthy.

RATHKEALE; Askeaton.—During the past quarter the district was entirely free from all epidemic or contagious diseases.

RATHKEALE; Pallaskenny.—The sanitary arrangements are fairly good.

RATHKEALE; Rathkeale, No. 1, W.—Births 28, deaths 26. Six of the deaths occurred in the workhouse. Eight died under one year.

RATHKEALE; Rathkeale, No. 2.—My district was free from all contagious diseases during the quarter.

TIPPERARY; Grean.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; Terryglass.—District healthy. No epidemic.

NENAGH; Nenagh, W.—Two cases of scarlatina have occurred in the district. Otherwise the district is healthy.

NENAGH; Newport.—District fairly healthy. No epidemic of any infectious disease.

NENAGH; Portroe.—There was an epidemic of influenza with bronchial complications, especially amongst children,

ROSCREA; Bourney.—The sanitary arrangements are considered good, and no infectious diseases have been reported.

THURLES; Moyné.—District healthy.

THURLES; Templemore.—The health of the district is good. No prevailing disease.

Tipperary County, South Riding.

CALLAN; Ballingarry.—The health of the district during the quarter was remarkably good.

CALLAN; Mullinahone.—Sanitary condition of district fairly good. District exceptionally healthy. No known case of cancerous disease in district.

CASHEL; Cashel, W.—There is registered one death during quarter in which the age is stated to be 101 years.

CASHEL; Killenale.—Very few vaccinations owing to warm weather. Two cases of tuberculosis—one "tuberculous meningitis boy, seven years old." Health of district good.

CASHEL; Kilpatrick.—District is free from zymotic disease.

CLOGHEEN; Ardfinnan.—Out of eight deaths there are four uncertified deaths, and those occurred amongst the farming class, who might have afforded themselves the care of a medical attendant.

CLOGHEEN; Caher.—No cases of an epidemic character occurred during past quarter. Sanitary state of district good.

CLOGHEEN; Clogheen, W.—District healthy.

CLONMEL; Kilsheelan, No. 1.—No case of zymotic disease.

TIPPERARY; Bansha.—District healthy.

TIPPERARY; Cappagh.—The district is healthy.

TIPPERARY; Emly.—District very healthy.

TIPPERARY; Golden.—District is healthy.

TIPPERARY; Tipperary, W.—The district has been in a healthy condition during quarter.

URLINGFORD; Kilcooly.—The district has been very healthy during past quarter. Sanitary arrangements good.

Waterford County and County Borough.

CARRICK-ON-SUIR; Rathgormuck.—We have had one case of enteric fever; otherwise the district is healthy.

CLONMEL; Ballymacarbry.—Sanitary condition fair. Death of one woman registered at 90, one man at 83, two women at 80, one man at 72, and one woman at 70 years.

CLONMEL; Kilsheelan, No. 2.—No case of zymotic disease.

DUNGARVAN; Dungarvan, W.—District healthy during past quarter.

DUNGARVAN; Seskinan.—The district has been healthy during past quarter. Vaccination well attended to—very few defaulters.

DUNGARVAN; Whitechurch.—One case of diphtheria and one of typhoid fever during the quarter.

LISMORE; Cappoquin.—The district has been remarkably free from any serious illness during the quarter.

LISMORE; Tallow.—District free from zymotic diseases. Sanitary condition good.

WATERFORD; Woodstown.—Cases of whooping-cough have occurred, but, on the whole, the health of the district has been good.

YOUGHAL; Ardmore.—District healthy.

YOUGHAL; Clashmore.—Vaccination postponed owing to epidemic of influenza.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Doagh.—The district has been in a fair sanitary condition during the quarter. No notifications under the Act.

ANTRIM; Randalstown.—There is at present an epidemic of chickenpox and also of mumps in the district.

ANTRIM; Templepatrick.—The sanitary arrangements of the district are fairly good.

BALLYCASTLE; Ahoghill.—Health of district satisfactory. One case of typhoid fever of a mild type. A few cases of whooping-cough, but of a mild form. District healthy otherwise.

BALLYMENA; Ballymena, W.—Whooping-cough and, more recently, epidemic diarrhoea have been prevalent amongst children.

BALLYMENA; Broughshane.—The sanitary arrangements and health of the district very good.

BALLYMENA; Clogh.—Health of district very good; sanitary arrangements fair. The reason for so many uncertified deaths is that a large number of the cases died from old age—eleven out of fifteen being over 60 years.

BALLYMENA; Portglenone.—Health of district very good. No epidemic disease during quarter.

BALLYMENA; Toome.—Health of the district good. Registered during the quarter the death of a woman 102 years.

LARNE; Ballycarry.—Health of district good; no epidemic disease.

LISBURN; Dunmurry.—The sanitary condition of this district good.

LISBURN; Glenavy.—One sporadic case of diphtheria; ample preventive measures probably checked its spreading. High tubercular average still.

LISBURN; Knocknadona.—The sanitary condition of this district is good. There was no death from cancer.

LISBURN; Lisburn W.—A death was registered as having been caused by cancer which occurred in the union infirmary; the patient was admitted from Belfast, and I was unable to find out particulars of family history.

LURGAN; Aghalee.—There were 11 deaths registered; the average age is 69 years, and these include one aged 19 and another 32 years. The oldest was aged 93 years, another 89, also one 88.

Armagh County.

ARMAGH; Keady.—Measles is prevalent in the district.

ARMAGH; Markethill.—District has been very healthy during the past quarter. There is a very great difference in the number of male and female births for this quarter; also the large number of female deaths. This may affect the population if it continues.

ARMAGH; Rich Hill.—District very healthy. Of the nine deaths registered only one was under 60 years of age.

ARMAGH; Tynan.—A slight epidemic of mild cases of measles, from which there was no death. Sanitary state of district satisfactory.

CASTLEBLAYNEY; Newtownhamilton, No. 1.—Scarlet fever (very mild type) and measles very prevalent. Three cases of enteric fever and one of diphtheria.

LURGAN; Lurgan, No. 2.—The district is in a good sanitary condition and free from any infectious disease.

NEWRY; Meigh.—The number of deaths from cancer or malignant disease was very large, being about 44 per cent. of the total deaths.

NEWRY; Mullaghglass.—District healthy.

Belfast County Borough.

BELFAST; Belfast Urban, No. 11.—There has been a considerable number of cases of diarrhoea during the quarter, but, with this exception, the health of the district has been good.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—There was a mild epidemic of measles during the quarter.

BAILIEBOROUGH; Termon.—Sanitary condition of district fairly good.

BAWNBOY; *Swanlinbar*.—Vaccination was slack, owing to the prevalence of whooping-cough.

CAVAN; *Ballyhaise*.—District in fair sanitary condition.

CAVAN; *Bellanagh*.—Registered one death from typhoid fever, and received report of another.

COOTEHILL; *Drum, No. 2*.—District in fairly good sanitary condition.

COOTEHILL; *Tullyvin*.—District healthy and free from contagious diseases. Of those whose deaths were registered during the quarter, 68·75 per cent. had reached the age of 60 years or over, and 43·75 per cent. 70 years or over.

ENNISKILLEN; *Holywell, No. 2*.—The sanitary condition of the district is fairly good. Whooping-cough is prevalent, and likely to interfere with the performance of vaccination. There is no other form of infectious disease.

GRANARD; *Scrabby, No. 1*.—During the past quarter there were three cases of German measles in district; all were isolated as much as possible, and school closed; have not seen any other case of it.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—The sanitary arrangements of the district fairly good, but the water supply is still bad.

DONEGAL; *Dunkineely*.—District healthy; no case of infectious disease reported during quarter. Sanitary condition improving steadily.

DONEGAL; *Laghy*.—The sanitary arrangements of the village are very defective, and there is no water supply.

DONEGAL; *Mountcharles*.—There has been an epidemic of whooping-cough and measles in the district during the quarter. Four deaths from whooping-cough have been registered.

DONEGAL; *Pettigoe*.—The sanitary arrangements in this district are not good. In the houses of the poor in this district there are practically no windows in the back and side walls, and, therefore, they can have no proper ventilation and no sunshine in their houses. I believe this is one of the causes for so many cases of tuberculosis in this country.

DUNFANAGHY; *Crossroads*.—The district is healthy; no epidemics during quarter.

DUNFANAGHY; *Dunfanaghy, W*.—Measles epidemic declining; no fatal cases.

GLENTIES; *Carrick*.—There has been no epidemic for the last quarter in this district. The sanitary condition is fairly good.

GLENTIES; *Doocherry*.—District healthy.

GLENTIES; *Dunglow, No. 1*.—Typhus fever, which caused one death, was confined to one family, and was clearly traceable to second-hand clothes. There still occurs an occasional case of typhoid fever, which, I believe, we will never be rid of until Dunglow is furnished with a proper water supply.

GLENTIES; *Killybegs*.—Sanitary condition fairly satisfactory.

INISHOWEN; *Carndonagh, W*.—The district is fairly healthy.

INISHOWEN; *Malin*.—District healthy. There were a few cases of a mild type of whooping-cough during quarter.

LONDONDERRY; *Burt*.—Whooping-cough and mumps were prevalent; also a number of cases of measles.

LONDONDERRY; *Killea*.—A very severe and widespread epidemic of measles and whooping-cough during the quarter, which is now almost exhausted. No vaccination since beginning of July owing to this.

MILLFORD; *Fanad*.—Case of typhus fever and cases of diphtheria registered occurred in previous quarter. There was one death from diphtheria in this quarter which has not yet been registered.

MILLFORD; *Rathmullan*.—District has been healthy during quarter.

STRABANE; *Raphoe*.—Measles prevalent during July and August. District at present free from infectious disease. Sanitary arrangements satisfactory.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon*.—A ruin in a graveyard, used as a school, is the greatest danger to the health of this district.

Down County.

BANBRIDGE; *Ballyward*.—Sanitary state of district fairly good. Some cases of scarlatina, one death; patient's mother did not apply for medical relief, and the child died unattended medically.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are good. Scarlatina was prevalent in the townlands of Ballybrick, Ballynamagna, and Grallaghgreenan in the month of July; The majority of the cases were mild. There was one death.

DOWNPATRICK; Ballynahinch.—The health of the district has been about average during the quarter. There have been cases of whooping-cough in some parts of the district.

DOWNPATRICK; Downpatrick, W.—Two of the primary vaccinations were of children born out of district.

DOWNPATRICK; Killyleagh.—There has been an epidemic of whooping-cough in the district during the quarter. Two deaths from the disease. Out of the 22 deaths registered, four are attributed to tuberculous disease. I have under observation three more cases of this disease in the last stages. If there was an abundant supply of good water in two villages, I should say that the sanitary condition of the district was excellent.

DOWNPATRICK; Portaferry.—Two cases of diphtheria occurred in the last month of the quarter, and are convalescent. There are still some cases of whooping-cough.

KILKEEL; Kilkeel, No. 2, W.—Health of district excellent.

LISBURN; Annahilt.—Health of district good, except some whooping-cough.

LISBURN; Drumbeg.—Births about, and deaths under, the average. No infectious disease, except one case of scarlatina, which ended fatally, but the death was not registered during the quarter. The uncertified deaths were chronic cases, and had not been under medical treatment for a long time.

LISBURN; Saintfield.—The health of the district has been very good. There have been only four deaths for the quarter, none of these being under fifty.

LURGAN; Moira.—Whooping-cough has been prevalent in the district for a considerable period, and at times severe; four deaths are registered from this cause. The death rate is higher than usual this quarter. Cancer accounts for three deaths. There is now no epidemic in the district.

LURGAN; Waringstown.—District healthy; death rate low.

NEWRY; Donaghmore.—District very healthy. Sanitary matters in good state.

NEWRY; Newry, No. 1—One death from membranous croup.

NEWRY; Rathfriland.—Births about, deaths below, average. Scarlatina caused four deaths, two of them had not been seen by a medical man before death.

NEWTOWNARDS; Bangor.—Sanitary arrangements good. Zymotic enteritis very prevalent during last month; one death resulted. Vaccination well carried out.

NEWTOWNARDS; Comber.—Health of district very good, an occasional case of scarlatina cropping up—about two in the quarter or three. All are removed to hospital; otherwise no epidemic.

NEWTOWNARDS; Greyabbey.—Births and deaths about average. Three cases of scarlatina present last week of quarter, and removed to hospital. Disinfection attended to. General health of district good.

NEWTOWNARDS; Kilmood.—Only six deaths registered during the quarter; health of the district excellent.

NEWTOWNARDS; Newtownards, W.—There has been of late a good deal of *gastro-enteritis* in the district. There have been a few cases of scarlatina, but no general outbreak. The chief sanitary defects are want of watertight sewers and pure water. There is every prospect of having these two defects rectified in the near future.

Fermanagh County.

CLONES; Rosslea.—The death from measles occurred on the 10th February last; it was that of a child aged 11 months. There was no medical attendant, and the cause of death is entered as "probably measles."

ENNISKILLEN; Enniskillen, W.—Sanitation fairly good.

ENNISKILLEN; Florencecourt.—Whooping-cough prevalent during quarter. Sanitary state of district fairly satisfactory.

ENNISKILLEN; Holywell, No. 1.—The public health of the district is good, with the exception of whooping-cough, which is prevalent.

IRVINESTOWN; Clonelly.—District healthy.

IRVINESTOWN; Ederney.—District healthy. One death registered at 96 years.

IRVINESTOWN; Irvinestown, W.—Health of district fairly good. A few cases of mumps have appeared in Irvinestown. During quarter two cases of typhus and one of diphtheria were admitted to Workhouse Hospital from other districts; all have been discharged cured. Sanitary state of majority of yards in the town is bad.

LISNASKEA; Derrylin.—A severe epidemic of pertussis has been and still is in the district. Sanitary arrangements of district primitive. Phthisical diseases always present and fairly numerous in the district. There have been a few cases of measles in the district during the quarter.

LISNASKEA; Lisnaskea, W.—Sanitation of district fair. Vaccination is being carried out efficiently.

Londonderry County and County Borough.

COLERAINE; Aghadowey.—District healthy.

COLERAINE; *Garvagh*.—Health of district during the quarter particularly good. Deaths chiefly aged people.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—The health of the district has been very good during the past quarter. The water supply to the town of Portstewart has been very scarce during the latter end of July and the month of August, and I fear unless an extra supply is acquired to supplement our present source that ill health must result, as the sewers have not been properly flushed for some time past. This question has been discussed by the Rural Council, but nothing has yet been done.

LIMAVADY; *Bellarena*.—Whooping-cough was prevalent throughout the past quarter, and somewhat delayed vaccination.

LIMAVADY; *Dungiven*.—Sanitary condition satisfactory. Mortality considerably below average; majority principally attributable to senility. No death from cancer or any form of tuberculosis.

LIMAVADY; *Limavady, W.*—Some whooping-cough but no deaths. District otherwise free from disease or illness.

LONDONDERRY; *Eglinton*.—One case of cancer—no family history; and one case of malignant uterine tumour.

MAGHERAFELT; *Moneymore*.—Death-rate low; district healthy. No infectious disease of any kind occurred in district during quarter. Sanitary conditions are satisfactory.

Monaghan County.

CARRICKMACROSS; *Donaghmoyne*.—Pertussis and measles present in the district, but now on the wane. One case of scarlet fever reported.

CASTLEBLAYNEY; *Ballybay*.—The two deaths from cancer registered were cases of cancer of the breast. Several cases of scarlatina occurred in the district.

CASTLEBLAYNEY; *Castleblayney, W.*—The health of the district was good during the quarter, with the exception of tuberculous diseases, to which four deaths were attributed, and measles, from which three were certified. The number of uncertified deaths is smaller than usual.

COOTEHILL; *Dawsongrove*.—The sanitary condition of the district is fairly good.

COOTEHILL; *Drum No. 1*.—Sanitary condition of the district fairly good, with the exception of one village, which has not any potable water supply.

MONAGHAN; *Castleshane*.—There has been one case of diphtheria. District sanitary.

MONAGHAN; *Emyvale*.—Sanitary condition of the district is very fair. There was one case of scarlet fever during the quarter. Vaccination is up to the average.

MONAGHAN; *Kilmore*.—District healthy.

MONAGHAN; *Monaghan, W.*—The sanitary conditions of the district remain satisfactory. There has been no epidemic during the quarter, and as a remarkable feature in the returns I may mention that there has been registered but one child's death during the three months ending 30th September.

MONAGHAN; *Scotstown*.—The district is in a good sanitary condition.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory. No epidemic. Five cases of diphtheria, which got well very soon by antitoxin treatment.

CASTLEDERG; *Drumquin*.—The sanitary arrangements of the district are satisfactory, with no infectious disease of any sort.

CASTLEDERG; *Killeter*.—One death from cancer. State of district healthy.

CLOGHER; *Aughnacloy*.—Health of district satisfactory.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter, and the death rate low. There were a few cases of scarlatina.

COOKSTOWN; *Coagh*.—Health of district good.

COOKSTOWN; *Cookstown, W.*—Owing to an epidemic of whooping-cough the vaccination has diminished.

COOKSTOWN; *Pomeroy*.—I have recommended the introduction of a new sewerage scheme for Pomeroy. The district is generally healthy.

COOKSTOWN; *Stewartstown*.—There were two deaths registered during the quarter from typhoid fever. Six deaths from all forms of tuberculous disease were registered during quarter, out of fifteen deaths from all causes.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Four cases of scarlatina; all recovered. Measles in epidemic form attacked many children, in the majority of cases complicated with broncho-pneumonia; no deaths.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good.

DUNGANNON; *Coal Island*.—Only one case of infectious disease notified during quarter (erysipelas), origin unknown. The district is at present in a healthy condition.

IRVINESTOWN; *Trillick*.—Of the deaths registered during the quarter two were registered at the age of 80, one 77, one 73, one 72, one 71, and one 70. There were three deaths from tubercular disease, two from cancer, and one from diphtheria.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are very satisfactory. None of the principal epidemic or other diseases are at present prevalent.

OMAGH; *Fintona*.—The health of the district has been very good during the past quarter. The sanitary arrangements are satisfactory.

OMAGH; *Gortin*.—Bad sanitary arrangements in district.

OMAGH; *Omagh, No. 1, W.*—Four cases of typhoid fever as well as eleven cases of tuberculosis occurred in the district asylum. Uncertified deaths—two were infants, one a day old, in urban district; three of advanced years, in rural district. Sanitation in urban district continues to improve; in the rural the same unsatisfactory condition remains as already reported. Milk and butter stored in dwelling-house, and, in some instances, in the sleeping apartments; manure heaps and cess-pools in front of dwelling-houses, neglect of cleanliness in byres and out-houses.

OMAGH; *Omagh, No. 2*.—The district is in good sanitary condition. No epidemic of any kind.

OMAGH; *Sixmilecross*.—The district and villages are at present in a very good sanitary condition.

STRABANE; *Dunnamanagh*.—There has been an epidemic of measles in the district this quarter, but no deaths from same.

STRABANE; *Newtownstewart*.—The three uncertified deaths are those of people not qualified to receive poor-law medical relief. No uncertified deaths among those so qualified.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Roundstone, No. 1*.—District healthy; no epidemic disease.

CLIFDEN; *Roundstone, No. 2*.—Health of the district satisfactory.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district very good.

GALWAY; *Oranmore*.—An outbreak of typhoid fever occurred during last quarter. Eight cases came under my notice; none died. The district is supplied with very bad wells.

GALWAY; *Spiddle*.—Health of district good.

GORT; *Ardrahan*.—In trying to trace the cause of the complex symptoms of a condition met by me in medical practice—a general disorder of nutrition marked by anæmia, dyspepsia, constipation with want of energy, lassitude and mental depression, I found that it is due to a relative want of salt (sodium chloride) in the dietary of a vegetarian people, and in whom the large ingestion of potash salts (potatoes contain 22 parts potash per thousand, .99 soda, 1.17 chlorine) is not met by a sufficient ingestion of NaCl. I find that cattle (with very rare exceptions) do not get salt either in pasture, hay, or with roots; that agricultural experts do not think it necessary. I consider the matter deserving of more careful inquiry than I can give it. I have given it careful study, and cannot from space go further here.

GORT; *Gort, W.*—The health of the district has been very good during quarter.

GORT; *Kinvorra*.—There has been an epidemic of whooping-cough amongst children during the quarter. A few developed broncho-pneumonia, and there were about 4 or 5 deaths, one of which was registered. There were some cases of catarrhal jaundice amongst children.

LOUGHREA; *Bullaun*.—Of the thirteen deaths registered seven were aged 60 and upwards, one being 78 years.

OUGHTERARD; *Cloonbur, No. 1*.—Health of district very good; no zymotic disease prevalent.

OUGHTERARD; *Cloonbur, No. 2*.—Sanitary arrangements fair.

PORTUMNA; *Eyrecoort*.—The general condition of district healthy.

PORTUMNA; *Portumna No. 1, W.*—Nearly all the deaths registered this quarter were caused by old age. There were few deaths, because the district has been to a great extent free from any serious disease.

TUAM; *Tuam, No. 2*.—One case of diphtheria, which proved fatal; no other case came under observation. Three cases of enteric fever at end of quarter, which are recovering; otherwise district healthy.

Leitrim County.

BALLYSHANNON; *Kinlough*.—Out of thirteen deaths registered seven were over 80 years.

BAWNBOY; *Ballinamore*.—Sanitary state of district good.

CARRICK-ON-SHANNON; *Jamestown, W.*—Vaccination postponed owing to whooping cough in district.

MANORHAMILTON; *Drumhaire*.—The public health of the district has been good for the past quarter. The sewerage of the village is still defective; otherwise the sanitation of the district is fairly good.

MANORHAMILTON; Lurganboy.—District healthy during the quarter.

MOHILL; Carrigallen.—The health of the district has been exceptionally good during the quarter, but for the occurrence of four cases of diphtheria which recovered (antitoxin used).

MOHILL; Rinn.—The district is very healthy and free from all epidemic disease.

Mayo County.

BALLINA; Crossmolina.—Sanitary condition of district fair; no infectious disease. Vaccinations during quarter comparatively numerous, but there are many old offenders against whom legal measures will be required.

BALLINROBE; Cappaghduff.—Sanitary arrangements good. Some of the people are obliged to keep cattle in dwelling-houses for want of houses, having no means to build.

BALLINROBE; Cong.—Health of district very good.

BALLINROBE; Hollymount.—Births under, and deaths about, the average. The general health of the people of this district has been good during the quarter.

BELMULLET; Bangor.—During the quarter just ended the public health has been generally good, and very little disease of any kind.

BELMULLET; Binghamstown, W.—District in a healthy state.

BELMULLET; Knocknalower.—General sanitary condition of district fair. Health of people good during quarter.

CASTLEBAR; Balla.—District healthy. Vaccination has improved during the quarter.

CASTLEBAR; Castlebar, No. 1, W.—Health of the district is now particularly good. Whooping-cough of a mild type was prevalent during July and August; no death occurred. Sanitary condition of the district continues to improve.

CLAREMORRIS; Ballindine.—Health of district good.

CLAREMORRIS; Ballyhaunis.—Health of district satisfactory; no zymotics or cancer. Most of the deaths were from senile pulmonary affections; five at ages between 80 and 92 years. Sanitation progressive.

KILLALA; Killala, W.—The health of the district during the quarter was most satisfactory.

SWINEFORD; Foxford.—Defective water supply; bad sewerage and sanitary arrangements.

SWINEFORD; Kiltamagh.—Phthisis particularly prevalent. I find that coming to my dispensary are numbers of returned Irish-Americans (Yanks), who have been sent back from America by their medical advisers, suffering from phthisis. This practice of course assists in the spreading of the disease among the poor people at home.

WESTPORT; Achill.—General health of district good. Sanitary state fair, but the Slievemore burial ground remains a source of danger as it has not been attended to. Very few children presented for vaccination this quarter.

WESTPORT; Ballycroy.—District healthy generally, but tuberculosis rather increased.

WESTPORT; Bundorragea.—Sanitary arrangements are good.

WESTPORT; Louisburgh.—In my opinion when it is so desired by parents or persons in charge of children, the medical officer should attend at the residences of the children for the purpose of vaccination and inspection.

WESTPORT; Newport.—There are no arrangements for the removal of night soil and rubbish from houses that have not any yards, or from houses with very small yards and no sanitary convenience, in the town of Newport. No improvement in the water supply.

WESTPORT; Westport, W.—One fatal case of acute tetanus in a girl aged 10 years, following septic wound on the foot.

Roscommon County.

ATHLONE; Brideswell.—Health of district very satisfactory.

BOYLE; Ballyfarnan, No. 1.—State of district generally healthy.

BOYLE; Boyle, No. 1, W.—The district was fairly healthy, and there was no epidemic except whooping-cough.

BOYLE; Keader.—Whooping-cough prevalent in this district.

CARRICK-ON-SHANNON; Aughrim.—The health of the district during the quarter has been remarkably good. There was no case of infectious disease. The number of births is in excess of the number of deaths. The sanitary condition of the district is satisfactory.

CASTLEREAGH; Castleplunket.—Health of district excellent. Very wet weather during August. Sanitation not good.

STROKESTOWN; Roosky.—Of the deaths registered ten were of persons aged 60 years and upwards, one of whom was aged 99 years, one 90 years, one 84 years, two 80 years each, two 76 years each, one 75 years, one 74 years, and one 70 years.

Sligo County.

BOYLE; Ballyfarnan, No. 2.—State of the district generally healthy. One death registered during the quarter at 105 years.

BOYLE; Gurteen.—There was a slight outbreak of enteric fever in July and August. District now healthy. One death registered at 106 years. Vaccination progressing.

DROMORE WEST; Easky, W.—Health of district very good. No case of infectious disease during quarter.

DROMORE WEST; Skreen.—Scarcely any compliance with the vaccination laws. District healthy. My *locum tenens* had two cases of diphtheria not yet registered, resulting in death.

SLIGO; Ballymote.—District free from contagious or infectious diseases.

SLIGO; Carney, No. 1.—In my opinion the widespread prevalence of tuberculosis deserves more attention from the sanitary authorities than is at present bestowed

upon it. All the certified deaths for this quarter are due to tubercular disease. During the past five years and a half, 55 deaths have been certified as due to tubercular disease. What an awful hubbub and excitement a few cases of enteric fever cause! Yet here is a disease more deadly, as infectious, and much more common, allowed to increase and claim fresh victims year by year, while nothing seems to be done to stay its progress. It occurs as frequently in the well-kept houses as in the miserable hovels so common in the west of Ireland, but spreads rapidly from one member to another in dark and damp surroundings. The milk supply, in my opinion, should be looked after, and regulated as far as possible on the French system.

SLIGO; Collooney.—Three deaths from phthisis, aged 18, 25, and 26 years.

SLIGO; Sligo, No. 1, W.—Of the seven uncertified deaths, one was a child of two years who had just left workhouse infirmary; the others varied in age from 60 to 90 years.

TOBERCURREY; Aclare.—The health of the district is exceedingly good.

TOBERCURREY; Coolaney.—Sanitary arrangements in district satisfactory.

TOBERCURREY; Tobercurry, W.—The district is in a fairly satisfactory state.

1906.]
4th Quarter.

Marriages:—JULY, AUG., SEPT., 1906. **Births & Deaths:**—OCT., NOV., DEC., 1906

During the quarter ended 31st December last, there were registered in the 827 Registrars' Districts in Ireland 24,529 births—a number equal to an annual birth-rate of 22·4 in every 1,000 of the estimated population*—and 18,182 deaths, representing an annual rate of 16·6 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 5,263 persons emigrated.

In England last quarter, the birth-rate represented was 26·1 in every 1,000 of the estimated population, and the death-rate 15·7 per 1,000.

The birth-rate in Ireland for the quarter is 0·5 over the average rate for the corresponding quarter of the ten years 1896–1905, and 0·2 above the rate for the fourth quarter of 1905. The deaths are 457 above those registered in the corresponding quarter of 1905; the death-rate is 0·5 above the rate for that quarter, and 0·1 above the average for the fourth quarter of the ten years 1896–1905.

Compared with those for the corresponding quarter of 1905, the returns of pauperism, furnished by the Local Government Board, show a decrease of 118 in the average number of Workhouse inmates on

* See page 382.

Saturdays during the quarter, and a decrease of 795 in the average number of persons on out-door relief

Compared with the averages for the fourth quarter of the ten years 1896-1905, the number of Workhouse inmates shows an increase of 1,140, and the number of persons on out-door relief an increase of 487, the total under both heads being 1·6 per cent. above the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·7 per cent.

The annual marriage-rate (4·7 per 1,000 of the population) represented by the marriages registered during the third quarter of 1906 is equal to the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 30th September, 1906, and by the Births and Deaths registered in the Quarter ended 31st December, 1906.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*), page 321.

MARRIAGES.

The marriages (5,115) registered in Ireland during the third quarter of 1906 are equivalent to an annual rate of 4·7 per 1,000 of the estimated population, being 0·1 below the rate for the corresponding quarter of 1905, but equal to the average rate for the third quarter of the ten years 1896–1905. Of the total number of marriages 3,356 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,759 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·1 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·2 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·1 above the average rate for the corresponding quarter of the previous ten years, but that under the latter shows a decrease of 0·5. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages was celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the ten years 1896–1905, and the average number for that period; also the number registered during the first, second and third quarters of 1906.

1906, . . .	6·9	4·1	4·1	.	.	4·8	6·3	6·2	.	.	6·4	4·7	4·7	.	.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 24,529—12,570 boys and 11,959 girls—being equal to an annual ratio of 1 in every 44·7, or 22·4 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1896–1905 was 24,401, equivalent to an annual rate of 21·9 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 22·4 per 1,000 of the population according to the Census of 1901; Munster, 20·9; Ulster, 22·8; and Connaught, 21·2.

The highest county or county borough birth-rate* is 30·8 for Dublin county borough, and the lowest 16·5 for Longford county. Of the intermediate rates the highest five are—Belfast county borough, 28·5; Limerick county and county borough, 23·4; Kilkenny, 23·3; Mayo, 23·2; and Antrim, 22·8. The lowest five are—Carlow, 17·2; Tipperary N.R., 17·2; Queen's, 17·3; Dublin county, 17·7; and Monaghan, 17·9.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 18,182—9,060 males and 9,122 females—affording an annual ratio of 1 in every 60·3, or 16·6 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1896–1905 was 16·5 per 1,000.

The death-rate in Leinster was 19·3 per 1,000 of the population according to the Census of 1901; in Munster, 15·3; in Ulster, 16·7; and in Connaught, 11·8.

The county or county borough death-rates* range from 11·2 in Mayo to 27·3 in Dublin county borough. Between these rates the lowest five are—Leitrim, 11·4; Kerry, 11·6; Sligo, 12·0; Galway, 12·1; and Roscommon, 12·5; and the highest five are—Belfast county borough, 19·0; Wexford, 18·6; Waterford, 18·2; Carlow, 18·0; and Armagh, 17·7.

* See note (*) on page 216.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1896–1905, and the average number for that period ; also the number registered during each quarter of the year 1906 :—

Equivalent Annual Rate per 1,000 living:—										
Average, 1896–1905,	23·7	24·3	23·0	21·9	23·2	21·4	18·7	14·8	16·5	17·9
1906, . . .	24·0	24·7	23·2	22·4	23·3	18·9	18·0	14·4	16·6	17·0

Ages.—Of the 18,182 deaths registered last quarter, 2,529, or 13·9 per cent., were of children under 1 year old ; and 7,882, or 43·4 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 103·1 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 15·1 per cent. of the total deaths registered therein ; in Munster, 13·5 per cent. ; in Ulster, 14·2 per cent. ; and in Connaught, 10·3 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 39·6 per cent. ; in Munster, to 44·8 per cent. ; in Ulster, to 43·2 per cent. ; and in Connaught, to 51·5 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 971, or 282 more than the number registered in the corresponding quarter of 1905, and is equivalent to an annual rate of 0·9 per 1,000 living, being 0·3 above the rate for the fourth quarter of 1905, but 0·1 below the average rate for the fourth quarter of the ten years 1896–1905.

* See Note (†) on page 305.

The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the December quarter of 1906, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1901-1905.

Name of Disease.	Number of Deaths in December quarter, 1906.	Average number of Deaths in December quarter of the 5 years, 1901-1905.
Small pox,	2
Measles, . . .	80	193
Scarlet Fever, . . .	39	60
Typhus, . . .	18	19
Whooping-cough, . .	164	201
Diphtheria, . . .	92	100
Pyrexia (origin uncertain), .	9	15
Enteric Fever, . . .	91	148
Diarrhoeal Diseases, . .	478	260

Small-pox.—There was no fatality from small-pox reported as occurring in Ireland during the year 1906; neither was there any reference to the incidence of the disease made by the Registrars in the notes appended to their quarterly numerical returns.

Measles.—From Abstract I., page 320, it appears that 80 deaths from measles were registered in the whole of Ireland during the year; this number is below the average (193) for the fourth quarter of the preceding five years by nearly 60 per cent. Deaths from measles in the three preceding quarters of the year were 104, 121, and 72 respectively. Of the total (80) there were 38 registered in the county borough of Dublin; of these, 35 deaths appertained to the district of South City No. 1; in the county borough of Belfast 14 deaths were registered.

Scarlet Fever.—The deaths from scarlet fever in the first quarter of the year were 50 in number; in the second quarter they declined to 23, rising to 27 in the third quarter, and in the period under notice rising again to 39, the average for the December quarter of the 5 years, 1901-1905, being 60.

Typhus.—The fatalities from typhus (18 in number) almost coincide with the average (19); in each of the three preceding quarterly periods deaths from typhus were 28, 24, and 22. The deaths occurred as follows:—In South Dublin—South City No. 1 district—one death; in Maryborough district, 3 deaths; in Cork Rural No. 1 district, one death; in Dromdaleague district, 2 deaths; in Castlegregory district, one death; in

Tralee No. 1 district, one death ; in Tipperary district, 3 deaths ; in Waterford Urban No. 1 district, one death ; in Belfast Urban No. 4 district, 2 deaths ; one in Binghamstown ; and 2 deaths in Claremorris.

Whooping-cough.—The annual death-rate represented by the deaths from whooping-cough (in number 164) was 0·15 per 1,000 of the estimated population of Ireland. The total is under the average number of deaths for the corresponding quarter of the preceding five years, namely, 201 ; it is also below each of the numbers registered in the earlier quarters of the year ; in March quarter 195, in June quarter 286, and in September quarter 208 deaths respectively from whooping-cough were registered. Of the total deaths, 28 were in Dublin county borough, 22 in county Cork and Cork county borough, 29 in Belfast county borough, 15 in county Antrim, and 13 in county Monaghan. In the Registrar's district of Drumlish, union of Longford, there were 4 deaths from whooping-cough ; in Boherboy, in the union of Kanturk, there were 7 deaths ; in Ballymena district, union of Ballymena, there were 4 deaths ; and in Carrickmacross district, in the union of Carrickmacross, there were 10 deaths.

Diphtheria.—The mortality from diphtheria in the earlier quarters of the year was, respectively, 94 deaths in March quarter ; and 65 deaths in each of the June and September quarters ; in the period under notice the deaths were 92, being 8 below the average for the corresponding quarters of the 5 years preceding. Of the deaths (92), there were 15 in Dublin county borough, 10 in Limerick county and county borough, and 13 in Belfast county borough.

Enteric Fever.—Although the deaths from enteric fever (91) exceed those occurring in the September quarter of the year by 9 deaths, they are far below the average number of deaths (148) which were registered in the corresponding period in the 5 preceding years. In the March quarter of 1906, there were 114 deaths from enteric fever registered in Ireland, and in the June quarter of the year, 88 deaths were registered. In each of the county boroughs of Dublin and of Belfast, 18 deaths from enteric fever were registered.

During the quarter 9 deaths were classified as due to pyrexia (origin uncertain). This condition was heretofore described, as simple, continued, or ill-defined fever.

Diarrhoeal Diseases.—The annual death-rate, represented by the deaths returned from diarrhoeal diseases (478) was 0·44 per 1,000 of the estimated population of Ireland. The number of deaths is far above the average (260) for the December quarter of the 5 years preceding. In Abstract I., page 320, the details regarding deaths from

this group of diseases, by provinces and counties, are given ; amongst others there were 32 deaths in Dublin county, 80 in Dublin county borough, 71 in Cork county and county borough, 17 in Limerick county and county borough, 15 in Tipperary, S.R. ; 12 in Waterford county and county borough, 24 in county Antrim, 13 in county Armagh, 81 in Belfast county borough, 15 in county Down, 17 in Londonderry county and county borough, and 12 deaths from diarrhœal diseases in the county Tyrone. Mayo was the only county from which one or more deaths from diarrhœal diseases was not returned for the period under notice.

Tuberculous Disease.—The deaths returned by the Registrars as occurring from all forms of tuberculous disease amounted to 2,420, representing an annual death-rate of 2·21 per 1,000 of the population. In the earlier quarters of the year the respective annual rates for all forms of tuberculous disease were 2·71, 2·84, and 2·29 per 1,000, calculated on the deaths as reported in the returns furnished by the Registrars of Births and Deaths throughout the country. In the Appendix containing notes furnished by the Registrars, observations regarding tuberculous disease are made by the following :—The Registrars of Killeen, Clonaslee, Milltown (in Mullingar Union), of New Ross, of Ennis No. 1, of Whitechurch, of Aghada, of Skull, of Moroe, of Abbeyfeale, of Askeaton, of Rathkeale, of Kilpatrick, of Kilsheelan No. 1, of Waterford Urban No. 1, of Burt, of Claudy, of Dungiven, of Benburb, of Trillick, of Carney No. 1 district, and of Sligo No. 1 district.

Malignant Diseases.—Under the heading malignant disease, which includes carcinoma, sarcoma, and cancer (undefined), there were returned 802 deaths, stated by the Registrars to have been registered during the December quarter of the year 1906 ; the total corresponds to an annual rate of mortality for these diseases of 0·73 per 1,000 of the population of Ireland, estimated to the middle of the year 1906. In each of the three preceding quarters the rates were 0·72, 0·71, and 0·70 per 1,000. In the periods under review the province of Leinster was 0·87 per 1,000 of the population according to the Census of 1901 ; in the province of Munster the rate was 0·56 per 1,000 ; in the province of Ulster the rate was 0·84 per 1,000 ; and in the province of Connaught the rate was 0·43 per 1,000 of the Census population. The Registrars of Castledermot, Abbeyshrule, Kilkee, Milford (in Kanturk Union), Moroe, Askeaton, Rathkeale, Silvermines, Galgorm, Dungiven, Claudy, Coal Island, and Trillick districts have supplied notes on this subject, which are printed in the Appendix at the end of this Report.

Hydrophobia.—No death from this cause was registered in Ireland during the quarter.

The Registrars, in their Notes, report the presence of the following diseases :—Measles in 6 districts, scarlet fever in 24, whooping-cough in 27, diphtheria in 22, fever in 19--typhus in 2, enteric in 16, and *pyrexia* (origin uncertain) in one—diarrhoea in 2, influenza in 75, and mumps in 6.

Inquests.—There were 431 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 42 of the total deaths registered.

In Leinster there was 1 inquest to every 37 deaths registered, in Munster 1 to 58, in Ulster 1 to 34, and in Connaught 1 to 119.

Deaths in Public Institutions.—Of the 18,182 deaths registered, 3,798, or 20·9 per cent., occurred in public institutions. In Leinster the percentage was 27·8, in Munster 24·7, in Ulster 14·6, and in Connaught 14·3.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1906, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.

§ Including one death from Scarlet Fever of a person admitted from the City of Belfast to the hospital for infectious diseases at Furdysbourn, in the Registrar's District of Ballyvaughan, and Union of Lisburn.

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1906, there were 21,088 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st December last, was 5,263 (2,636 males and 2,627 females), being 802 more than in the corresponding quarter of the year 1905, but 595 under the average number for the fourth quarter of the ten years 1896–1905.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December in 1905 and 1906:—

MONTHS	NUMBER OF EMIGRANTS.

Total, .	2,200	2,636	436	—	2,261	2,627	366	—	4,461	5,263*	802	—

* Including 3,708 emigrants to the United States of America, viz.:—2,479 in the month of October, 822 in November, and 407 in December. Of 3,215 steerage passengers, 1,191 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 5½d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1905 the average price was 6d., and in the corresponding quarter of 1896 it was 5d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 6d. per cwt., being the same as the average for the corresponding quarter of the year 1905. In the fourth quarter of 1896 the average price was 12s. 8d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3s. to 3s. 4d. In the fourth quarter of 1905 the average prices were 2s. 1d. to 2s. 6d., and the prices for the corresponding quarter of 1896 were 2s. 1d. to 3s. 1d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 49s. to 53s. 6d. per cwt. In the corresponding quarter of 1905 the average prices were from 47s. 6d. to 53s., and in the fourth quarter of 1896 they were from 43s. to 52s.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 19s. to 22s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £87, and the lowest £85½.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been 4 per cent. from the 21st June, was raised to 4½ per cent. on the 13th September, to 5½ per cent. on the 11th October, and to 6½ per cent. on the 19th October, at which rate it remained to the end of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1906 was 44,447, or 118 under the average for the corresponding period in 1905.

The average weekly number of persons receiving out-door relief during the quarter was 56,009, being 795 under the average for the fourth quarter of 1905.

Of the persons receiving in-door relief during the fourth quarter of 1906, an average number of 1,488 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1905 the average weekly number was 1,483.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1906, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was 3d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phœnix Park, Dublin, during the fourth quarter of the years 1901–1906, respectively,

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 316).

The mean height of the barometer during the fourth quarter of 1906 was 29·839 inches, being 0·066 under the average for the corresponding quarter of the five years 1901–1905; the highest reading (30·580 inches) was on the 21st December, at 9 A.M., air calm; and the lowest (29·090 inches) on the 18th November, at 9 P.M., wind W.

The mean temperature of the air during the quarter was 44·7°, being 0·5° above the average for the fourth quarter of the 5 years 1901–1905.

The maximum temperature of the air during the quarter was 65·0° and the minimum 15·0°. The maximum heat in sun was 111·7°, and the minimum on the grass 13·3°.

Rain or snow fell on 54 days during the quarter. The rain-fall measured 6·548 inches, being 0·052 inch over the average for the fourth quarter of the five years 1901–1905. The greatest monthly rain-fall was in October, when 2·551 inches were registered.

The wind blew on 27 days from W., on 21 days from S.W., on 10 days from S., on 5 days from N., on 4 days each from S.E. and N.W., on 2 days from N.E., and on 1 day from E., and the air was calm on 18 days at 9 A.M.

October.—The mean height of the barometer during this month was 29·717 inches; the highest reading (30·381 inches) was on the 25th at 9 A.M., air calm; and the lowest (29·261 inches) on the 29th, at 9 P.M., wind W.S.W. The mean temperature of the air was 49·4°, the maximum registered was 65·0°, and the minimum 31·2°. The 8th was the warmest day and the 20th the coldest night. The mean of the dry bulb was 48·7°, and of the wet bulb 47·1°. The maximum heat in sun was 111·7°, and the minimum on the grass 20·0°. The minimum on the grass was below 32° on 13 nights. The total amount of sunshine recorded was 109·4 hours, the greatest daily amount being 9·2 hours on the 18th. The maximum ozone was 0·9, the minimum 0·1, and the mean 0·5. Rain or snow fell on 20 days. The rain-fall measured 2·551 inches; the greatest amount in 24 hours was ·580 inch on the 11th.

November.—The mean height of the barometer during this month was 29·858 inches; the highest reading (30·539 inches) was on the 11th at 9 P.M., air calm, and the lowest (29·090 inches) on the 18th, at 9 P.M., wind W. The mean temperature of the air was 45·6°, the maximum registered was 62·1°, and the minimum 30·7°. The 24th was the warmest day, and the 18th the coldest night. The mean of the dry bulb was 45·3°, and of the wet bulb 43·5°. The maximum heat in sun was 97·8°, and the minimum on the grass 22·4°. The minimum on the grass was below 32° on 13 nights. The total amount of sunshine recorded was 55·7 hours, the greatest daily amount being 6·8 hours on the 24th. The maximum ozone was 1·0, the minimum 0·1, and the mean 0·7. Rain or snow fell on 15 days. The rain-fall measured 1·900 inches; the greatest amount in 24 hours was ·450 inch on the 7th.

December.—The mean height of the barometer during this month was 29·942 inches; the highest reading (30·580 inches) was on the 21st, at 9 A.M., air calm; and the lowest (29·286 inches) on the 26th, at 9 A.M., air calm. The mean temperature of the air was 39·2°; the maximum registered was 54·0°, and the minimum 15·0°. The 4th was the warmest day, and the 30th was the coldest night. The mean of the dry bulb was 39·5°, and of the wet bulb 38·0°. The maximum heat in sun was 99·0°, and the minimum on the grass 13·3°. The minimum on the grass was below 32° on 19 nights. The total amount of sunshine recorded was 39·9 hours, the greatest daily amount being 5·3 hours on the 14th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain or snow fell on 19 days. The rain-fall measured 2·097 inches; the greatest amount in 24 hours was ·465 inch on the 15th.

† See note (4) on page

The boundaries of Carrickmacross and Monaghan Urban Districts having been extended on the 1st April, 1906, the figures here given for those Districts are a summary of the figures as published in the Reports for the four quarters, and relate to the areas as then existing.

§ Including one death from Scarlet fever of a person admitted from the City of Belfast, to the hospital for infectious diseases at Furtysburn, in the Registrar's District of Ballyleson, and the Union of Lisburn.

* See note (*) on page 310.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Sc.D., F.R.S.*

In compiling the following Table (pp. 318 and 319), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

In making a selection from the whole number of stations available, endeavour has been made to represent as far as possible the various meteorological conditions of the several districts. Regard has been had not only to uniformity of geographical distribution, but also to the situation of the stations with regard to the sea coast, their height above sea level, and to their special characteristics as representing urban, suburban, or rural meteorological conditions.

Observations of earth temperature and of wind-force are provided for in the Table. The wind observations at Valencia are based on the records of a standard Robinson anemometer (factor 2·2). Velocities between 13 and 38 miles in the hour have been entered in the Tables as strong winds, velocities of 39 miles in the hour, or above, as gales. At the remaining stations the wind-force observations are personal estimates in accordance with Beaufort's scale, and are specially liable to be affected by local circumstances. No previous comparison of corresponding data is available for the purpose of checking these results.

The stations selected, with the names of the Observers, are shown below.

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Donaghadee,	Do.
Belfast, Queen's College, . . .	John Wylie, B.A.
Armagh, The Observatory, . . .	J. L. E. Dreyer, Ph.D.
Markree Castle,	J. R. Armstrong, for the Trustees of the late Col. Cooper, F.R.A.S.
Blacksod Point,	Meteorological Office.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Birr Castle,	J. H. Skerritt, for the Earl of Rosse, K.P.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Waterford,	J. N. White, Esq.

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898.

† Including accidental deaths, homicides, and suicides.

‡ Formerly described as "Simple Continued Fever."

§ The Returns for Kilann District in Enniscorthy Union, and Knocknaloher District, in Belmullet Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding quarter of 1905 have been adopted.

[Not including the death from scarlet fever of one person, an inhabitant of Belfast, which occurred in the Purdy'sburn Fever Hospital, Ballyleson District.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.*

(a) See note (*), page 321.

* The Registrars' Districts (827 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.
† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 333 and 334 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 30th September, 1906, to 29th December, 1906. With the exception of 96 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.
‡ Exclusive of 10 deaths in the Rathdown Union Workhouses of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.
§ Formerly described as "Simple Continued Fever."

NOTE.—This table has been constructed for the years 1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1906—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

CARLOW ; *Bagenalstown*. — The district is in a very healthy condition.

CARLOW ; *Carlow No. 1 W*. — There was a case of tetanus in December, due to the handle of a truck catching the little finger between it and the flags on Friday. On Monday it was medically treated. A sudden violent attack of tetanus took place on Thursday. Chloroform was given that day to burn the sore; it made him worse. Serum injected twice on Thursday, and once on Friday morning. He died at 2 p.m. Friday. In same malthouse similar case, a nail in foot—tetanus—cauterised and recovered.

CARLOW ; *Clonegall*. — Sixty-two and a half per cent. of the deaths were of persons either over 60 years or under 1 year of age.

CARLOW ; *Fennagh and Myshall*. — Scarlet fever appears to be endemic in the district, as isolated cases appear now and then. The longevity here is remarkable.

CARLOW ; *Leighlinbridge*. — District healthy.

CARLOW ; *Tallow*. — There was an epidemic of mild scarlatina during this quarter, which has now passed away.

Dublin County.

DUBLIN SOUTH ; *Crumlin*. — The sanitation of this district is gradually improving.

DUBLIN SOUTH ; *Tallaght*. — One death of an old man aged 108 years.

RATHDOWN ; *Blackrock and Stillorgan No. 2*. — During the quarter we had an outbreak of scarlatina, particularly in the Foxrock part of this district. Twenty-two patients were removed to the Rathdown Fever Hospital, where one death occurred from our district. In general the fever was of a mild type.

Kildare County.

ATHY ; *Castledermot* — Influenza prevalent in district last few weeks. There were four deaths from malignant disease during the quarter; one has yet to be registered.

BALTINGLASS ; *Baltinglass No. 2* — Some cases of influenza during the quarter. Most primary vaccinations postponed on account of severe weather and prevalence of cold amongst young children and infants.

CELBRIDGE ; *Celbridge, W*. — District healthy.

CELBRIDGE ; *Kilcock*. — Influenza of a rather severe type prevalent during the quarter in this district, and almost invariably giving rise to pulmonary troubles.

CELBRIDGE ; *Maynooth*. — District healthy.

EDENDERRY ; *Carbury*. — For some months jaundice has been epidemic; large numbers of children have had it. A few mild cases of scarlatina in the district. Influenza lately prevalent, generally catarrhal in form.

EDENDERRY ; *Rathangan, No. 1*. — Whooping-cough prevalent, hence no vaccinations.

NAAS ; *Kildare*. — District healthy.

NAAS ; *Robertstown and Kilmeage*. — One death occurred during quarter of a person aged 94 years.

Kilkenny County.

CASTLECOMER ; *Ballyragget*. — Sanitary arrangements very fair. All the diseases named in the Abstracts absent.

CASTLECOMER ; *Castlecomer, W*. — Bronchial affections are very prevalent for the last month owing to the severity of the weather.

KILKENNY; Freshford.—District remarkably healthy.

KILKENNY; Tullaroan.—Health of district good.

NEW ROSS; Dysartmoon.—District healthy.

THOMASTOWN; Inistioge.—Influenza at present very prevalent in this district. District otherwise healthy.

URLINGFORD; Balleen.—A few cases of influenza.

URLINGFORD; Urlingford, W.—Health of the district fairly good. The death of one woman whose age was supposed to be 105 years was registered. Her exceptional longevity was attributed to regular modes of living in rural life.

WATERFORD; Kilmakkeoge.—District in a sanitary state and free from epidemic disease.

WATERFORD; Ullid.—Twenty-one of the successful primary vaccinations were of children born outside the district.

King's County.

BIRR; Kinnitty.—All vaccination defaulters came in except two. Health of district fair.

EDENDERRY; Rathangan, No. 2.—No births during two preceding quarters, hence no vaccinations. The three deaths registered were of persons aged 76, 78, and 79 years respectively. Whooping-cough prevalent.

EDENDERRY; Rhode.—One case of diphtheria of a mild form, and one case of scarlatina. Influenza rather prevalent during quarter.

MOUNTMELICK; Clonygowan, No. 2.—Influenza prevalent. Deaths at the following remarkable ages were registered:—107, 92, 86, 80, and 79 years.

ROSCREA; Roscrea, No. 2.—Only two deaths registered during the quarter; one was 88 years and the other 90. No case of tubercular disease of any form in the district.

ROSCREA; Shinrone.—Vaccination postponed in several cases owing to sickness. Sanitary condition of district good.

TULLAMORE; Killoughy.—The district is in a fairly healthy state. One case of diphtheria during the quarter was treated successfully by the anti-diphtheritic serum. Of the seven deaths registered 4 were aged 75, 80, 85 and 94 years.

Longford County.

BALLYMAHON; Abbeyshrule.—The sanitary state of the district is satisfactory. Influenza was prevalent during the quarter. One case of cancer of lip in old man, but not certified. One case of puerperal fever.

BALLYMAHON; Ballymahon, W.—The sanitary arrangements of the district are satisfactory.

GRANARD; Ballinalee.—The district is in good sanitary condition.

GRANARD; Granard, W.—The district is in good sanitary condition.

GRANARD; Scrabby, No. 2.—The sanitary condition of district continues satisfactory.

Louth County.

ARDEE; Castlebellingham.—Whooping-cough prevalent for past couple of months. Sanitary condition of district fairly good. Water supply improved.

ARDEE; Collon, No. 1.—District healthy.

ARDEE; Dunleer.—District healthy.

DROGHEDA; Termonfeckin.—An epidemic of measles occurred during the earlier months of the quarter—one death, uncertified has been registered therefrom. Influenza has occurred as a general epidemic towards the close of the quarter. Owing to the inclemency of the weather, &c., vaccinations are not so numerous as usual.

DUNDALK; Barronstown.—Influenza, complicated in most cases with chest affections, made its appearance during latter part of quarter.

DUNDALK; Dromiskin.—District in healthy state.

Meath County.

ARDEE; Collon, No. 2.—District healthy.

ARDEE; Drumcondra.—Influenza prevalent.

DROGHEDA; St. Mary's.—The sanitary state of the district is good.

DROGHEDA; Stamullen.—District in a healthy state during quarter.

DUNSHAUGHLIN; Killeen.—Only three deaths in district, each being above 69 years. Sanitary condition good. Tuberculosis very prevalent.

KELLS; Kilskeer.—District in healthy condition.

KELLS; Moynalty.—Four twin births registered during quarter.

KELLS; Nobber.—A wave of influenza has swept over the district, as also all the adjoining localities, during quarter. In general, the attack was most acute. However, it is satisfactory to state that no deaths have occurred, except in cases of advanced

age, which were anteriorly ailing. The scourge has not abated, and the terrible weather has given it a fillip. Not a family in the wide district has escaped.

OLDCASTLE; *Oldcastle, W.*—District continues in a satisfactory condition.

TRIM; *Athboy*.—Sanitary condition of district good.

TRIM; *Summerhill*.—Sanitary condition of district fairly good, and no disease of an infectious nature prevalent.

Queen's County.

ABBEYLEIX; *Ballinakill*.—Health of district good.

MOUNTMELICK; *Clonaslee*.—Three cases of scarlatina occurred during the quarter. Among the deaths registered during the quarter, one was attributed to pulmonary tuberculosis.

MOUNTMELICK; *Clonygowan, No. 1*.—Influenza has been very prevalent.

MOUNTMELICK; *Mountmellick W.*—One patient under my care 103 years of age, though said to be 106 by neighbours.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—A mild type of influenza very prevalent during the quarter.

BALLYMAHON; *Ballymore*.—Sanitary condition of the district good. In part of the district influenza prevailed, but not of a serious type, no deaths resulting therefrom.

MULLINGAR; *Ballynacarrigy*.—November was ushered in here with an epidemic of influenza with respiratory complications, proving very fatal to old and debilitated.

MULLINGAR; *Killucan*.—Mumps at present in part of the district. Otherwise the health of the district is good.

MULLINGAR; *Miltown*.—Chest complaints were exceptionally numerous throughout the quarter, and there was a fatal case of phthisis pulmonalis in a young woman aged 27 years. Of the total number of deaths registered, upwards of half were bachelors and spinsters, and the same account can be given of the other three quarters of the year now ended. Under such circumstances, the population of the district is bound to go down, but where is the remedy? There were no deaths from cancer or malignant disease. The district is in a good sanitary condition

at present, and there is only one vaccination defaulter.

MULLINGAR; *Mullingar, W.*—Health of district fairly good.

Wexford County.

ENNISCORTHY; *Newtownbarry*.—Death rate was higher than birth rate during quarter.

GORBY; *Camolin*.—Three cases of diphtheria occurred in the district during the quarter just ended. Proper steps and precautions were carried out to eradicate the disease, with satisfactory results.

GOREY; *Killenagh and Wells*.—Deaths registered during the quarter at the following ages:—91, 87, 82, 79, 73, 72, and 70 years.

NEW ROSS; *Fethard, No. 1*.—Influenza was epidemic in part of the district during the latter half of the quarter.

NEW ROSS; *Fethard, No. 2*.—Fifteen cases of scarlatina occurred in district during quarter.

NEW ROSS; *New Ross, W.*—Health of district fairly good. Measles prevalent in a moderately severe form. Also some few cases of whooping-cough occurred. As usual, the number of deaths from tuberculous disease is large. This disease is increasing in the Urban District, and likely to increase still further unless something is done—say, compulsory notification introduced, with isolation of those affected with the disease. The distribution of leaflets alone will certainly not reduce the death-rate from tuberculosis.

NEW ROSS; *Old Ross*.—More labourers' dwellings are required within the district.

WEXFORD; *Bannow*.—Influenza is prevalent in the district.

WEXFORD; *Crossabeg*.—District healthy. Scarcely any vaccination defaulters.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W.*—Some cases of influenza during this quarter. Most primary vaccinations postponed on account of severe weather and prevalence of colds among young children and infants.

BALTINGLASS; *Dunlavin*.—Whooping-cough prevalent.

BALTINGLASS; *Kiltegan*.—I beg to report that the health of this district continues to be normal, deaths registered being mostly those of very old people. One case was that of a sudden death from heart disease of long standing. Inquest considered unnecessary. Deceased was attended by two Doctors, who predeceased their patient; consequently I could not obtain certificate.

RATHDOWN; *Bray, No. 1.*—Births and deaths about the average.

RATHDOWN; *Delgany.*—The health of the district is fairly good.

RATHDRUM; *Annamoe.*—District healthy during quarter.

RATHERUM; *Arklow.*—The district was free from infectious disease during the quarter, with the exception of a single case of typhoid fever.

RATHDRUM; *Newcastle.*—The sanitary arrangements of one village and part of another are very bad, and have frequently been reported on. Infective conjunctivitis seems to have been prevalent about the time I took up duty (Nov. 29, 1906). It is now somewhat on the decrease.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—District maintains its very healthy character.

CORROFIN; *Corrofin, W.*—On the whole the district during this quarter was very healthy. The epidemic of pertussis, so severe in early part of quarter, has now practically worn itself out. One death from the disease has been registered.

ENNIS; *Crusheen.*—Health of the district good.

ENNIS; *Ennis, No. 1, W.*—There is no prevalence of any infectious disease except tuberculosis. Sanitary condition is fair, but house accommodation for the poor is very bad.

ENNIS; *Newmarket.*—The health of the district has been fairly good during the past quarter. A mild type of influenza prevailed.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are fairly satisfactory. Vaccination is fairly well attended to.

ENNISTIMON; *Roosford.*—District healthy. Sanitary arrangements satisfactory.

KILLADYSERT; *Labasheeda.*—District healthy. Sanitation good.

KILRUSH; *Carrigaholt.*—Health of district continues very good.

KILRUSH; *Craggknock.*—Whooping-cough of a mild type has been prevalent during quarter, with only one death (not certified).

KILRUSH; *Kilkee.*—Sanitary state of district fairly satisfactory. There was one death from cancer of liver registered during the quarter. No deaths from tuberculous disease during quarter.

KILRUSH; *Kilrush, W.*—The district has on the whole been healthy.

LIMERICK; *Coolacasey.*—The sanitary condition of the district is satisfactory.

SCARRIFF; *Annacarriga.*—District healthy.

SCARRIFF; *Feakle.*—District very healthy.

SCARRIFF; *Mountshannon, W.*—District in good sanitary condition.

Cork County.

BANDON; *Inishannon.*—My district has been free from infectious disease during the quarter with the exception of influenza, which, with lung complications, has been prevalent for past few weeks.

BANTRY; *Bantry, W.*—Sanitary state of the district good. Some cases of influenza, but not of a severe type. No other zymotic disease prevalent. Health of the district very good.

BANTRY; *Durrus and Kilcrohane.*—District never so healthy, except for ordinary colds amongst children.

BANTRY; *Glengarriff.*—Sanitary condition of the district fairly satisfactory. Influenza rather prevalent during the quarter.

BANTRY; *Kealkill.*—Sanitary condition of district is good. No case of infectious disease during quarter. No case of cancer.

CASTLETOWN; *Castletown, W.*—District very healthy.

CASTLETOWN; *Kilcatherine.*—Sanitary arrangements fair. District healthy.

CORK; *Ballincollig.*—District healthy.

CORK; *Carrigaline No. 1.*—Two cases of diphtheritic sore throat. A number of vaccination defaulters.

CORK; *Dripsey.*—The health of the district is good; the sanitary arrangements are fairly good.

CORK; *Whitechurch.*—Two out of five deaths registered due to phthisis; two other deaths registered since close of quarter also due to phthisis.

DUNMANWAY; *Coolmountain.*—There has been no death certified during last quarter as having been due to any of the principal epidemic diseases. Owing to the inclemency of the weather and to the long distances many of the inhabitants are obliged to travel, vaccination could not be so well performed.

DUNMANWAY ; Dunmanway, W.—District healthy. No epidemic.

KANTURK ; Kanturk, W.—Catarrhal influenza very prevalent amongst young children, owing to which vaccination had to be postponed in several cases.

KANTURK ; Milford.—One death from cancer; one case of enteric fever; a few cases of whooping-cough; district otherwise healthy.

KILMALLOCK ; Charleville.—The sanitary condition of the district is good. I have had three cases of scarlet fever in the district during the past quarter. I sent them to hospital and disinfected the house. My vaccination is up to the usual average.

KINSALE ; Ballyjeard.—Health of district good; one case of pleuro-pneumonia treated during quarter, and a few cases of influenza, complicated with bronchitis, treated; no deaths.

KINSALE ; Carrigaline.—Sanitary arrangements good.

MALLOW ; Ballyclogh.—Three cases of sudden death occurred during quarter—no inquests held. Influenza and bronchial affections pretty prevalent. District otherwise healthy.

MALLOW ; Buttevant.—District free from contagious disease, and in a satisfactory sanitary condition.

MALLOW ; Kilshannig.—District healthy.

MALLOW ; Rahan.—A number of cases of diphtheria occurred in three families, and four cases of scarlatina in one family, during past quarter.

MIDDLETON ; Aghada.—Of the six deaths registered due to tuberculous disease, four were invalids from the navy.

MIDDLETON ; Walshtownmore East.—District healthy.

MILLSTREET ; Cullen.—Whooping-cough has been prevalent during the quarter; district otherwise healthy.

SKULL ; Goleen.—The sanitary arrangements in village are wretched, and this is entirely due to the want of a proper water supply.

SKULL ; Skull, W.—Births above the average. Three deaths from pulmonary tuberculosis. Deaths below average. Don't remember having seen so little illness in the district during three months.

Kerry County.

CAHERSIVEEN ; Caher, W.—The district is in fairly good sanitary condition.

CAHERSIVEEN ; Darrynane.—The district is in a satisfactory, sanitary condition, and free from any of the diseases named in the Abstracts.

CAHERSIVEEN ; Glanbehy.—There are no deaths from cancer in my district. The sanitary state of the district is good.

CAHERSIVEEN ; Valencia.—Five of the deaths registered during the quarter are of persons aged respectively 85, 80 (two), 70, and 60 years.

DINGLE ; Anascaul.—One death registered at the age of 103 years; it is correct, as deceased informed me a few weeks before his death that he was this age.

DINGLE ; Castlegregory.—District in a healthy state at present.

DINGLE ; Dingle, W.—The district has been very healthy for the past three months.

DINGLE ; Ventry.—District in a fairly good sanitary condition.

KENMARE ; Kilgarvan.—No vaccination for quarter owing to inclement weather.

KENMARE ; Tuosist.—Scabies very prevalent. Lecturers visit us giving valuable instruction on veterinary matters, agriculture, care and breeding of poultry, the mysteries of the cuisine, &c., but alas! the health of the people—its most valuable asset—and the hygiene of the person are neglected.

KILLARNEY ; Coom.—District healthy during the quarter, with the exception that many children suffered from whooping-cough and bronchitis. Vaccination had to be postponed owing to the prevalence of the above-mentioned diseases. I am informed that two dogs suspected to be suffering from rabies were shot by the police.

KILLARNEY ; Killarney, No. 1, W.—Broncho-pneumonia amongst children prevalent in December.

KILLARNEY ; Milltown.—District healthy; no contagious or infectious disease prevalent. Two cases of typhoid, one removed to hospital, the other recovered at home.

LISTOWEL ; Ballyhorgan.—Vaccination well attended to, 124 cases of successful primary vaccinations during year 1906. Sanitary state of district good.

LISTOWEL ; Ballylongford.—District very healthy. Death-rate very low compared with a large increase in birth. Sanitary condition fairly good; village sewers are badly wanted. Postponed all vaccination in consequence of extremely inclement weather at close of quarter and finish of year.

TRALEE ; Brosna, No. 1.—District healthy.

TRALEE ; Castlemaine.—Vaccination backward owing to an occasional case of typhoid in the district.

TRALEE, Kilgobban.—There was one death from typhoid fever during the quarter, but it has not yet been registered.

TRALEE ; Tralee, No. 1, W.—Two deaths in urban district of persons aged 105 years and 93 years, respectively. The general state of the district is healthy.

Limerick County.

CROOM ; Castletown.—Several cases of influenza.

KILMALLOCK ; Bruree.—There were a number of cases of influenza, the majority of which were mild cases; the remainder had grave pulmonary complications (pneumonia.)

KILMALLOCK ; Hospital.—District fairly healthy, but there were a few cases of diphtheria and typhoid.

KILMALLOCK ; Kilfinnane.—The fourteen uncertified deaths registered include one case of sudden death, no inquest, and another which had "no recent medical attendant." Parotitis very prevalent amongst school-going children.

KILMALLOCK ; Kilmallock, W.—Sanitary arrangements fair. Measles very prevalent in town and neighbourhood during last two months of quarter, causing five deaths from broncho-pneumonial complications.

LIMERICK ; Annacotty.—Sanitary arrangements very fair. There are, however, some dilapidated houses. District healthy.

LIMERICK ; Moroe.—No case of any disease notified as contagious present in district during last quarter. But an alarming proportion, five out of a total of seventeen deaths registered, died from phthisis. One case of cancer.

LISTOWEL ; Glin.—There was one case of typhoid fever of a mild type occurred during quarter; otherwise the public health of the district was good.

MITCHELSTOWN ; Galbally.—District very healthy. One case of diphtheria.

NEWCASTLE ; Abbeyfeale.—Tuberculosis very prevalent.

NEWCASTLE ; Ardagh.—The sanitary state of the district is pretty fair. No epidemic in district.

NEWCASTLE ; Feenagh.—The health of the district is good.

NEWCASTLE ; Newcastle, W.—District healthy.

RATHKEALE ; Askeaton.—The district during the quarter was entirely free from all contagious diseases. One death registered was that of a man whose age was 92 years. Phthisis pulmonalis caused 3 deaths, and cancer 2, one of the œsophagus and the second of the bowel.

RATHKEALE ; Pallaskenry.—The sanitary arrangements in the district are fairly satisfactory.

RATHKEALE ; Rathkeale, No. 1, W.—Vaccinations for the quarter were considerably over the average. The district was free from any form of infectious disease. Sixteen deaths were over 60, 15 died in the union hospital, so that there were only 9 deaths in the dispensary proper, and of these 2 died ten minutes after birth, one within 8 days of birth, one a year and a half, from diarrhoea, 3 from senile decay, and one sudden death: 2 died in hospital from pulmonary tuberculosis, one from epithelioma of lip, and one from mammary carcinoma. A perfectly healthy sanitary district.

RATHKEALE ; Rathkeale, No. 2.—My district was free from all contagious diseases during the quarter.

TIPPERARY ; Grean.—Six cases of enteric fever occurred in one family, five of whom were sent to hospital—probable cause, drinking polluted water. The water was sent for analysis and was found to be badly polluted.

Tipperary County, North Riding.

NENAGH ; Nenagh, W.—Isolated cases of scarlatina have occurred in the district during the quarter; all were removed to hospital and doing well; the necessary disinfecting arrangements were carried out.

NENAGH ; Newport.—District in very healthy state.

NENAGH ; Portroe.—District healthy.

NENAGH ; Silvermines.—One death from cancer of lungs registered.

THURLES ; Moynce.—District healthy.

THURLES ; Templemore.—District very healthy; no prevailing disease.

Tipperary County, South Riding.

CALLAN ; Mullinahone.—Sanitary condition of district fairly good. District exceptionally healthy. A few cases of influenza, latterly with lung complications. Vaccination fairly attended to; no case of cancer, or of any form of tuberculous disease, that I am aware of, in district at present.

CARRICK-ON-SUIR ; Carrangibbon.—For the past month influenza is prevalent through the district, and children were prevented thereby from presentation for vaccination.

CASHEL ; Killenale.—Only one case of successful vaccination—the children did not turn up to be vaccinated. The death rate for this quarter is very low, but just as I write there is an outbreak of influenza in portion of the district which is of a severe type; otherwise the health of the district is very good.

CASHEL; *Kilpatrick*.—District is free from zymotic disease; tubercular complaints were present.

CLOGHEEN; *Caher*.—Two cases of enteric fever occurred in the district during the past quarter, also a few cases of scarlatina; otherwise the district is in a healthy state.

CLOGHEIN; *Clogheen, W.*—District free from epidemic diseases.

CLONMEL; *Kilshelan, No. 1.*—Influenza prevalent. In eight deaths four were due to pulmonary tuberculosis.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—District very healthy.

URLINGFORD; *Kilcooly*.—The sanitary condition of district has been very good for past quarter.

Waterford County.

CARRICK-ON-SUIR; *Rathgormuck*.—The district is free from infectious disease.

CLONMEL; *Kilshelan, No. 2.*—Influenza prevalent.

DUNGARVAN; *Dungarvan, W.*—There were some cases of influenza in this district during the latter end of the quarter.

DUNGARVAN; *Whitechurch*.—One case of enteric fever during the quarter.

KILMACHTHOMAS; *Bunahon*.—The sanitary arrangements fairly good. One case of typhoid and one of diphtheria occurred in the district.

LISMORE; *Cappoquin*.—The district has been remarkably healthy during the quarter.

LISMORE; *Tallow*.—District healthy and free from zymotic disease.

WATERFORD; *Waterford Urban, No. 1, W.*—The sanitary arrangements in parts of the district are bad—ill-kept privies and accumulated refuse collecties. Domestic scavenging not properly carried out. Scarlatina has been prevalent during the quarter, the disease being mostly of mild type. Whooping-cough and mumps are also prevalent in the district. Tuberculosis is always rife in this district. Vaccination postponed in many cases owing to illness and skin affections.

YOUGHAL; *Ardmore*.—Sanitary arrangements fairly good. Enteric fever occurred in one family. I could not trace source.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Connor*.—There was an outbreak of diphtheria. The original source of infection was brought into the district by visitors towards the end of the autumn. Twelve cases in all occurred, with only two deaths. The sanitary condition of the district is good.

ANTRIM; *Doagh*.—The sanitary condition of the district is fair as a whole. One village is still without a sewage system. There have been three cases of scarlatina, one of diphtheria, and one of enteric fever reported during the quarter. Influenza has been rife all over the district.

ANTRIM; *Randalstown*.—Scarlatina, whooping-cough, and influenza prevalent during the quarter; no deaths therefrom. Have ordered the schools in Randalstown to be closed for three weeks at Christmas.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district, with few exceptions, are fairly good. Influenza has been prevalent throughout the district for the last two months.

BALLYMENA; *Ballymena, W.*—Town and district, on the whole, healthy as regards zymotic disease. Numerous chest affections owing to the season.

BALLYMENA; *Broughshane*.—Health of district very good. No zymotic disease.

BALLYMENA; *Clogh*.—Births above and deaths below average. District fairly healthy. One case of diphtheria ended fatally, but no second case, although there were several small children in same house.

BALLYMENA; *Galgorm*.—No zymotic disease during the quarter. Malignant disease seems to be on the increase.

BALLYMENA; *Glenwhirry*.—District very healthy.

BALLYMENA; *Portglenone*.—The health of the district is good. No epidemic disease during the quarter.

BALLYMENA; *Toome*.—Health of the district satisfactory.

BALLYMONEY; *Bushmills*.—An epidemic of jaundice; over 100 cases.

BALLYMONEY; *Portrush*.—Mumps and whooping-cough very prevalent in district during quarter.

LISBURN; *Dunmurry*.—The sanitary condition of this district very good. No epidemic of any kind.

LISBURN; *Glenavy*.—Deaths again under the average. No zymotic disease of any kind in district. General health of people good.

LISBURN; *Knocknadona*.—The sanitary condition of this district is good. There was no death registered from cancer.

LISBURN; *Lisburn, W.*—There are 94 vaccination defaulters.

Armagh County.

ARMAGH; *Armagh, W.*—An epidemic of measles prevailed in the district; three deaths from this disease or its complications were registered.

ARMAGH; *Loughgall*. — During the latter part of quarter there was much pulmonary trouble amongst young children.

ARMAGH; *Markethill*. — Owing to the mild weather of October and November, diseases of the respiratory organs are not prevalent. There have been eleven cases of diphtheria during the quarter, and one of scarlet fever.

ARMAGH; *Rich Hill*. — Health of district good. One of the deaths registered this quarter was that of a man aged 105 years.

LURGAN; *Lurgan, No. 1, W.* — District fairly healthy and free from zymotic disease, with the exception of a few isolated cases of diphtheria.

LURGAN; *Lurgan, No. 2.* — This district is in a good sanitary condition, and free from any infectious disease.

NEWRY; *Mullaghglass*. — District healthy. No zymotic disease during the quarter, except one case of scarlatina on the 29th November; patient treated at home, and kept isolated.

Belfast County Borough.

BELFAST; *Belfast Urban, No. 11.* — The district has been very healthy during the quarter.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.* — Influenza and bronchial colds are prevalent at present.

BAILIEBOROUGH; *Shercock*. — Whooping-cough prevalent amongst children during the quarter.

BAILIEBOROUGH; *Termon*. — The district is in a very sanitary condition, and at present free from all infectious diseases.

CAVAN; *Ballyhaise*. — District in a fairly sanitary condition.

CAVAN; *Bellanagh*. — There was an outbreak of influenza. No deaths registered from this cause. Sanitary condition fair. One death of a female aged 100 years.

CAVAN; *Killashandra*. — District healthy.

COOTEHILL; *Cootehill, W.* — Influenza epidemic.

COOTEHILL; *Tullyvin*. — Influenza prevalent during last month of quarter. District otherwise healthy.

ENNISKILLEN; *Holywell, No. 2.* — The sanitary arrangements of the district are fairly good. Whooping-cough has been

general all-over the district during the past quarter, and has reduced the number of primary vaccinations. Otherwise the district is healthy. No cancer.

OLDCASTLE; *Ballyjamesduff*. — District healthy.

Donegal County.

BALLYSHANNON; *Ballyntra*. — Sanitary conditions of district fairly good, but water supply still continues bad.

DONEGAL; *Donegal, W.* — District free from infectious diseases.

DONEGAL; *Dunkinely*. — Influenza prevalent during December. Number of vaccinations below the average owing to severity of weather.

DONEGAL; *Pettigoe*. — The sanitary arrangements of district primitive.

DUNFANAGHY; *Crossroads*. — District free from any form of disease during the quarter.

DUNFANAGHY; *Dunfanaghy, W.* — Many cases of the influenza of 16 years ago — high fever followed by prostration. District otherwise healthy.

DUNFANAGHY; *Fory Island*. — No vaccination during quarter.

GLENTIES; *Adara*. — It has been reported in two localities in this district that several dogs were destroyed suspected of suffering from rabies.

GLENTIES; *arrick*. — The sanitary condition of the district is fairly good. There is a good deal of scabies and eczema amongst the children which has interfered with vaccination to certain extent.

GLENTIES; *Doocharry*. — District healthy.

GLENTIES; *Killybegs*. — No epidemic of any kind during quarter.

INISHOWN; *Carndonagh, W.* — District fairly healthy, and very little sickness during the quarter.

INISHOWN; *Clonmany*. — Influenza prevalent during last month of the quarter. Few vaccinations owing to the severity of the weather, and the existence of an occasional case of diphtheria.

INISHVEN; *Malin*. — Influenza prevalent. District otherwise healthy.

INISHVEN; *Moville*. — Influenza at present epidemic. Sanitary arrangements fairly good.

LETRKENNY; *Church Hill*. — District healthy.

LONDONDERRY; *Burt*.—A small death number this quarter. One death from pulmonary tuberculosis in a factory worker in Derry. I examined the sputum for a sister, also a factory worker, who is also infected. Most cases of phthisis I see are in girls of this and similar occupations.

LONDONDERRY; *Killea*.—Whooping-cough, which was very prevalent in the district last quarter still continues, and, in consequence, vaccination has not been performed to the same extent as would otherwise have been the case. Influenza of a mild type very general.

MILLFORD; *Fanad*.—District healthy. No infectious disease prevalent. One death from diphtheria registered which occurred in the previous quarter.

MILLFORD; *Rathmullan*.—Vaccination postponed in consequence of severe weather. No zymotic disease during quarter. Eight deaths registered over 70 years of age.

STRABANE; *Raphoe*.—No infectious diseases in this district during past quarter, except influenza. Sanitary arrangements satisfactory.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon*.—Influenza and bronchitis combined was prevalent during the last month of the quarter.

STRANORLAR; *Stranorlar, W.*—Two large villages—Stranorlar and Ballybofey—with a combined population of about 1,200 in 1901, and lying within half a mile of each other in lamentable need of a proper water supply.

Down County.

BANBRIDGE; *Ballyward*.—One death from diphtheria and one from laryngeal croup occurred during the quarter which have not yet been registered. Sanitary defects on premises where diphtheria occurred have been remedied. Otherwise the district is in a good sanitary state.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are good.

DOWNPATRICK; *Ballynahinch*.—There have been numerous cases of influenza, and whooping-cough has been prevalent in the district during the quarter.

DOWNPATRICK; *Downpatrick, W.*—With reference to the death of a centenarian the Master of the Workhouse writes to the effect that the man himself often said that there was no doubt about his age.

DOWNPATRICK; *Killyleagh*.—There is no epidemic in this district at present. Of the nine deaths registered aged 60 and upwards, six are above 80.

DOWNPATRICK; *Portaferry*.—Sanitary condition of district is good. No zymotic disease.

KILKEEL; *Kilkeel, No. 2, W.*—Health of district good.

KILKEEL; *Rosstrevor*.—Many cases were vaccinated during past quarter, in which Form B. (First Schedule) was given in the two previous quarters. The sanitary condition of district is satisfactory.

LISBURN; *Drumbeg*.—Births under the average; deaths above the average. One death from scarlatina and one due to influenza.

LISBURN; *Saintfield*.—The health of the district is good.

LURGAN; *Moir*.—There is no epidemic in the district at present save influenza. During the first two months of the quarter the health of the district was good, but with the advent of the third month, work went up with a bound owing to pulmonary complaints.

LURGAN; *Waringstown*.—District healthy. No epidemic prevalent.

NEWRY; *Donaghmore*.—Sanitary arrangements good. District very healthy. Only five deaths registered during the quarter.

NEWRY; *Rathfriland*.—Births and deaths about the average. District is free from infectious disease at present.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements very good. No epidemic. Vaccination well carried out.

NEWTOWNARDS; *Comber*.—Three deaths of very old people have been registered, one 71, one 91, and one 92 years. There are a few isolated cases of scarlatina and diphtheria, and an epidemic of whooping-cough, but fairly mild. The death that did take place from it was a child barely six months old, and not very strong. So far there have been very few complications. Otherwise the health of the district is very good.

NEWTOWNARDS; *Greyabbey*.—Births and deaths below average. Influenza present all over the district. One death registered as supposed due to it. No epidemic of other infectious or contagious disease.

NEWTOWNARDS; *Newtownards, W.*—During the past quarter eleven urban cases and one rural case of scarlatina were notified. Most of these cases went to hospital; the others were isolated at home. One case of typhus fever was notified in urban district. Patient was isolated at home, being too ill for removal. The source of in-

fection was not satisfactorily traced. Disinfection was carried out in all cases. The chief sanitary defects here are the want of pure water and good watertight sewers. We have every prospect of having these very important sanitary defects remedied in the near future, I am glad to be able to say.

Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Bronchial trouble prevalent amongst children. Otherwise district fairly healthy.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good. Whooping-cough was prevalent during the quarter, and has interfered with the performance of primary vaccination. Otherwise the district is free from epidemic disease. No cancer.

IRVINESTOWN; *Clonelly*.—Health of the district good.

IRVINESTOWN; *Ederney*.—Deaths registered aged 86, 89, 75, 71, 70 (2), and 63 years, respectively.

IRVINESTOWN; *Irvinestown, W.*—District healthy. Two cases of diphtheria during quarter. Mumps prevalent.

LISNASKEA; *Derrylin*.—There has been an epidemic of whooping-cough in the district during the quarter. Sanitary condition of district primitive.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district very good. Most of deaths were of persons aged 60 years and upwards.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District healthy, save for mild epidemic of whooping-cough, from which there has been one death. Registered death of a woman, 100 years old, during the quarter.

COLERAINE, *Coleraine, W.*—Whooping-cough very prevalent.

COLERAINE; *Garvagh*.—Health of district good. No infectious disease abroad during quarter.

COLERAINE; *Kilrea*.—District healthy. A like number of births and deaths were registered during the quarter. By a remarkable coincidence the sexes were the same in both registers.

COLERAINE; *Portstewart*.—Whooping-cough and mumps have been prevalent during the past quarter. I registered one death due to the former.

LIMAVADY; *Dungiven*.—Births below average; deaths similar. Three died of phthisis, one a history of heredity, other two, probably contracted; one of cancer, no heredity could be traced; one young woman died of puerperal eclampsia, duration of illness being only 19 hours. An epidemic of influenza prevailed during the past two weeks, complicated with severe chest affections.

LIMAVADY; *Limavady, W.*—There was no contagious or infectious disease during the quarter. District very healthy.

LONDONDERRY; *Claudy*.—Seven out of 18 deaths registered were due to pulmonary tuberculosis. One death was due to carcinoma of the breast, and one to sarcoma of the thigh. Nothing of interest could be elicited from history of either case.

MAGHERAFELT; *Moneymore*.—District healthy; a low death rate. A few cases of scarlatina, of a mild type, occurred during the first two months of quarter; they were kept isolated, and some of the schools were closed for a time. The disease seemed now to have disappeared; there were no deaths.

Monaghan County.

CARRICKMACROSS *Carrickmacross, W.*—Whooping-cough very prevalent. Vaccination postponed, by order of Guardians, till January. The ages, returned in seven deaths registered, ranged from 70 to 93 years.

CARRICKMACROSS; *Donaghmoyne*.—District pretty healthy.

CARRICKMACROSS, *Raferagh*.—Whooping-cough is prevalent in the district.

CASTLEBLAYNEY; *Ballybay*.—The deaths of three persons aged, respectively, 90, 94, and 97 years, were registered.

COOTEHILL; *Dawsonsgrove*.—The sanitary condition of the district is fairly good.

MONAGHAN; *Castleshane*.—The district is in a sanitary condition. There are isolated cases of scarlet fever (three, I believe, in the quarter); all the necessary precautions were taken, and cases reported. There is an epidemic of influenza.

MONAGHAN; *Emyvale*.—Sanitary condition of the district is fair.

MONAGHAN; *Kilmore*.—Except for a very large number of cases of influenza of the pulmonary type, with an unusually large percentage of pneumonia among them, the district is healthy.

MONAGHAN; *Monaghan, W.*—The sanitary arrangements in the district are satisfactory; there has been no epidemic of any kind during the quarter.

MONAGHAN; *Scotstown*.—The district is in a good sanitary condition.

Tyrone County.

CASTLEDERG; Castlederg, W.—Sanitary state of district satisfactory. No epidemic of any kind. Two cases of scarlatina during the quarter; no deaths.

CASTLEDERG; Drumquin.—The sanitary condition of the district is good, with no infectious disease of any sort, during the quarter.

CASTLEDERG; Killeter.—State of district healthy. A good many deaths among aged people.

CLOGHER; Aughnacloy.—District, practically, free from infectious disease, except influenza, which is prevalent.

CLOGHER; Fivemiletown.—The health of the district was pretty good during the quarter. There were two cases of diphtheria—one fatal.

COOKSTOWN; Coagh.—Five cases of scarlatina, of a mild type, occurred in one family during the quarter; otherwise district healthy.

COOKSTOWN; Cookstown, W.—There is an epidemic of whooping-cough in the district at present, which caused a diminution in the vaccination.

COOKSTOWN; Pomeroy.—District healthy and sanitary.

COOKSTOWN; Stewartstown.—At present district is very healthy.

DUNGANNON; Benburb.—Sanitary condition of district fairly good. Phthisis prevalent.

DUNGANNON; Clonavaddy.—District in very good sanitary condition.

DUNGANNON; Coal Island.—One case each of diphtheria, scarlatina, and enteric fever during the quarter; all these patients were removed to infirmary and usual precautions taken. At present there is a severe epidemic of influenza throughout the district. One death registered from carcinoma of liver; no family history.

IRVINESTOWN; Trillick.—Of the deaths registered during the quarter six were of old people, one reached the age of 89 years, one 80; one 76, one 73 one 71, and one 70. There were two deaths from cancer and one from diarrhoea. There were two deaths from tubercular disease, and a third person is now affected in the same family.

OMAGH; Drumquin.—The sanitary arrangements in the district are very satisfactory. None of the principal epidemic or other diseases are at present prevalent.

OMAGH; Fintona.—The health of the district has been good during the past quarter, and free from epidemic disease; during the past two weeks catarrhal influenza has been prevalent. The sanitary arrangements are satisfactory.

OMAGH; Omagh, No. 1, W.—Health of urban and rural districts satisfactory. One death registered—typhoid fever (asylum). Measles and influenza prevalent during last month. As regards sanitary condition of rural district already reported—there is no improvement. Notices were served with reference to manure heaps, and storing milk in dwellings, without avail. Many labourers' cottages are in a dirty state—never cleaned nor limewashed—displaying want of domestic and sometimes personal cleanliness. Sanitary conveniences used as houses for hens or ducks. Hen and pig-houses should be provided to encourage thrift, and prizes offered for laying out of vegetable and flower gardens.

OMAGH; Omagh, No. 2.—This district has been extremely healthy for the past three months, and is in good sanitary order. No epidemic of any kind.

OMAGH; Sixmiletown.—The district is in very good sanitary condition. No epidemic of any kind during the past three months. Some influenza in the district.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; Kiltormer.—The sanitary arrangements are fairly good. One person (a young man) died from enteric fever, but his death has not yet been registered.

CLIFDEN; Roundstone, No. 1.—Some cases of influenza with plastic bronchitis appeared during the quarter.

CLIFDEN; Roundstone, No. 2.—No vaccinations owing to the severity of the weather.

GALWAY; Galway, No. 3 (Arran).—District fairly healthy for the time of year.

GALWAY; Moycullen.—Sanitary condition of district is very fair.

GALWAY; Oranmore.—The parents of infants in the Oranmore dispensary district very seldom bring in their children for vaccination to the Medical Officer, until they are noticed by the Relieving Officer to do so at the beginning of every quarter.

GALWAY; Spiddle.—Health of district good.

GLENNAMADDY; Glennamaddy, W.—Influenza very prevalent.

GORT; Ardrahan.—Influenza.

GORT; Gort, W.—With the exception of some cases of influenza, the health of district is good.

GORT; Kinvarra.—Bronchitis was very prevalent amongst children, and this interfered with vaccination.

LOUGHREA; *Athenry*.—The sanitary condition of the rural portion of the district is fairly good, but a number of people keep manure heaps too close to dwelling-houses.

LOUGHREA; *Bullaun*.—Eight of the eleven deaths registered were of persons aged over 60 years.

LOUGHTERAUD; *Cloonbur, No. 1*.—Health of district good. Sanitary condition of district improving.

LOUGHTERAUD; *Cloonbur, No. 2*.—Sanitary arrangements fair.

TUAM; *Abbey*.—There were three cases of fever out of my district, sent to hospital.

TUAM; *Tuam No. 1, W.*—District fairly healthy during the last quarter.

TUAM; *Tuam, No. 2*.—There was an epidemic of diphtheria confined to children attending one school in October. Owing to precautions taken, including closing of the school for a time, the epidemic did not spread. Except for influenza in December, the district is healthy.

Leitrim County.

BAWNBOY; *Ballinamore*.—Sanitary condition of district good.

MANORHAMILTON; *Lurganboy*.—Vaccinations backward owing to state of weather. Influenza of a very virulent type now prevalent.

MANORHAMILTON; *Manorhamilton, W.*—Influenza has been very prevalent causing one death (a feeble imbecile in workhouse).

MOHILL; *Carrigallen*.—With the exception of influenza which prevailed during last month, the health of the district has been exceptionally good during the quarter. Sanitation fairly good.

MOHILL; *Mohill, W.*—The district is in a fair healthy condition. At present there is no disease prevalent.

MOHILL; *Rinn*.—The district is fairly healthy and free from epidemic.

MOHILL; *Rowan*.—Sanitary arrangements of the district satisfactory.

Mayo County.

BALLINA; *Crossmolina*.—Sanitary condition of district fairly good.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements fairly good.

BALLINROBE; *Cong.*—Health of district good during quarter just ended.

BALLINROBE; *Hollymount*.—Births, under, and deaths about, the average. The general health of the people has been very good during this quarter, but some cases of influenza and chest affections occurred during the past three weeks.

BELMULLET; *Binghamstown, W.*—Of the deaths registered, one was 103 years of age and one 84. District in a very insanitary state in consequence of defective sewerage and keeping pigs and fowl in dwellinghouses. Over thirty cases of typhus fever occurred in district for quarter, resulting in one death.

CASTLEBAR; *Balla*.—District healthy. I believe vaccination would be better were it not for the cold weather.

CASTLEBAR; *Castlebar, No. 1, W.*—Mild epidemic of whooping-cough was prevalent, but no deaths occurred. In consequence vaccinations were generally postponed.

CLAREMORRIS; *Ballindine*.—District healthy.

CLAREMORRIS; *Ballyhaunis*.—Health of district good. No zymotics or cancer. Sanitation progressive. Of the deaths registered four were between 80 and 90 years and two over 90 years.

KILLALA; *Killala, W.*—The district was free from infectious disease during the quarter.

WESTPORT; *Achill*.—Sanitary state of district good. A mild form of influenza prevalent. Owing to prosecutions children are being presented for vaccination.

WESTPORT; *Ballycroy*.—Weather during the quarter has been the most inclement on record. Sixteen cases of diphtheria (of an exceedingly mild type, however). Bronchial diseases extremely prevalent, and severe influenza has broken out.

WESTPORT; *Bundorragha*.—Sanitary arrangements pretty good.

WESTPORT; *Louisburgh*.—District healthy.

Roscommon County.

ATHLONE; *Brideswell*.—Epidemic of influenza during quarter.

BOYLE; *Ballyfarnan, No. 1*.—State of district generally healthy.

BOYLE; *Boyle, No. 1, W.*—The district has been fairly healthy during the past quarter.

BOYLE; *Keadew*.—Whooping-cough and influenza prevalent during quarter.

CARRICK-ON-SHANNON; *Aughrim*.—The district is free from infectious disease, and the sanitary condition is good. The number of births for the quarter is in excess of the number of deaths by seven. Owing to the inclement weather vaccination has been somewhat neglected during the past month. Previous to that it was well attended to.

CASTLEREAGH; *Ballaghaderreen*.—District during this quarter healthy. There has been some influenza.

ROSCOMMON; *Roscommon, W.*—Measles and influenza have been epidemic in district during quarter.

Sligo County.

BOYLE; *Ballyfarnan, No. 2*.—State of the district generally healthy.

BOYLE; *Gurteen*.—Some cases of influenza in the district.

DROMORE WEST; *Easky, W.*—Health of district good. No case of infectious disease during quarter.

DROMORE WEST; *Skreen*.—An outbreak of diphtheria occurring in this and

previous quarter, now stamped out, accounts for so few primary vaccinations. There has been a number of influenzal cases, and, save a few, all were of a mild type. Otherwise the district is very healthy.

SLIGO; *Ballymote*.—District in a healthy condition.

SLIGO; *Carney, No. 1*.—Influenza of a gastro-intestinal type has been prevalent during the latter part of the quarter. Two fresh cases of pulmonary tuberculosis have come under my observation. Notification of tubercular disease should be adopted, and Medical Officers of Health should have opportunity of submitting specimens of sputum for bacteriological examination free of cost.

SLIGO; *Sligo, No. 1, W.*—Of the five rural deaths from tuberculous disease, three took place in Asylum and two in Workhouse.

TOBERCURREY; *Aclare*.—The health of the district has been exceedingly good and free from fever during the quarter.

TOBERCURREY; *Coolaney*.—Sanitary arrangements satisfactory.
